CONTENTS

Leon O. Jacobson. Evidence for a Humoral Factor (or Factors) Concerned in Recovery from Radiation Injury: A Review ................................................................. 315

E. A. Balazs and J. von Euler. The Hyaluronidase Content of Necrotic Tumor and Testis Tissue .......................................................... 326

Gaston de Lamirande and Antonio Cantero. Electrophoretic Analysis of Plasma Protein Constituents in Rats Bearing Regenerating and Pre-neoplastic Livers .................................................. 330

Helen I. Battle and Kenichi K. Hisaoka. Effects of Ethyl Carbamate (Urethan) on the Early Development of the Teleost (Brachydanio rerio) ........................................... 334

Henry H. Henstell and Robert I. Freedman. The Viscosimetric Determination of Desoxyribonuclease Inhibition ........................................... 341

Henry H. Henstell, Robert I. Freedman, and Ben Ginsburg. An Inhibitor of Desoxyribonuclease in Human White Blood and Bone Marrow Cells, and Its Relationship to Cellular Maturity .................................................. 346

Helmut R. Gutmann, Gladys E. Kiely, and Michael Klein. The Metabolism of 2-Aminofluorene in the Rat ................................................................. 350

Howard L. Richardson, Alton R. Stier, and Edmund Borsos-Nachtnebel. Liver Tumor Inhibition and Adrenal Histologic Responses in Rats to Which 3′-Methyl-4-dimethylaminoazobenzene and 20-Methylcholanthrene Were Simultaneously Administered ........................................... 356

L. C. Strong and W. F. Hollander. The Influence of Certain Variables on the Incidence of Gastric Neoplasia in Mice of the Br-S Strain .................................................. 362

Walter J. Burdette. Effect of Nitrogen Mustard on Tumor Incidence and Lethal Mutation Rate in Drosophila ................................................................. 366

Howard E. Skipper, Constance Nolan, Margaret Ann Newton, and Linda Simpson. The Effect of Folic Acid on A-Methopterin-induced Inhibition of Nucleic Acid Synthesis .................................................. 369

Howard E. Skipper, Martela Bell, and Juanita B. Chapman. The Failure of C14-Formate To Affect the Course of Mouse Leukemia .................................................. 371

Mary L. Petermann and Mary G. Hamilton. An Ultracentrifugal Analysis of the Macromolecular Particles of Normal and Leukemic Mouse Spleen .................................................. 373

Nathan Kaliss. Regression or Survival of Tumor Homoiografts in Mice Pretreated with Injections of Lyophilized Tissues .................................................. 379

Samuel Graff, William Antopol, Gerard Zagal, and Fay Agate. Influence of Sarcoma 180 on Adenocarcinoma 755 in the Mouse .................................................. 383

Announcements ........................................................................ 385
