CONTENTS

SYMPOSIUM ON CARBOHYDRATE METABOLISM

Van R. Potter. Studies on the Reactions of the Krebs Citric Acid Cycle in Tumor, with Homogenates, Slices, and in Vito Technics .............................................. 565

Robert E. Olson. Oxidation of C¹⁴-labeled Carbohydrate Intermediates in Tumor and Normal Tissue .......................................................... 571

Sidney Weinhouse. Studies on the Fate of Isotopically Labeled Metabolites in the Oxidative Metabolism of Tumors ................................................. 585

Paul C. Zamecnik, Robert B. Loftfield, Mary L. Stephenson, and Jean M. Steele. Studies on the Carbohydrate and Protein Metabolism of the Rat Hepatoma ......................... 592

E. V. Cowdry. Trends in Cancer Research .......................................................... 603

Richard Weissenberg. Studies on Lymphocystis Tumor Cells of Fish. II. Granular Structures of the Inclusion Substance as Stages of the Developmental Cycle of the Lymphocystis Virus .............. 608

J. Gross and S. Schwartz. The Metabolism of Thyroxine in C37 Mice and in C3H Mice with and without Mammary Tumors ................................ 614

Frances L. Haven, W. R. Bloor, and Challiss Randall. The Nature of the Fatty Acids of Rats Growing Walker Carcinoma 256 ............................................. 619

Martin Silberberg, Ruth Silberberg, and Helen V. Leidler. Effects of Anterior Hypophyseal Transplants on Intrasplenic Ovarian Grafts ........................................ 624

Henry S. Kaplan, Sumner N. Marder, and Mary B. Brown. Adrenal Cortical Function and Radiation-induced Lymphoid Tumors of Mice .................... 629

William L. Miller, Jr., and C. A. Baumann. Basal Metabolic Rate and Liver Tumors Due to Azo Dyes ................................................................. 634

Charles Heidelberger and Helga Straube Rieke. The Synthesis of 3,4-Benzpyrene-5-C¹⁴ and of 2-Acetylaminofluorene-9-C¹⁴ .............................................. 640

Joyce R. Shapiro and Arthur Kirschbaum. Intrinsic Tissue Response to Induction of Pulmonary Tumors ......................................................... 644

Comments and Communications ................................................................. 652
