CONTENTS

A. Wesley Horton and Dorothy T. Denman. Carcinogenesis of the Skin. A Re-examination of Methods for the Quantitative Measurement of the Potencies of Complex Materials ........................................... 701

N. Burr Furlong, E. Jarvis P. Watson, William E. Davis, and A. Clark Griffin. The Effect of Tumor Fractions on the Uptake of Carbon-14-labeled Adenine into the Deoxyribonucleic Acids of Mouse Tissues ........................................................................... 710

Saul Kit. The Biosynthesis of Free Glycine and Serine by Tumors ........................................................................................................ 715

Hugh J. Creech, H. Francis Havas, and Janet Andre. Immunological Properties of Carcinogen-Protein Conjugates Containing Polycyclic Aromatic Hydrocarbons and Substituted Stilbenes ........................................................................... 726

R. Daoust and A. Cantero. Isolation of Acid-soluble Nucleotides from Rat Tissues and Measurement of Their Specific Activity Following P32 Administration ........................................................................... 734

Abraham Goldin, John M. Venditti, Stewart R. Humphreys, Don Dennis, and Nathan Mantel. Studies on the Management of Mouse Leukemia (L1210) with Antagonists of Folic Acid ........................................................................... 742

Harry S. N. Greene. Infectiousness of the Shope Papilloma Virus after Growth in Embryonic, Neoplastic, and Cancerous States of Domestic Rabbit Skin ........................................................................... 748

Ethelda N. Sassenrath, Donald C. Morrison, Ann M. Larson, and David M. Greenberg. Evaluation of the Carcinostatic Activity of 1,4-Bis(β-chloroethylthio)ethane ........................................................................... 755

Max S. Dunn and Edward A. Murphy. Effect of Ethionine Alone or with Amino Acids on Tumor Growth, Carcass Weight, and Nonprotein Amino Acids in Rat Liver ........................................................................... 760

Mary C. Fioramonti, Jay C. Bryant, William T. McQuilkin, Virginia J. Evans, Katherine K. Sanford, and Wilton R. Earle. The Effect of Horse Serum Residue and Chemically Defined Supplements on Proliferation of Strain L Clone 929 Cells from the Mouse ........................................................................... 763

John J. Biesele and Paul Goldhaber. A Study of Cytoplasmic Lipid Granularity in Tissue Culture Cells ........................................................................... 767

H. W. Rumsfeld, Jr., and C. A. Baumann. Proteinuria in Tumor-bearing Rats ........................................................................... 774

Index to Volume 15 ................................................................................................................................................................................. 781
