INDEX TO VOLUME 15*

AUTHOR INDEX

Abraham, S., Hill, R., and Chaikoff, I. L. Concerning pathways of glucose utilisation in mouse liver and hepatoma, 177
Agate, F. See Agate, F. J., Jr., 6
Agate, F. J., Jr., Antopol, W., Glashuie, S., Agate, F., and Graff, L. The nonessentiality of the hypophysis for the induction of tumors with 3,4-benpyrene, 8
Albano, A. See Kertész, D., 394
Allard, C. See de Lamirande, G., 289
Allen, S. L. H-2 
, a tenth allele at the histocompatibility-2 locus in the mouse as determined by tumor transplantation, 315
Anderson, T. F. See Conan, D. R., 541
Andre, J. J. See Creech, H. J., 728
Antopol, W. See Agate, F. J., Jr., 6
Appel, M., and Saphir, O. The Brown-Pearce carcinoma in the hyperergic rabbit, 357
Aptekman, P. M., and Bogden, A. E. A spontaneous ascites tumor originating and transplantable in the Wistar rat, 69
Bahner, C. T. Effect of compounds related to 4-(p-dimethylaminoestryl) quinoline methiodide on lymphomas, 8, 588
Baker, K. F., Berg, O., Gerban, A., Mignell, R. F., and Gorden, M. Functional thyroid tumors in the kidneys of platyfish, 118
Balis, M. E., and Dancis, J. Effects of A-monothepin on nucleic acid synthesis in leukemic spleen breis, 608
Baerga, R., and Baum, J. Induction of blood-borne metastases by tumor transplantation in the tail of mice, 52
Baum, J. See Baerga, R., 52
Baumann, C. A. See Kandutsch, A. A., 128
—. See Rumsfeld, H. W., Jr., 774
Beaumont, J. See Sokoloff, B., 147
Bennett, L. L., Jr., Skipper, H. E., Stock, C. C., and Rhodes, C. P. Searches for exploitable biochemical differences between normal and cancer cells. I. Nucleic acid purine metabolism in animal neoplasms, 485
Bennett, M. A., Hellerman, J., and Donnelly, A. J. Influence of vitamin B12 on liver disease due to a "labile methyl"-free diet, 595
Bennett, P. L. See Halliday, S. L., 698
Berenblum, I., and Haran, N. The influence of dose of carcinogen, emptiness of stomach, and other factors on tumor induction in the forestomach of the mouse, 504
—. The influence of croton oil and of polyethylene glycol-400 on carcinogenesis in the forestomach of the mouse, 510
Berenbom, M., Chang, P. I., Betz, H. E., and Stowell, R. E. Chemical and enzymatic changes associated with mouse liver necrosis in vitro, 1
Berg, O. See Baker, K. F., 118
Bering, E. A., Jr., McLaurin, R. L., Lloyd, J. B., and Ingraham, F. D. The production of tumors in rats by the implantation of pure polyethylene, 300
Bernard, L. J., Dutton, A. M., and Radakovitch, M. Attempts to influence resistance to the Walker carcinoma 256 by administration of thorium dioxide (thorotrast), 15

**SUBJECT INDEX**

**ACTH.** See Adrenocorticotropicin.

Acetate-C14, incorporation of, into glycine and serine by tumors. Kit, 715
4-Acetylaminobiphenyl, carcinogenic activity of. Miller, Sandin, Miller, and Rusch, 188
2-Acetylaminobenzothiazole, carcinogenic activity of. Miller, Sandin, Miller, and Rusch, 188
3-Acetylaminobenzophenone sulfone, carcinogenic activity of. Miller, Sandin, Miller, and Rusch, 188
2-Acetylaminobenzophenone, carcinogenic activity of. Miller, Sandin, Miller, and Rusch, 188
3-Acetylaminophenylmethane, carcinogenic activity of. Miller, Sandin, Miller, and Rusch, 188
4-Acetylaminophenylsulphone, carcinogenic activity of. Miller, Sandin, Miller, and Rusch, 188
2-Acetylaminofluorene, as an initiator and promoter of epidermal carcinogenesis in the mouse. Ritchie and Saffiotti, 84
—  — carcinogenesis of compounds related to. Miller, Sandin, Miller, and Rusch, 188
—  — effects on auditory sebacous gland. Laws, Rudali, Royer, and Mabille, 189
—  — immunological properties of carcinogen-protein conjugates containing. Creech, Havas, and Andre, 726
2-Acetylaminofluorane, carcinogenic activity of. Miller, Sandin, Miller, and Rusch, 188
2-Acetylaminofluorenone, carcinogenic activity of. Miller, Sandin, Miller, and Rusch, 188
3-Acetylaminophenanthrene, carcinogenic activity of. Miller, Sandin, Miller, and Rusch, 188
1-Acetylaminopyrene, carcinogenic activity of. Miller, Sandin, Miller, and Rusch, 188
2-Acetylaminopyrene, carcinogenic activity of. Miller, Sandin, Miller, and Rusch, 188
3-Acetyl pyridine, effect on tumor penetrance in Drosophila. Friedman, Harlin, and Kopac, 382

Adenine, isolated from mouse lymphoma protein, effect of A-methopterin on incorporation of formate-C14 into. Williams, Slater, and Winzler, 552
—  — of acid-soluble nucleotides, incorporation of glycine-2-C14 into. Edmonds and LePage, 98
Adenine-5-C14, effect of tumor fractions on the uptake of, into deoxyribonucleic acids of mouse tissues. Furlong, Watson, Davis, and Griffin, 710
—  — incorporation into pentose nucleic acids of various hamster tissues and of heterologous human tumor implants. Balis, Prag, and Brown, 675
—  — incorporation into polynucleotides by a variety of tumors and host intestine and liver. Bennett, Skipper, Stock, and Rhoads, 485
Adenine-1,3,5-R3, incorporation into nucleic acids of spleens of normal and leukemic mice, with and without A-methopterin. Balis and Dancis, 603

Adenocarcinoma, of colon and rectum, in human, increased aldolase content of. Sibley and Fleisher, 809
Adenocarcinoma 765, carcinostatic activity of 15 benzylidene analogs of puromycin for. Halliday, Bennett, and Olson, 688
—  — effect of antitumor agents on incorporation of P32 into deoxyribonucleic acid of. Davidson and Freeman, 81
—  — incorporation of labeled purines and of formate-C14 into nucleic acid purines of. Bennett, Skipper, Stock, and Rhoads, 485
—  — inhibition of various enzyme systems in, with deoxy- pyridoxine and/or testosterone. Dietrich and Shapiro, 159
Adenocarcinoma 15091A. See Carcinoma 15091A

Adenocarcinoma A-T2, mammary, solid, effect of 1,8-bis-(8-chloroethylthio)ethane and methyl compounds-(8-chloroethyl)amine on mice bearing. Sassenrath, Morrison, Larson, and Greenberg.

Adenocarcinoma C3HDA, effect of 1,8-bis-(8-chloroethylthio)ethane and methyl compounds-(8-chloroethyl)amine on mice bearing. Sassenrath, Morrison, Larson, and Greenberg.
—  — effect of chemotherapeutic agents on. Tarnowski and Stock, 227
—  — localization of vegetative form of Clostridium tetani in, following intravenous spore administration. Malmgren and Flanigan, 473
Adenocarcinoma CSH-SX, ascites and solid, effect of 1,2-bis(3-chloroethyl)thio)ethylene and methyl bis(3-chloroethyl)amine on mice bearing. Sassenrath, Morrison, Larson, and Greenberg, 755

Adenocarcinoma E 0771, cell spread of, as a lethal factor. Goldie, Walker, Jeffries, and Guy, 263

—, chemotherapy of, with 8-azaguanine and flavamin. Woodside and Kelton, 906

—, effects of phosphoramides on. Sugiuira and Stock, 38

—, glucose-6-phosphatase activity of. Weber and Cantero, 485

—, growth of, inhibited by N-methylformamide. Skipper, Schabel, Binns, Thomson, and Wheeler, 148

—, incorporation of labeled purines and of formate-C14 into nucleic acid purines of. Bennett, Skipper, Stock, and Rhoods, 485

Adenocarcinoma R737 (Lueck tumor), adaptation of, in amphibia. Tweedell, 410

Adenocarcinoma R743, adaptation of, in amphibia. Tweedell, 410

Adenosine triphosphatase, activity of, in plasma of normal and lymphomatosus chickens. Lesher and Burnmeter, 567

Adenosine triphosphate, with hexokinase, lack of effect on dinitrophenol inhibition of glucose oxidation by mouse kidney homogenate. Wenner and Weinhouse, 497

Adrenal, tumor of, after castration and unilateral adrenalectomy, in mice and pigs. Martines and Bittner, 612

Adrenocorticotropic, effect on growth of Walker carcinosarcoma 256, with or without treatment with cortisol and ammonium chloride. Selye, 26

—, unilateral, in mice, effect on postcastrational adrenal tumors of. Martines and Bittner, 612

Adrenocorticotropicin, effect on malignant lymphoma in mice. Silberberg and Silberberg, 291

Age, effect on susceptibility to ACTH-induced lymphomas in mice. Silberberg and Silberberg, 291

Alanine, labeling of, in vivo, in various normal and tumor tissues of rats injected with pyruvate-C14, Busch, 363

—, lack of incorporation of, into RNA pyrimidines of Ehrlich ascites tumor. Lagerkvist, Reichard, Carlsonson, and Graboss, 164

Albumin, decreased level in plasma of mice with Sarcoma 180. Bernfield and Homburger, 359

—, inhibition of disease plant growths in tissue culture by. Hildebrandt and Riker, 517

Alcohol, increased content of, in adenocarcinoma of colon and rectum, in human. Sibley and Fleisher, 600

—, in serum of normal and tumor-bearing rats. Sibley, Fleisher, and Higgins, 606

Allergic inflammatory reaction, lack of effect on development of tumor grafts in mice. Molonot, Spain, Kreisler, and Warshaw, 181

Alloxan diabetes, effect on survival of mice with Ehrlich ascites carcinoma. Jell, Mayer, and McKee, 541

—, effect of intraperitoneal tumors on severity of. Goranson and Tiller, 606

—, rat, effect of on growth of Novikoff hepatoma in Walker 256 carcinoma. Goranson and Tiller, 606

Amblystoma punctatum, lathyris and tumors of notochord in, Levy and Godman, 194

A-methopterin, effect on formate-C14 incorporation into protein and lipids of mouse leukemias in vitro. Williams, Slater, and Winstler, 552

—, effect on nucleic acid synthesis in leukemic spleen breis, in mice. Balis and Dancis, 608

—, effect on nucleic acid synthesis in vivo in leukemic mice Balis and Dancis, 608

—, effect on various carcinomas. Tarnowski and Stock, 227

—, with or without citrovorum factor, effect on mouse leukemia L1210. Goldin, Venditti, Humphreys, Dennis, and Mantel, 748

Amico acids. See also specific amino acids.

—, free, concentration of, in liver, muscle, and plasma of normal and tumor-bearing rats, after injection of selected amino acids. Greenberg and Sassenrath, 690

—, free, in liver, effect of ethionine on, in normal and tumorous rats. Levy, Murphy, and Dunn, 302

—, free, in tumor C1498 transplanted into resistant and susceptible mice. Roberts and Borges, 697

—, free and combined, in rat liver, effect of injection of ethionine with and without amino acids on. Dunn and Murphy, 780

—, metabolism of, in relation to cancer. Greenberg, 412

—, tolerance to injection of, in normal and tumor-bearing rats. Greenberg and Sassenrath, 690

Aminopterin, effect on cellular division and differentiation, in rat intestine. Friedman, Sargent, and Drutz, 479

—, effect on level of serum aldolase in tumor-bearing rats. Sibley, Fleisher, and Higgins, 506

—, studies to increase the antileukemic specificity of, for mice. Goldin, Venditti, Humphreys, Dennis, Mantel, and Greenhouse, 57

—, with or without citrovorum factor, effect on mouse leukemia L1210. Goldin, Venditti, Humphreys, Dennis, and Mantel, 749

Ammonium chloride, effect on incorporation of formate-C14 and of carbamyl aspartate-C4 into rat liver and hepatoma. Werkheiser and Visser, 544

—, effect on incorporation of radiophosphate into rat liver and hepatoma. Werkheiser, Winaker, and Visser, 641

Ammonia-H14, incorporation of, into PNA pyrimidines of Ehrlich ascites tumor. Lagerkvist, Reichard, Carlsonson, and Graboss, 164

—, ammonium chloride and cortisol, effect on growth of Walker carcinosarcoma 256 in normal and adrenalecetomized rats. Selye, 39

Amphibia, lathyris and tumors of notochord in Amblystoma punctatum. Levy and Godman, 184

—, transplantation of renal carcinoma in kindred races. Tweedell, 410

Andrenort hepatoma, effects of phosphoramides on. Sugiuira and Stock, 38

Anthrascene, carcinogenic activity of, alone or with other chemicals, in mice. Steiner, 632

Antigena, human, detection in human tumors after heterologous transplantation. Korngold and Lipari, 189

Antitumor, produced in rabbits and guinea pigs, effect on mouse mammary tumor agent. Bittner and Imagawa, 604

Arginine, effect of injection of, in combination with ethionine, on tumor growth, carcass weight, and nonprotein amino acids in rat liver. Dunn and Murphy, 700

Aromatic hydrocarbons, condensed, electronic structure and carcinogenic activity of. Nagata, Fukui, Yonesawa, and Tagashira, 923

Asbestos tumor, arising spontaneously and transplantable in Wistar rat. Aptekman and Bogden, 89

Ascorbic acid, effect on nucleic acids in tumor tissues. Sokoloff, Eddy, Beaumont, Williams, and Powells, 147

—, inhibition of DOPA autoxidation by. Hirsch, 649

L-Aspartate-N14, incorporation of, into PNA pyrimidines of Ehrlich ascites tumor. Lagerkvist, Reichard, Carlsonson, and Graboss, 164

Aspartic acid, in liver, effect of ethionine on, in normal and tumorous rats. Levy, Murphy, and Dunn, 302

—, labeling of, in vivo, in various normal and tumor tissues of rats injected with pyruvate-8-C14, Busch, 365

Asparagine, effect on incorporation of P2 into deoxyribonucleic acid of Adenocarcinoma 725. Davidson and Freeman, 31

—, on mouse tumors alone and with flavinon. Woods and Kelton, 590

—, on various carcinomas. Tarnowski and Stock, 227

Azaserine. See O-Diausocetyl-L-serine.

B-Azaaxanthine, effect on incorporation of P9 into deoxyribonucleic acid of Adenocarcinoma 725. Davidson and Freeman, 31
Bacteria, localization of Clostridium tetani in mouse tumors following intravenous spore administration. Malmgren and Flanagan, 473

Bashford carcinoma, effects of phosphoramide on. Sugiu and Stock, 38
——, incorporation of labeled purines and of formate-C14 into nucleic acid purines of. Bennett, Skipper, Stock, and Rhoads, 495

1,2-Benzanthracene, carcinogenic activity of, alone or with other chemicals, in mice. Steiner, 632
——. effect on levels of 7C-cholesterol in mouse skin. Kandutsch and Baumann, 128
——. effect on levels of 7C-cholesterol in mouse skin. Fukui, Yonesawa, and Tagashira, 235
——, electronic structure and carcinogenic activity of. Nagata, Fukui, Yonesawa, and Tagashira, 235
——, immunological properties of carcinogen-protein conjugates containing. Creech, Havas, and Andre, 729

3,4-Benzphenanthrene, electronic structure and carcinogenic activity of. Nagata, Fukui, Yonesawa, and Tagashira, 235

3,4-Benzipyrrene, electronic structure and carcinogenic activity of. Nagata, Fukui, Yonesawa, and Tagashira, 233

3,4-Benzipyrrene, carcinogenic activity of, alone or with other chemicals, in mice. Steiner, 632
——, effect on level of 7C-cholesterol in mouse skin. Kandutsch and Baumann, 128
——, electronic structure and carcinogenic activity of. Nagata, Fukui, Yonesawa, and Tagashira, 233
——, feeding of, followed by croton oil or polyethylene glycol-400, effect on carcinogenesis in forestomach of mouse. Berenblum and Haran, 510
——, induction of carcinomas of cervix and vagina by. von Haam and Scarpelli, 449
——, induction of sarcomas by, in hypophysectomized rats. Moon and Simpson, 408
——, method for measuring relative potency of, as carcinogen in mouse skin. Horton and Denman, 701
——, response of sebaceous glands of mice to topical application of. Suntzeff, Cowdry, and Croninger, 637
——, tumor induction in forestomach of mouse by feeding of. Berenblum and Haran, 504

Benzylidene analogs of pyruvoincin, carcinostatic activity of, for mammmary adenoacinaromas in mice. Halliday, Bennett, and Oleson, 695

Bioisynthesis, of free glycine and serine by tumors. Kit, 715

Biotin, effect alone and with other B vitamins on tumor incidence of Drosophila led a low-tumor diet. Friedman, Harlin, and Kopac, 375

3-Bis(5-chloroethyl)aminomethyl-4-methoxymethyl-5-hydroxy-2-methylpyridine, effect on various carcinomas. Tarnowski and Stock, 827

1,2-Bis(5-chloroethylthio)ethane, toxicity and carcinostatic activity of, in mice and rats. Sassenrath, Morrison, Larson, and Greenberg, 755

——. concentration of free amino acids in, after injection of selected amino acids into normal and tumor-bearing rats. Greenberg and Sassenrath, 660
——, in vivo metabolism of pyruvate-2-C14 by, in tumor-bearing rats. Busch, 365
——, plasma, activity of acid phosphatase, alkaline phosphatase, and adenosine triphosphatase in, in chicken. Lesher and Bennani, 637
——, plasma protein of, influence of tumor growth on. Bernfeld and Homburger, 359

Brain, human tumor of, transplanted into guinea pig eye. Nettesheim and Zeman, 546
——, in vivo metabolism of pyruvate-2-C14 by, in tumor-bearing rats. Busch, 365
——, mouse, effect of dinitrophenol on glucose oxidation in homogenates of. Wenner and Weinhouse, 497

Breast Cancer, growth of, in hyperergic rabbit. Appel and Saphir, 327

Bufo Fowleri, transplantation of renal carcinoma from R. pipiens into. Tweedell, 410

Butanol, effect on growth of diseased plants in tissue culture. Hildebrandt and Riker, 517

Cancer, biochemistry of, isotopic tracer studies on, review. Greenberg, 421
——. cytology and cytochemistry, a review. Mellors, 557
——, inheritance of, susceptibility to, review. Burdette, 201

Carbamyli aspartate-4-C14, incorporation into rat liver and hepatoma, effect of 3,6-diaminopurine and of 5-aminouridine on. Werkheimer and Visser, 644

Carcinogenesis, activity of polycyclic aromatic hydrocarbons administered simultaneously, in mice. Steiner, 632
——. by ultraviolet light, effect of visible light on, in mice. Griffo, Doleman, Böhlke, Bouvart, and Tatsumi, 528
——. effect of cigarette tar on mouse strains. Wynder, Graham, and Croninger, 445
——, immunological inhibition of, properties of carcinogen-protein conjugates. Creech, Havas, and Andre, 729
——, induced in colon of mice by 20-methylcholethanthene. Rack, Kaufman, and Simeone, 752
——, in forestomach of mouse, effect of various carcinogenic hydrocarbons and promoting agents on. Berenblum and Haran, 510
——, inhibition of sarcomas produced by methylcholethanthene, in hypophysectomized rats. Moon and Simpson, 408
——, in rats, resulting from whole-body radiation. Koletsky and Gustafson, 100
——. in relation to the new emotionalism in research, review. Brues, 445
——, in skin of mice, method for quantitative measurement of potencies of complex materials. Horton and Denman, 701
——, of compounds related to 3-acetylaminofluorene. Miller, Sandin, Miller, and Sacks, 180
——, produced by polymers imbedded subcutaneously. Oppenheimer, Oppenheimer, Danieshfsy, Stout, and Eichir, 323
——. significance of mutation in relation to, review on. Burdette, 201

Carcinoma, experimental, of cervix, cytologic and histologic study. von Haam and Scarpelli, 449
——. experimental production of, with cigarette tar, on different mouse strains. Wynder, Graham, and Croninger, 445
——, mouse mammary, heterologous transplantation of, effect of lyophilized tumor injections on. Pikowski and Schlesinger, 285

Carcinoma 1025, effects of phosphoramide on. Sugiu and Stock, 36
——. incorporation of labeled purines and of formate-C14 into nucleic acid purines of. Bennett, Skipper, Stock, and Rhoads, 455

Carcinoma L5091A, cell spread of, as a lethal factor. Goldie, Walker, Jeffries, and Guy, 265
——. effect of chemotherapeutic agents on. Tarnowski and Stock, 227
——. incorporation of glycine-2-C14 into. Greenles and LePage, 256

Carcinoma BL, cell spread of, as a lethal factor. Goldie, Walker, Jeffries, and Guy, 265

Carcinoma BW1888, cell spread of, as a lethal factor. Goldie, Walker, Jeffries, and Guy, 265

Carcinoma C3HBA. See Adenoacarcinoma C3HBA

Carcinoma E 0771. See Adenoacarcinoma E 0771.

Carcinoma RC, effect of chemotherapeutic agents on. Tarnowski and Stock, 227
——. incorporation of labeled purines and of formate-C14 into nucleic acid purines of. Bennett, Skipper, Stock, and Rhoads, 455

Carcinoma TC3H, sublines TD and TL, effect of chemotherapeutic agents on. Tarnowski and Stock, 227

Castration, with unilateral adrenalectomy, effect on adrenal tumor in mice. Martines and Bittner, 612

Cell fractionation, of liver tumor from rats fed 4-dimethylaminobenzene, ribonucleic acid composition of. de Laminde, Allard, and Cantero, 326
Cell fractionation, of Walker carcinoma 256, for determination of peroxidase activity, in rat. Neufeld, Lucas, Martin, and Stotz, 550

Cellophane, rodent tumors induced by subcutaneous imbedding of: Oppenheimer, Oppenheimer, Danishefsky, Stout, and Eirich, 388

Chemotherapy, combination of, mouse tumors with 8-azaguanine and fluorin. Woodside and Kelton, 390

—, cytoplasmic lipid granularity and toxicity in screening of compounds in tissue culture. Biese and Goldhaber, 787

—, effect of 1,2-bis(3-chloroethyl)amine and of methyl-

—, of mouse mammary carcinomas. Tarnowski and Stock, 227

Chicken, early development of squamous-cell carcinoma in methyl-cholanthrene-poised skin of. Knight and Taber, 588

—, electron microscopy studies of Rous sarcoma in. Gaylord, 80

—, lack of effect of comb-mucous extract on carcinogenesis in skin of. Knight and Taber, 588

—, normal and lymphomatous, activity of acid phosphatase, alkaline phosphatase, and adenosine triphosphatase in plasma of. Lecher and Burmeister, 587

—, spontaneous regression of hemangioma in. Rigdon, 77

—, effect of, lesion syndromes correlated with times of death after inoculation of lymphoid tumor. Julian, 483

Δ'-Cholestenol, level in skin of rats and mice treated with carcinogens and other chemicals. Kandutsch and Baumann, 188

Cholesterol, content of, in the intestine of normal and tumor-bearing rats. Bloom and Haven, 178

Choline, C14 content of, in rat liver, after injection of methyl-

—, radioactive, in liver after administration of 4-dimethyl-

Chrysene, carcinogenic activity of, alone or with other chemicals, in mice. Steiner, 698

—, electronic structure and carcinogenic activity of. Nagata, Fukui, Yonesawa, and Tagashira, 238

Cigarette tar, experimental carcinoma with, in different mouse strains. Wynder, Graham, and Croninger, 445

Citroverus factor, administered subsequent to aminopterin, in treatment of mouse leukemia. Goldin, Venditti, Humphreys, Dennis, and Mantel, and Greenhouse, 57

—, given with d-amethopterin or aminopterin, effect on mouse leukemia 1910. Goldin, Venditti, Humphreys, Dennis, and Mantel, 749

Clostridium tetani, localization of vegetative form of, in mouse tumors following intravenous spore administration. Malmgren and Flanagan, 473

Colchicine, effect on cellular division and differentiation, in rat intestine. Friedman, Sargent, and Druts, 479

Cortisol, effect on growth of Walker carcinoma 256 in normal and adrenalectomized rats. Snyder, 26

Cortisone, effect on sarcoma transplantation in hamster. Lemmon and Smakula, 273

—, effect on various carcinomas. Tarnowski and Stock, 227

Crestine, C14 content of, in rat liver, after injection of methyl-

Crockrer rat carcinoma, effect of ascorbic acid and glucoscorbic acid on nucleic acids of. Sokoloff, Eddy, Beaumont, Williams, and Powella, 147

Croton oil, administered with cigarette tar, effect on carcinoma production in mice. Wynder, Graham, and Croninger, 445

—, effect on level of Δ'-cholensterol in mouse skin. Kandutsch and Baumann, 128

—, influence on carcinogenesis in forestomach of mouse after hydrocarbon feeding. Berenblum and Haran, 510

—, promotion of skin tumors induced by 2-acetylaminofluorene by. Ritchie and Saffiotti, 84

Cytosine, administration with methionine and 4-(p-dimethyl-

—, on regression of Lymphoma 8 in rats. Bahner, 588

—, effect on tumor induction in Drosophila by x-rays or tryptophan. Plaine, 161

—, inhibition of DOPA autoxidation by. Hirsch, 249

Cysteine demethylase, lack of inhibition of, by deoxyribo-

—, with or without testosterone. Dietrich and Shapiro, 133

Cytochrome oxidase, alterations in, during necrosis of mouse liver in vitro. Berenblum, Chang, Betz, and Stowell, 1

—, in mitochondria of Walker carcinoma 256. Neufeld, Lucas, Martin, and Stotz, 550

Cytoplasmic lipid granularity, in tissue culture cells. Biese and Goldhaber, 787

Dacron, rodent tumors induced by subcutaneous imbedding of. Oppenheimer, Oppenheimer, Danishefsky, Stout, and Eirich, 388

Deoxyriboendoic acid. See also Nucleic acids.

—, content of, in Yoshida sarcoma, effect of radiation on. Gardella and Lichter, 529

—, effect of various antitumor agents on incorporation of 3H into. Davidson and Freeman, 31

—, effect of ascorbic acid and D-glucoscorbic acid on, in various tumor tissues. Sokoloff, Eddy, Beaumont, Williams, and Powella, 147

—, incorporation of 3H into. Nygaard and Busch, 240

—, increased in exfoliated malignant cells in experimental carcinoma of cervix and vagina in mice. von Hasam and Scarrelli, 449

—, in relation to cancer cytology and cytochemistry, a review. Mellors, 657

—, of mouse tissues, effect of tumor fractions on uptake of adenosine-8-C14 into. Furlong, Watson, Davis, and Griffin, 710

Dextran, effect on tumor penetration in Drosophila. Friedian, Harly, and Kopack, 588

Diabetes, alloxan, effect on survival of mice with Ehrlich ascites carcinoma. Jehl, Mayer, and McKee, 441

2,6-Diaminopurine, effect on growth of E. coli. Skipper, Schaber, Binns, Thomson, and Wheeler, 143

—, effect on incorporation of formate-C14 and of carbamyl aspartate-4-C14 into rat liver and hepatoma. Werkeiser and Visser, 644

—, effect on incorporation of radiophosphate into rat liver and hepatoma. Werkeiser, Winaser, and Visser, 641

—, effect on various carcinomas. Tarnowski and Stock, 227

—, inhibition of E. coli by formamide prevented by. Skipper, Schabel, Binns, Thomson, and Wheeler, 143

2,6-Diaminopurine-3-C14, incorporation into pentose nucleic acids of various hamster tissues and of heterologous human tumor implants. Balis, Praag, and Brown, 678

—, incorporation into nucleic acids by a variety of tumors and host intestine and liver. Bennett, Skipper, Stock, and Rhoads, 485

2,6-Diaminopurine-riboside, inhibition of E. coli by formamide prevented by. Skipper, Schabel, Binns, Thomson, and Wheeler, 143

O-Diazoacetyl-L-serine, effect on various carcinomas. Tarnowski and Stock, 227

1,2,5,6-Dibenzanthracene, carcinogenic activity of, alone or with other chemicals, in mice. Steiner, 692

—, effect on level of Δ'-cholensterol in mouse skin. Kandutsch and Baumann, 128

—, electronic structure and carcinogenic activity of. Nagata, Fukui, Yonesawa, and Tagashira, 238

—, feeding of, followed by croton oil or polyethylene glycol-

—, on carcinogenesis in forestomach of mouse. Berenblum and Haran, 510

—, immunological properties of carcinogen-protein conjugates containing. Czech, Havas, and Andre, 726

—, lack of tumor induction in forestomach of mouse by single feeding of. Berenblum and Haran, 504
1,2,7,8-Dibenzanthracene, electronic structure and carcinogenic activity of. Nagata, Fukui, Yonesawa, and Tagashira, 233

2.3,4-Dibenzanthracene, electronic structure and carcinogenic activity of. Nagata, Fukui, Yonesawa, and Tagashira, 233

1,2,3,4-Dibenzanthracene, electronic structure and carcinogenic activity of. Nagata, Fukui, Yonesawa, and Tagashira, 233

2,4-Dichlorophenol, effect on peroxidase activity of Walker carcinosarcoma 235 homogenate. Neufeld, Lucas, Martin, and Stotz, 550

Diet, vitamin C-free, effect on DNA content in fibroblasts of guinea pigs. Sokoloff, Eddy, Beaumont, Williams, and Powella, 147

4-Diethylaminoazobenzene, effect on renal lesions in rat. Miller, MacDonald, and Miller, 320

N,N-Diethyl-N'-N''-diethylene phosphoramidite, effect on the growth of various rat and mouse tumors. Sugiuira and Stock, 38

N,N-Diethyl-p-phenylene diamine, effect on renal lesions in rat. Miller, MacDonald, and Miller, 320

Differentiation, effect of irradiation and chemotherapeutic agents on, in rat intestine. Friedman, Sargent, and Drutz, 479

Dihydroorotic acid, as an intermediate in pyrimidine synthesis. Lagerkvist, Reichard, Carlsonson, and Graboss, 104

Dihydrooracil, lack of incorporation of, into PNA pyrimidines of Ehrlich ascites tumor. Lagerkvist, Reichard, Carlsonson, and Graboss, 104

o-Dihydroxyphenol, with polyphenoloxidase, effect on glucose metabolism of Ehrlich adenocarcinoma. Kertész and Albano, 394

3,4-Dihydroxyphenylalanine, autoxidation of, inhibited by normal and neoplastic tissues. Hirsch, 849

Dihydroxyphenylalanine decarboxylase, inhibition by deoxyriboonucleic acid from S. typhosa. Dietrich and Shapiro, 188

1,4-Dimethanesulfonylbutane, effect on incorporation of $^3$P into deoxyribonucleic acid of Adenocarcinoma 755. Davidson and Freeman, 31

4-(or p')-Dimethylaminoazobenzene, glucose-6-phosphatase activity in livers of rats fed. Weber and Cantero, 105

----, rat liver tumors induced by, histochemical determination of succinic dehydrogenase in. Pearson and Defendi, 593

---, ribonucleic acid composition of rat liver tumor induced by, de Lamirande, Allard, and Cantero, 299

4-Dimethylaminoazobenzene-N-methyl-C', inability to act as methyl donor of labeled methyl groups. Miller, MacDonald, and Miller, 320

4-(p-Dimethylaminostyryl)quinoline methiodide, effect of compounds related to, on growth of Lymphoma 8 in rats. Bahnner, 888

4-(p-Dimethylaminostyryl)quinoline methochloride, effect on growth of Lymphoma 8 in rats, comparison of oral and subcutaneous administration of. Bahnner, 588

1,2-Dimethylbenzanthracene, method for measuring relative potency of, as carcinogens in mouse skin. Horton and Denman, 701

9,10-Dimethyl-1,2-benzanthracene, effect on level of $\Delta$-cholesterol in mouse skin. Kandutsch and Bauman, 128

---, feeding of, followed by croton oil or polyethylene glycol-400, effect on carcinogenesis in forestomach of mouse. Berenblum and Hanan, 510

---, immunological properties of carcinogen-protein conjugates containing. Creese, Hayas, and Andre, 720

---, promotion of skin tumors induced by 2-acetylaminofluorene by. Ritchie and Saffiotti, 94

---, response of sebaceous glands of mice to topical application of. Summett, Cowdry, and Croninger, 697

---, tumor induction in forestomach of mouse by feeding of. Berenblum and Hanan, 504

N,N-Dimethylformamide, effect on growth of E. coli. Skipper, Schabel, Binna, Thomson, and Wheeler, 149

2,4-Dinitrophenol, effect on oxidation of glucose-C$^{14}$ in normal and tumor tissue slices and homogenates of mouse. Weinner and Weinhouse, 497

DOPA. See 3,4-Dihydroxyphenylalanine.

Drosophila melanogaster, effects of vitamin analogs on tumor persistence in a tu-tu strain of. Friedman, Hanly, and Kopac, 392

---, effects of vitamin variations on tumor incidence of. Friedman, Hanly, and Kopac, 375

---, induction of tumors by x-rays or tryptophan in, counteracted by cysteine. Plaine, 151

Duck, spontaneous regression of hemangioma in. Rigdon, 77

Ducitol, effect on growth of diseased plants in tissue culture. Hildebrandt and Riker, 517

Ehrlich ascites tumor, biogenesis of pentosenuclear acid pyrimidines in. Lagerkvist, Reichard, Carlsonson, and Graboss, 104

---, biosynthesis of free glycine and serine from nonamino acid precursors by. Kit, 715

---, effect of in vivo pretreatment with nucleoprotein from, on subsequent injection of, in mice. Horn, 683

---, growth of Mengo encephalitis virus in tissue culture of cells of. Planagan and Colter, 657

---, growth of, effect of formamides and related compounds on. Furst, Cutting, and Gross, 294

---, influence of obese-hyperglycemic syndrome and of alloxan diabetes on survival of mice with. Jelih, Mayer, and McKee, 341

---, Lettré, in mouse, effect of dinitrophenol and fluoride on glucose oxidation in. Weinner and Weinhouse, 497

Ehrlich carcinoma, ascitic and solid forms, effect of 1,2-bis($\beta$-chloroethyl)ethane and methylbis($\beta$-chloroethyl)amine on mice bearing. Sassenrath, Morrison, Larson, and Greenberg, 755

---, ascitic and solid forms, effects of phosphoramides on. Sugiuira and Stock, 38

---, effect of addition of terminal respiratory system on glucose metabolism of. Kertész and Albano, 394

---, incorporation of labeled purines and of formate-C$^{14}$ into nucleic acid purines of. Bennett, Skipper, Stock, and Rhoads, 435

Electrolytes, content of, in various human tumors and normal tissues. Waterhouse, Terepka, and Sherman, 544

Electronic structure, of condensed aromatic hydrocarbons, in relation to carcinogenic activity. Nagata, Fukui, Yonesawa, and Tagashira, 293

Electron microscopy. See Microscopy.

Electrophoresis, of plasma proteins in mice with Sarcoma 180. Bernfeld and Houbner, 580

Embryonic tissues, characteristics of, after heterologous transplantation. Greene, 170

Ergastoplasm, of liver tumors, studied by electron microscopy. Howatson and Ham, 62

Erythritol, effect on growth of diseased plants in tissue culture. Hildebrandt and Riker, 517

Escherichia coli, effect of formamide, urethan, 2,6-diaminopurine, and N,N-dimethylformamide on growth of. Skipper, Schabel, Binna, Thomson, and Wheeler, 149

Estrase, alterations in, during necrosis of mouse liver in vitro. Berenbom, Chang, Bets, and Stowell, 1

Estrogen, relation of, to mutagenesis and carcinogenesis, review on. Burdette, 201
Cancer Research

Rhanel, effect on growth of diseased plants in tissue culture. Hildebrandt and Riker, 517

Ethionine, effect on free amino acids in liver of normal and tumorous rats. Levy, Murphy, and Dunn, 302
—, injected alone or with amino acids, effect on tumor growth, carcass weight, and nonprotein amino acids in rat liver. Dunn and Murphy, 700

Fibrosarcoma, induction of, in rats, by polyethylene implants. Bering, McMaurin, Lloyd, and Ingraham, 300

Fibrosarcoma AL-2, effect of ascorbic acid and glucosaccharic acid on nucleic acids of. Sokoloff, Eddy, Beaumont, Williams, and Powella, 147

Fibrosarcoma G1-45, metastasis of, after implantation in the tail of mice. Baserga and Baum, 59

Fibrosarcoma ME-871, localization of vegetative form of Clostridium tetani in, following intravenous spore administration. Malmgren and Flanagan, 479

Fibrosarcoma S621, lack of effect on development of, by inflammatory reaction at site of implantation. Molomut, Stone, Kessler, and Warshaw, 151

Flavonoids, effect on mouse tumors alone and with 8-azaguanine. Woodside and Kelton, 390

Flexner-Jobling carcinoma, effects of phosphoramides on. Sugira and Stock, 58
—, incorporation of glycine-2-C14 into purines of acid-soluble nucleotides of. Edmonds and LePage, 93
—, incorporation of labeled purines and of formate-C14 into nucleic acid purines of. Bennett, Skipper, Stock, and Rhoads, 485
—, in rats, lack of effect on protein excretion in urine. Rumsfeld and Baum, 774
—, metabolism of pyruvate-2-C14 by normal and tumor tissues in rats bearing. Busch, 365

Flavoprotein, effect on oxidation of glucose-C14 in normal and tumor tissues of mice. Wilkie and Weinhouse, 497

Folic acid, antagonists of, in treatment of mouse leukemia L1210. Goldin, Venditti, Humphreys, Dennis, and Mantel, 742

Forestromach, in mice, effect of 80-methylcholanthrene applied to. Rack, Kaufman, and Simeone, 722

Formamidine, and related compounds, effect on growth of Ehrlich ascites tumor. Forsht, Cutting, and Gross, 594
—, effect on growth of E. coli. Skipper, Schabel, Binns, Thomson, and Wheeler, 145

Formate-C14, effect of A-methopterin on incorporation of, into protein and lipids of mouse leukemia in vitro. Williams, Slater, and Winstern, 599
—, incorporation into glycine and serine by tumors. Kit, 715
—, incorporation into nucleic acids of spleen of normal and leukemic mice, with and without A-methopterin. Balis and Dancia, 603
—, incorporation into polynucleotides by variety of tumors and host intestine and liver. Bennett, Skipper, Stock, and Rhoads, 485
—, incorporation into rat liver and hepatoma, effect of 2,6-diaminopurine and of 5-aminoimidouridine on. Werkheiser and Visser, 644

Gardner lymphosarcoma. See Lymphosarcoma 6CSHED Gardner.

Genetics, demonstration of tenth allele at histocompatibility-2 locus in the mouse. Allen, 815

Globulin, increased level in plasma of mice with Sarcoma 180. Bernfeld and Homburger, 559

Glucose acid, effect on nucleic acids in tumor tissues. Sokoloff, Eddy, Beaumont, Williams, and Powella, 147

Glucose, blood and urine level of, in allaxonic diabetic mice with Ehrlich ascites tumor. Jehl, Mayer, and McKee, 341
—, metabolism of, in Ehrlich adenocarcinoma, effect of addition of terminal respiratory system on. Kertesz and Alban, 394
—, radioactive, effect of dinitrophenol and fluoride on oxidation of, in normal and tumor tissues, in mouse. Wenner and Weinhouse, 497
—, radioactive, oxidation of, by mouse liver and hepatoma slices. Abraham, Hill, and Chaikoff, 177

Glucose-1-C14, oxidation of, by mouse liver and hepatoma slices. Abraham, Hill, and Chaikoff, 177
—, incorporation of, into glycine and serine by tumors. Kit, 715

Glucose-2-C14, incorporation of, into glycine and serine by tumors. Kit, 715

Glucose-5-C14, oxidation of, by mouse liver and hepatoma slices. Abraham, Hill, and Chaikoff, 177
—, incorporation of, into glycine and serine by tumors. Kit, 715

Glucose-6-phosphatase, activity in certain normal, precancerous, and neoplastic tissues. Weber and Cantero, 185
—, activity in normal, regenerating, fetal, newborn, and neoplastic rat liver. Weber and Cantero, 679

Glutamic acid, in liver, effect of ethionine on, in normal and tumorous rats. Levy, Murphy, and Dunn, 302
—, in Tumor C14088 transplanted into resistant and susceptible mice. Roberts and Borge, 397
—, labeling of, in vivo, in various normal and tumor tissues of rats injected with pyruvate-2-C14. Busch, 365

Glutamins, in Tumor C14088 transplanted into resistant and susceptible mice. Roberts and Borge, 397

Glycerol, effect on growth of diseased plants in tissue culture. Hildebrandt and Riker, 517

Glycine, biosynthesis of, by tumors from nonamino acid precursors. Kit, 715
—, effect of injection of, in combination with ethionine, on tumor growth, carcass weight, and nonprotein amino acids in rat liver. Dunn and Murphy, 700
—, effect of injection of large doses of, on other amino acids, in normal and tumor-bearing rats. Greenberg and Sasson, 560
—, inhibition of DOPA autoxidation by. Hirsch, 249
—, in liver, effect of ethionine on, in normal and tumorous rats. Levy, Murphy, and Dunn, 302

Glycine-1-C14, incorporation of, into pentose nucleic acids of various hamster tissues and of heterologous human tumor implants. Balis, Pragg, and Brown, 673

Glycine-2-C14, incorporation into normal and tumorous tissues of mice. Greenlee and LePage, 236
—, incorporation into purines of acid-soluble nucleotides. Edmonds and LePage, 93

Glycogen, aerobic, in Ehrlich adenocarcinoma, in vivo, inhibition of, upon addition of terminal respiratory system. Kertesz and Alban, 594

Golgi material, of liver tumors, studied by electron microscopy. Howatson and Ham, 62

Gonadectomy, effect of testosterone propionate on gonadotropic level following. Vermecke-Van Eck and Chang, 280
—, in male and female mice, effect on induction of leukemia by methylcholanthrene. Kirschbaum, Liebelt, and Fails, 685

Gonadotropin, effect of testosterone propionate on. Vermacke-Van Eck and Chang, 280

Grand epidermoid carcinoma, effects of phosphoramides on. Sugira and Stock, 58

Granulosa pouch, growth of Walker carcinosarcoma 256 in. Selye, 20

Guanine, isolated from mouse lymphoma protein, effect of A-methopterin on incorporation of formate-C14 into. Williams, Slater, and Winstern, 599
—, of acid-soluble nucleotides, incorporation of glycine-2-C14 into. Edmonds and LePage, 93

Guanine-2-C14, incorporation into polynucleotides by a variety of tumors and host intestine and liver. Bennett, Skipper, Stock, and Rhoads, 485

Guanine-8-C14, incorporation of, into pentose nucleic acids of...
Index to Volume 15

various hamster tissues and of heterologous human tumor implants. Balis, Praag, and Brown, 673
Guanylic acid, level of, in cell fractions of normal and tumorous rat liver. de Lamirande, Allard, and Cantero, 389
H-2*, tenth allele at histocompatibility-2 locus in mouse. Allen, 315
Hair, cycle in mice, in relation to degeneration of sebaceous glands caused by carcinogens. Suntzeff, Cowdry, and Croninger, 537
Hamster, bearing human tumor implants, pentosenucleic acid synthesis in various tissues of. Balis, Praag, and Brown, 673
— factors affecting sarcoma growth in. Lemon and Smakula, 273
Hart-Passey melanoma, cell spread of, as a lethal factor. Goldie, Walker, Jeffries, and Guy, 363
—, effects of phosphoramide on. Sugiura and Stock, 38
—, incorporation of labeled purines and of formate-C14 into nucleic acid purines of. Bennett, Skipper, Stock, and Rhoads, 485
Heart, in vivo metabolism of pyruvate-2-C14 by, in tumor-bearing rats. Busch, 565
—, lesion of, after inoculation of lymphoid tumor into chick. Julian, 469
—, mouse, effect of dinitrophenol on glucose oxidation in homogenates of. Wenner and Weinhouse, 497
Hemangiosoma, spontaneous regression of, in duck and chicken. Rigidon, 77
Hepatocystomy, partial, effect on growth of various tumors in rats. Paschkis, Cantarow, Staney, and Hobbs, 579
Hepatocarcinoma C634, oxidation of C14-labeled glucose by. Abraham, Hill, and Chaioff, 177
Hepatoma, induced by p-dimethylaminobenzene in rats, histochemical determination of succinic dehydrogenase in. Pearson and Defendi, 595
—, induced in rats by 3-methyl-4-dimethylaminobenzene, effect on protein excretion in the urine. Rumsfeld and Baumann, 774
—, rat, effect of 5,6-diaminopurine and of 5-aminoouridine on incorporation of radiophosphate into. Werkeiser, Winzler, and Visser, 641
—, rat, tumor of, effect of 5,6-diaminopurine and of 5-amino- uridine on incorporation of formate-C14 and carbamy1 aspartate-4-C14 into. Werkeiser and Visser, 644
—, transplantable (Fisher), effect of partial hepatocystomy on growth of. Paschkis, Cantarow, Staney, and Hobbs, 579
Hepatoma 95/15, effect of dinitrophenol and fluorde on glucose oxidation in. Wenner and Weinhouse, 497
—, localization of vegetative form of Cladocidium tetani in, following intravenous spore administration. Malagren and Flanigan, 473
Hexokinase, with ATP, lack of effect on dinitrophenol inhibition of glucose oxidation by mouse kidney homogenate. Wenner and Weinhouse, 497
Histidine, inhibition of DOPA autoxidation by. Hirsch, 549
Histocompatibility-2 locus, demonstration of tenth allele at, in the mouse. Allen, 315
HIV2. See Methylbis(2-chloroethyl)amine.
Hodgkin's disease, characteristics of virus isolated from lymph nodes of patients with. Bostick and Hanna, 650
Horse serum residue, effect on proliferation of strain L clone 929 cells from the mouse in tissue culture. Fioramonti, Bryant, McQuilkin, Evans, Sanford, and Earle, 783
Host-tumor relationships, protein turnover in study of. Greenlee and LePage, 256
Human, characteristics of a virus isolated from Hodgkin's disease lymph nodes. Bostick and Hanna, 650
—, detection of antigens in human tumors after heterologous transplantation. Korngold and Lipari, 159
—, experimental production of metaplasia in apocrine sweat gland. Shelley and Cahn, 671
—, heterologous transplantation of brain tumor of. Nettleship and Zeman, 540
—, increased content of aldolase in adenocarcinoma of colon and rectum. Sibley and Fleisher, 690
—, tumors, analysis for electrolyte, water, and nitrogen content. Waterhouse, Tereps, and Sherman, 544
Human embryonal rhabdomyosarcoma 44, culture and morphological characteristics of. Moore, Sabachewsky, and Toolan, 598
Human epidermoid carcinoma HEP 44, culture and morphological characteristics of. Moore, Sabachewsky, and Toolan, 598
Human epidermoid carcinoma HEP 46, culture and morphological characteristics of. Moore, Sabachewsky, and Toolan, 598
—, implanted into hamsters, pentosenucleic acid synthesis in. Balis, Praag, and Brown, 673
—, persistence of human antigens in, after heterologous transplantation. Korngold and Lipari, 159
Human sarcoma HS 44, description of, in culture. Moore, Sabachewsky, and Toolan, 598
—, implanted into hamsters, pentosenucleic acid synthesis in. Balis, Praag, and Brown, 673
—, persistence of human antigens in, after heterologous transplantation. Korngold and Lipari, 159
Hydrocortisone. See Cortisrol.
Hyperergic rabbit, growth of Brown-Pearce carcinoma in. Appel and Saphir, 557
Hyperplasia, induction of sarcomas by 8,4-benzpyrene in rats after. Agate, Antopol, Glaubach, Agate, and Graff, 6
—, inhibition of methylcholanthrene carcinogenesis by, in rats. Moon and Simpson, 409
Hyoxanthine-8-C14, incorporation of into, into pentosenucleic acids of various hamster tissues and of heterologous human tumor implants. Balis, Praag, and Brown, 673
Immunity, to Shope papilloma, effect of in vitro infection of skin with virus. Greene, 124
Immunological properties, of carcinogen-protein conjugates containing polycyclic aromatic hydrocarbons and substituted stibenes. Creesh, Havas, and Andre, 726
Inflammatory reaction, lack of effect on development of tumor grafts in mice. Molomut, Spain, Krebsler, and Warshaw, 181
Intestine, hamster, pentosenucleic acid synthesis in. Balis, Praag, and Brown, 673
—, in vivo metabolism of pyruvate-2-C14 by, in tumor-bearing rats. Busch, 565
—, lipid content and weight of, in normal and tumor-bearing rats. Bloom and Haven, 173
—, normal, incorporation of labeled purines and of formate-C14 into nucleic acid purines of. Bennett, Skipper, Stock, and Rhoads, 485
—, rat, isolation of free nucleotides from mucosa of, following PTH administration. Daoost and Cantero, 734
Iodine-131, thyroidectomy of mice by, effect on pituitary tumors. Dent, Gaddaden, and Furth, 70
Isonicotinyl hydrazide, effect on tumor penetrance in Drosophila. Friedman, Harly, and Kopac, 382
Ivalon, rodent tumors induced by subcutaneous imbedding of. Oppenheim, Oppenheim, Danishefsky, Stout, and Eirich, 323
Jensen sarcoma, effects of phosphoramides on. Sugiura and Stock, 38
—, incorporation of labeled purines and of formate-C14 into nucleic acid purines of. Bennett, Skipper, Stock, and Rhoads, 485
Cancer Research

Jensen Sarcoma, lack of effect of partial hepatectomy on growth of. Paschiks, Cantarow, Stanney, and Hobbs, 579
—, metabolism of pyruvate-2-C14 by normal and tumor tissues in rats bearing. Busch, 365

Kel-F, rodent tumors induced by subcutaneous imbedding of. Oppenheimer, Oppenheimer, Danshenfeyk, Stout, and Ehrich, 838

Kiskey, hamster, pentose nucleic acid synthesis in. Balis, Praag, and Brown, 673
—, in vivo metabolism of pyruvate-2-C14 by, in tumor-bearing rats. Busch, 365
—, lesion of, after inoculation of lymphoid tumor into chicken. Julian, 493
—, mouse, effect of dinitrophenol on glucose oxidation in homogenates of. Wenner and Weinhouse, 497

Kreb-2 carcinoma, ascitic form, effect of dinitrophenol and fluoride on glucose oxidation in. Wenner and Weinhouse, 497
—, ascitic form, effects of phosphoramides on. Sugiura and Stock, 38
—, solid and ascitic forms, effect of chemotherapeutic agents on. Tarnowski and Stock, 527

Lactate, labeling of, in vivo, in various normal and tumor tissues of rats injected with pyruvate-2-C14. Busch, 365

Lathyritis factor, in the production of tumors in salamander. Levy and Godman, 104

Lettre EHlich ascites tumor, in mouse, effect of dinitrophenol and fluoride on glucose oxidation in. Wenner and Weinhouse, 497

L-Leucylglycine peptide, alterations in, during necrosis of mouse liver in vivo. Berenbom, Chang, Beta, and Stowell, 1

Leukemia A and B, second transfer into unrelated strains of mice. Hoecker, Pizarro, Brocic, and Gasic, 9
—, induced by methylcholanthrene, influence of gonadectomy and androgenic hormone on, in mice. Kirschbaum, Lill, and Rals, 655
—, induced by methylcholanthrene in mice, effect of thymectomy on. Kirschbaum and Liebelt, 890
—, resistance factor for, transmitted by milk of old STOLI female mice. MacDowell, 28
—, resistance factor for, transmitted by old STOLI female mice. MacDowell, 19
—, line A, transfer into unrelated strains of mice. Hoecker, Pizarro, Brocic, and Gasic, 9

Leukemia I and 1/4, effects of A-methopterin in vivo and in vitro on nucleic acid synthesis in mice. Balis and Dancis, 605

Leukemia AKR, cell spread of, as a lethal factor. Goldie, Walker, Jeffries, and Guy, 263

Leukemia C7-T11, lymphoid, effect of 1,2-bis(5-chloroethyl)thio)ethane and methylbis(5-chloroethyl)amine on mice bearing. Sassenrath, Morrison, Larson, and Greenberg, 755

Leukemia C-1498, cell spread of, as a lethal factor. Goldie, Walker, Jeffries, and Guy, 263
—, myeloid, effect of 1,2-bis(5-chloroethyl)thio)ethane and methylbis(5-chloroethyl)amine on mice bearing. Sassenrath, Morrison, Larson, and Greenberg, 755
—, solid and ascitic forms, transplanted into resistant and susceptible mice, free amino acids in. Roberts and Borges, 697

Leukemia L1210, effect of aminopterin and citrovorum factor on. Goldin, Venditti, Humphreys, Dennis, Mantel, and Greenhouse, 57
—, incorporation of labeled purines and of formate-C14 into nucleic acid purines of. Bennett, Skipper, Stock, and Rhoads, 455
—, in mouse, treatment of, with antagonists of folate acid. Goldin, Venditti, Humphreys, Dennis, and Mantel, 742

Leukemia P1534, cell spread of, as a lethal factor. Goldie, Walker, Jeffries, and Guy, 263

Leukocyte level, in rat, effect of various dietary supplements on. Miller, MacDonald, and Miller, 519

Lewis bladder carcinoma, effects of phosphoramides on. Sugiura and Stock, 38

Lewis lung carcinoma, effects of phosphoramides on. Sugiura and Stock, 38

Lewis sarcoma T341, incorporation of labeled purines and of formate-C14 into nucleic acid purines of. Bennett, Skipper, Stock, and Rhoads, 455

Light, visible, effect on carcinogenicity of ultraviolet light, in mice. Griffin, Dolman, Böhlke, Bovurat, and Tatum, 693

Lipid granularity, cytoplasmic, in tissue culture of mouse fibroblasts and Sarcoma 180 cells. Biesel and Goldhaber, 767

Lipids, content of, in intestines of normal and tumor-bearing rats. Bloor and Haven, 175
—, in mouse leukemia, effect of A-methopterin on formate-C14 incorporation into. Williams, Slater, and Winsler, 582

Liver carcinoma LT 124, study by electron microcopy of. Howatson and Ham, 62
—, chemical changes associated with necrosis of, in vivo. Berenbom, Chang, Beta, and Stowell, 1
—, concentration of free amino acids in, after injection of selected amino acids into normal and tumor-bearing rats. Greenberg and Sassenrath, 820
—, disease of, from a "labeled methyl"-free diet, influence of vitamin B12 on, Bennett, Hellerman, and Donnelly, 395
—, effect of ethionine on free amino acids of, in normal and tumorous rats. Levy, Murphy, and Dunn, 302
—, effect of partial hepatectomy on growth of various tumors in rats. Paschik, Cantarow, Stanney, and Hobbs, 579
—, glucose-6-phosphatase activity of. Weber and Cantero, 105
—, hamster, pentose nucleic acid synthesis in. Balis, Praag, and Brown, 673
—, incorporation of glycine-2-C14 into purines of acid-soluble nucleotides of. Edmonds and LePage, 83
—, in vivo metabolism of pyruvate-2-C14 by, in tumor-bearing rats. Busch, 365
—, lesion of, after inoculation of lymphoid tumor into chicken. Julian, 493
—, mouse, effect of dinitrophenol on glucose oxidation in homogenates of. Wenner and Weinhouse, 497
—, mouse, effect of tumor fractions on uptake of adenine-8-C14 into deoxyribonucleic acids of. Furlong, Watson, Davis, and Griffin, 710
—, mouse, lack of effect of A-methopterin on incorporation of formate-C14 into protein of. Williams, Slater, and Winsler, 582
—, mouse, oxidation of C14-labeled glucose by. Abraham, Hill, and Chakoff, 177
—, normal, incorporation of labeled purines and of formate-C14 into nucleic acid purines of. Bennett, Skipper, Stock, and Rhoads, 455
—, nuclei of, 32P incorporation into nucleic acids and proteins of, in normal and azo dye-fed rats. Ward and Griffin, 456
—, rat, C14 distribution in choline, creatine, and methionine of, after injection of methyl-C14-bis(5-chloroethyl)amine. Trams and Klop, 617
—, rat, effect of 2,6-diaminopurine and of 5-aminouridine on incorporation of formate-C14 and carbamyl aspartate-4-C14 into. Werkheiser and Visser, 644
—, rat, effect of 2,6-diaminopurine and of 5-aminouridine on incorporation of radiophosphate into. Werkheiser, Winsler, and Visser, 641
—, rat, effect of ethionine alone or with amino acids on non-protein amino acids of. Dunn and Murphy, 760
—, rat, glucose-phosphatase activity in normal, regenerating, fetal, newborn, and neoplastic. Weber and Cantero, 679
—, rat, isolation of free nucleotides from, following P32 administration. Daoust and Cantero, 734
—, regenerating, incorporation of P32 into nucleic acids of. Nygaard and Rieuch, 840
—, regeneration after partial hepatectomy enhanced in presence of growing tumor. Paschik, Cantarow, Stanney, and Hobbs, 579
—, tumors of, examination by electron microscopy. Howatson and Ham, 62
—, tumor of, induced by 4-dimethylaminosobenzene, ribonucleic acid composition of. de Lamirande, Allard, and Cantero, 345
Lymphatic\nLymphoma\nLymphosarcoma\nGoranson\naminouridine\naspartate-4-C14\nmethiodide\ndimethylaminostyryl)quinoline\nBahner,\nsiltuion\nchloroethyl)amine\neffect\nLarson,\nnucleic\nnucleic

Halliday, Bennett, and Olson, 689\nmice, mouse, effect of diinophenol and fluoride on glucose oxidation in. Wenner and Weinhouse, 497\ntransplantability and lethality, in. Martines, Miroff, and Bittner, 489\ntransplantable, effect on uptake of adenine-8-C14 into deoxyribonucleic acids of mouse tissues. Furlong, Watson, Davis, and Griffin, 710\ntransplanted and spontaneous, in mice, studies on heatstable accelerator from. Martines, Miroff, and Bittner, 442\ntransplantation time of, acceleration in mice pretreated with tumor tissue preparation. Miroff, Martines, and Bittner, 487\nMammary tumor agent, effect of source of, on neutralization of agent with antisera. Bittner and Imagawa, 464\nMetastatic, effect on growth of diseased plants in tissue culture. Hildebrandt and Riker, 517\nMarigold, crown gall, inhibition of growth in tissue culture by alcohols. Hildebrandt and Riker, 517\nMecca lymphosarcoma. See Lymphosarcoma Mecca.\nMengo encephalitis virus, growth of, in Ehrlich ascites cells in vitro. Planagan and Colter, 657\n6-Mercaptouracil, effect on incorporation of P3H into deoxyribonucleic acid of Adenocarcinoma 725. Davidson and Freeman, 31\neffect on various carcinomas. Tarnowski and Stock, 227\nMetastasis, experimental production of, in the human apocrine sweat gland. Shelley and Cahn, 471\nMetastases, of fibrosarcoma G1-46 to the lung after implantation in the tail and subsequent amputation. Baserga and Baum, 52\nrelation to tumor size in rats bearing Walker carcinoma 256. Bernard, Dutton, and Radakovich, 335\nMethanol, effect on growth of diseased plants in tissue culture. Hildebrandt and Riker, 617\nMethionine, administration with cysteine and 4-(p-dimethylaminomethyl)pyrimidine methochloride in diet, lack of effect on regression of Lymphomas 8 in rats. Bahner, 388\nadenine-8-C14 content of, in rat liver, after injection of methyl-C14-bis(\beta-chloroethyl)amine. Trans and Kopp, 617\neffect on ethionine on, in normal and tumorous rats. Levy, Murphy, and Dunn, 502\niolated from mouse lymphoma protein, effect of A-methopterin on incorporation of formate-C14 into. Williams, Slater, and Winsler, 532
Methylhba[2-(or \beta-)chlooroethyl]amine, effect on cellular division and differentiation, in rat intestine. Friedman, Sargent, and Drutz, 470\neffect on incorporation of P3H into deoxyribonucleic acid of Adenocarcinoma 715. Davidson and Freeman, 31\neffect on level of serum aldolase in tumor-bearing rats. Sibley, Flesher, and Higgins, 506\neffect on various carcinomas. Tarnowski and Stock, 227\nrelation of, to mutagenesis and carcinogenesis, review on. Burdette, 201\ntoxicity and carcinostatic activity of, in mice and rats. Sassenath, Morrison, Larson, and Greenberg, 755
Methyl-C14-bis(\beta-chloroethyl)amine, distribution of radiocarbon in liver choline, creatine, and methionine after injection of, in rat. Trans and Kopp, 617
3-(or 200)-Methylcholanthrene, carcinogenic activity of, alone or with other chemicals, in mice. Steiner, 692\neffect on forestomach and cecum of mice. Rack, Kaufman, and Simeone, 728
effect on level of \Delta 7-cholesteryl in rat and mouse skin. Kandutsch and Baumann, 128
3-(or 20)-Methylcholanthrene, feeding of, followed by croton oil or polyethylene glycol 400, effect on carcinogenesis in forestomach of mouse. Berenblum and Haran, 510
—, induction of leukemia by, effect of gonadectomy and androgenic hormone on, in mice. Kirschbaum, Liebelt, and Falls, 685
—, induction of leukemia by, effect of thyromycin on, in mice. Kirschbaum and Liebelt, 689
—, inhibition of sarcomas produced by, in hypophysectomized rats. Moon and Simpson, 403
—, method for measuring relative potency of, as carcinogen in mouse skin. Horton and Denman, 701
—, oxygen utilization by tumors induced by. Holtkamp, Hill, and Rutledge, 654
—, response of sebaceous glands of mice to topical application of. Suntseff, Cowdry, and Croninger, 637
—, tumor induction in forestomach of mouse by feeding of. Berenblum and Haran, 504

3'-Methyl-4-dimethylaminoazobenzene, P32 incorporation into nucleic acids and proteins of liver nuclei of rats fed. Ward and Griffin, 456

2'-Methyl-4-dimethylaminoazobenzene, immunological properties of carcinogene-protein conjugates containing. Cech, Havas, and Andre, 785

N-Methylformamide, effect on growth of Ehrlich ascites tumor. Furst, Cutting, and Gross, 594
—, effect on various carcinomas. Tarnowski and Stock, 287
—, inhibition of L1210 leukemia, Sarcoma 180, and Adenocarcinoma E 0771 by. Skipper, Schabel, Binns, Thomson, and Wheeler, 145

Methyl groups, labile, of 4-dimethylaminoazobenzene to act as major source of. Miller, MacDonald, and Miller, 309

N,N'-(4-Methyl-m-phenylene)-(bisaziridinecarboxamide), effect on growth of Walker 256 carcinoma in rats. Herbut and Krammer, 614

Microscopy, cancer cytology and cytochemistry, a review. Mallors, 557
—, electron, examination of rat liver tumors by. Howatson and Ham, 82
—, electron, of ultrastructure of surfaces of normal and cancerous cells from rabbit skin. Coman and Anderson, 541
—, electron, studies of virus-like particles in Rous sarcoma by. Gaylord, 80
—, of degeneration of sebaceous glands in mice. Suntseff, Cowdry, and Croninger, 637

Mitochondria, of liver tumors, studied by electron microscopy. Howatson and Ham, 62

Mitosis, effect of irradiation and chemotherapeutic agents on, in rat intestine. Friedman, Sargent, and Druta, 479

Miyone adenocarcinoma, effects of phosphoramide on. Sugura and Stock, 88
—, incorporation of labeled purines and of formate-C14 into nucleic acid purines of. Bennett, Skipper, Stock, and Rhoads, 485

Muscle, concentration of free amino acids in, after injection of selected amino acids into normal and tumor-bearing rats. Greenberg and Sansenrath, 699
—, in rats with methylcholanthrene-induced tumors, oxygen utilization of, in vitro. Holtkamp, Hill, and Rutledge, 534
—, in vivo, metabolism of pyruvate-14C by, in tumor-bearing rats. Bush, 655

Mutation, in relation to the origin of tumors, review on. Burdette, 201

Myleran. See 1,4-Dimethanesulfonylbutane.

2',3'-Naphtho-3,4-pyrene, electronic structure and carcinogenic activity of. Nagata, Fukui, Yonesawa, and Tagasahira, 228

Necrosis, of mouse liver in vitro, chemical changes associated with. Berenblum, Chang, Betz, and Stowell, 1

Niacin, effect alone and with other B vitamins on tumor incidence of Drosophila fed a low-tumor diet. Friedman, Harnly, and Kopac, 375

Nitrogen, content of, in various human tumors. Waterhouse, Terpekia, and Sherman, 544
—, content of, in Yoshida sarcoma, effect of radiation on. Gardella and Lichtler, 529

Nitrogen mustard. See Methylbis-(β-chloroethyl)amine.

Notochord, tumors of, produced by Lathyrus factor in salamander. Levy and Goldman, 164

Novikoff hepatoma, effect of alloxan diabetes on growth of, in rat. Goranson and Tilsar, 626
—, glucose-6-phosphatase activity of. Weber and Cantero, 105
—, study by electron microscopy of. Howatson and Ham, 62

Nuclei, of liver tumors, studied by electron microscopy. Howatson and Ham, 62

Nucleic acids. See also Deoxyribonucleic acid and Ribonucleic acid.
—, alterations in, during necrosis of mouse liver in vitro. Berenblum, Chang, Betz, and Stowell, 1
—, incorporation of P32 into, in liver nuclei of normal and aso dye-fed rats. Ward and Griffin, 456
—, metabolism of, in relation to cancer. Greenberg, 421
—, synthesis of, of A-methopterin on, in leukemic spleen breis. Balis and Dancis, 603

Nucleoli, of liver tumors, studied by electron microscopy. Howatson and Ham, 62

Nucleoprotein, from Ehrlich ascites cell, effect of injection of, on subsequent injection of ascites cells into mice. Horn, 685

Nucleotides, acid-soluble purines of, incorporation of glycine-8-C14 into. Edmonds and LePage, 93
—, isolation from rat tissues following P32 administration. Dostat and Cantero, 734
—, purine and pyrimidine, relation to cancer. Greenberg, 421

Nylon, rodent tumors induced by subcutaneous imbedding of. Oppenheimer, Oppenheimer, Danielasky, Stout, and Eirich, 853

Obese-hyperglycemic syndrome, hereditary, effect on survival of mice with Ehrlich ascites carcinomas. Jehl, Mayer, and McKee, 541

Orotic acid-N14, incorporation of, into PNA pyrimidines of Ehrlich ascites tumor. Lagerkvist, Reichard, Carlsson, and Grabos, 164

Ovary, development and growth of tumors in, after transplantation to the spleen. Gardner, 109

Oxalacetate, oxidation of, in methylcholanthrene-induced tumors, adjacent muscle, and normal muscle of rats. Holtkamp, Hill, and Rutledge, 534

Oxygen, utilization of, by methylcholanthrene-induced tumors, adjacent muscle, and normal muscle of rats. Holtkamp, Hill, and Rutledge, 534

Pantostatamine, effect on tumor penetration in Drosophila. Friedman, Harnly, and Kopac, 382

Parabiosis, of mice, effect of testosterone propionate on gonadotrophic level following gonadectomy or x-radiation. Vermande-Van Eck and Chang, 280

Paris-daisy, crown gall, inhibition of growth in tissue culture by alcohols. Hildebrandt and Riker, 517

Patterson lymphosarcoma. See Lymphosarcoma Patterson.

Pentosenucleic acid. See Ribonucleic acid.

Periwinkle, crown gall, inhibition of growth in tissue culture by alcohols. Hildebrandt and Riker, 517

Peroxidasen, activity in Walker carcinoma 256, effect of 2,4-dichlorophenol inhibition of catalase on. Neufeld, Lucas, Martin, and Stots, 550
—, in mitochondria of Walker carcinoma 256. Neufeld, Lucas, Martin, and Stots, 550

Phenanthrene, carcinogenic activity of, alone or with other chemicals, in mice. Stein, 632
—, electronic structure and carcinogenic activity of. Nagata, Fukui, Yonesawa, and Tagasahira, 228

Phenythiourea, inhibition of DOPA autoxidation by. Hirsch, 249
Phosphamidase, increased in exfoliated malignant cells in experimental carcinoma of cervix and vagina in mice. von Haam and Scarpelli, 449

Phosphatase, acid and alkaline activity of, in plasma of normal and lymphomatous chickens. Lesher and Burmester, 387

——, acid and alkaline alterations in, during necrosis of mouse liver in vitro. Berenblum and Harn, 510

Phosphorus, concentration of, in human tumors. Waterhouse, Terepka, and Sherman, 544

Phosphate-phosphatase, effect of 2,6-diaminopurine and of 5-amino-nouridine on incorporation of, into rat liver and hepatoma. Werkheimer, Winsler, and Visser, 641

——, effect of various antitumor agents on incorporation into deoxyribonucleic acid of Adenocarcinoma 755. Davidson and Freeny, 31

——, incorporation into free nucleotides of normal liver, intestinal mucosa, and liver tumors of rats. Daoust and Cantero, 794

——, incorporation into nucleic acids and proteins of liver nuclei of normal and azo dye-fed rats. Ward and Griffin, 456

——, incorporation into nucleic acids of regenerating rat liver. Nygaard and Busch, 940

Phospholipid, content of, in the intestine of normal and tumor-bearing rats. Bloom and Haven, 173

Phosphoprotein, incorporation of P32 into, in liver nuclei of normal and azo dye-fed rats. Ward and Griffin, 456

α-Picolinic acid, effect on tumor penetrance in Drosophila. Tannenbaum, Harnly, and Kopac, 382

Pituitary, effect of hypophysectomy on carcinogenesis produced in rats by methylcholanthrene. Moon and Simpson, 408

——, effect of testatorone propionate on gonadotrophic hormone level. Verma-Wan Eck and Chang, 290

——, induction of sarcomas in rats without, by 3,4-benzenpyrene. Agate, Antopol, Glaubach, Agate, and Graff, 6

——, tumors of, development after surgical or radiological removal of thyroid of mice. Dent, Gadaden, and Puth, 70

——, tumors of, transplantation into surgically or intrathyroidectomised mice. Dent, Gadaden, and Puth, 70

Plants, disease, inhibition of growth in tissue culture by alcohols. Hildebrandt and Riker, 517

Plasmainactive of acid phosphatase, alkaline phosphatase, and adenosine triphosphatase in, in chicken. Lesher and Burmester, 357

——, concentration of free amino acids in, after injection of selected amino acids into normal and tumor-bearing rats. Greenberg and Sassenrath, 690

——, proteins of, in mice, influence of tumor growth on. Bernfeld and Humberger, 359

Platyfish. See Xiphophorus maculatus.

Piloilm, rodent tumors induced by subcutaneous imbedding of. Oppenheimer, Oppenheimer, Danishefsky, Stout, and Eirich, 383

Polyethylene, implantation of, effect on tumor production in rats. Bering, McLaurin, Lloyd, and Ingraham, 406

——, rodent tumors induced by subcutaneous imbedding of. Oppenheimer, Oppenheimer, Danishefsky, Stout, and Eirich, 383

Polyethylene glycol-4000, anticarcinogenic effect after hydrocarbon feeding on carcinogenesis in forestomach of mouse. Berenblum and Harn, 410

Polyers, as carcinogenic agents after subcutaneous imbedding of, in rats and mice. Oppenheimer, Oppenheimer, Danishefsky, Stout, and Eirich, 383

Polyethylene glycol, effect on tumor production in rats. Bering, McLaurin, Lloyd, and Ingraham, 406

——, rodent tumors induced by subcutaneous imbedding of. Oppenheimer, Oppenheimer, Danishefsky, Stout, and Eirich, 383

Polyethylene glycol, effect on glucose metabolism of Ehrlich adenocarcinoma. Kertess and Albano, 394

Polyethylene, rodent tumors induced by subcutaneous imbedding of. Oppenheimer, Oppenheimer, Danishefsky, Stout, and Eirich, 383

Polyvinyl chloride, rodent tumors induced by subcutaneous imbedding of. Oppenheimer, Oppenheimer, Danishefsky, Stout, and Eirich, 383

Potassium, concentration of, in human tumors. Waterhouse, Terepka, and Sherman, 544

Proline, effect of injection of large doses of, on other amino acids, in normal and tumor-bearing rats. Greenberg and Sassenrath, 690

——, in liver, effect of ethionine on, in normal and tumorous rats. Levy, Murph, and Dnun, 302

Proteins, incorporation of P32 into, in liver nuclei of normal and azo dye-fed rats. Ward and Griffin, 456

——, in urine of tumor-bearing rats. Rumsfield and Baumann, 771

——, of mouse leukemia, effect of A-methopterin on formate incorporation into. Williams, Slater, and Winsler, 532

——, plasma, in mice, influence of tumor growth on. Bernfeld and Humberger, 359

——, synthesis of, relation to cancer. Greenberg, 421

Purine metabolism, in a variety of tumors. Bennett, Skipper, Stock, and Rhoads, 465

Pyromycin, benzylidene analogs of, carcinostatic activity of, for mammary adenocarcinomas in mice. Halliday, Bennett, and Oleson, 493

Pyrene, electronic structure and carcinogenic activity of. Nagata, Fukui, Yonesawa, and Tagashira, 233

Pyridoxine, effect on deoxypyridoxine inhibition of transaminase. Dietrich and Shapiro, 133

Pyrimidine, effect on tumor penetrance in Drosophila. Friedman, Harnly, and Kopac, 382

Pyruvate-2-C14, metabolism of, in various normal and tumor tissues. Busch, 365

Quinacrine, concentration of, in tissues of tumor-bearing mice after oral administration of. Vassey, Edmonds, Irving, and Irvin, 378

——, decreased rate of tumor growth in mice fed. Vassey, Edmonds, Irving, and Irvin, 378

Rana catesbiana, transplantation of renal carcinoma from R. pipiens into. Tweedell, 410

Rana clamitans, transplantation of renal carcinoma from R. pipiens into. Tweedell, 410

Rana palustris, transplantation of renal carcinoma from R. pipiens into. Tweedell, 410

Rana pipiens, transplantation of renal carcinoma into kindred races and into heterologous species. Tweedell, 410

Regression, spontaneous, of hemangiosarcoma in duck and chicken. Rigdon, 77

Resistance, to spontaneous leukemia, factor for, transmitted by old STOLI female mice. MacDowell, 10

——, to spontaneous leukemia in C38 mice, factor for, transmitted by milk of old STOLI female mice. MacDowell, 23

——, to Walker carcinomas 256, effect of banding of tumor or thorium dioxide on. Bernard, Dutton, and Radakovich, 18

Review, cancer cytology and cytochemistry. Mallors, 557

——, isotopic tracer studies on the biochemistry of cancer. Greenberg, 421

——, on the new emotionalism in research. Brues, 345

——, on the significance of mutation in relation to the origin of tumors. Burdette, 201

Rhodomyosarcoma, effect of dinitrophenol and fluoride on glucose oxidation in. Wenner and Weinhouse, 497

Riboflavin, effect alone and with other B vitamins on tumor incidence of Drosophila fed a low-tumor diet. Friedman, Harnly, and Kopac, 382

Riboflavin-6-phosphate, lack of effect in reversing potentiation of 8-azaguanine by flavolin in chemotherapy of mouse tumors. Woodside and Kelton, 390

Ribonucleic acid. See also Nucleic Acids.
Ribonucleic acid, biogenesis of pyrimidines of, in Ehrlich ascites tumor. Lagerkvist, Reichard, and Graboss, 184
——, composition of, in rat liver tumor induced by 4-dimethylaminoazobenzene. de Lamirande, Allard, and Cantero, 389
——, concentration of, in liver and tumor of mice fed quinacrine. Vassey, Edmonds, Irvin, Green, and Irvin, 578
——, content of, in Yoshida sarcoma, effect of radiation on. Gardella and Lichtler, 349
——, effect of ascorbic acid and D-glucosaccharic acid on, in various tumor tissues. Sokoloff, Eddy, Beaumont, Williams, and Powella, 147
——, incorporation of $^{14} C$ into. Nygaard and Racus, 240
——, increased in exfoliated malignant cells in experimental carcinomas of cervix and vaginas in mice. von Haam and Scarpelli, 449
——, synthesis of, in tumor-bearing hamsters. Balis, Prag, and Brown, 673
Ribose-L-C, incorporation of, into glycine and serine by tumors. Kit, 715
Ridgway osteogenic sarcoma, effects of phosphoramide on. Sugiu and Stock, 38
——, incorporation of labeled purines and of formate-C into nucleic acid purines of. Bennett, Skipper, Stock, and Rhodes, 485
Rous sarcoma, electron microscopy studies of virus-like particles in. Gaylord, 80
Saran, rodent tumors induced by subcutaneous imbedding of. Oppenheimer, Oppenheimer, Daniehesfy, Stout, and Eirich, 383
Sarcoma, growth of, in hamsters, factors affecting. Lemon and Snakula, 173
——, induced in rats by methylcholanthrene, lack of effect on protein excretion in urine. Rumsfeld and Baumann, 774
——, spindle-celled, induction by 3,4-benzpyrene in hypophysectomized rats. Agate, Antopol, Glaubach, Agate, and G., 355
Sarcoma I, lack of effect on development of, by inflammatory reaction at site of implantation. Molomut, Spain, Kreiser, and Warshaw, 181
Sarcoma 37, cell spread of, as a lethal factor. Goldie, Walker, Jeffries, and Guy, 205
——, effect of dinitrophenol and fluoride on glucose oxidation in. Wenner and Weinhous, 407
——, glucose-6-phosphatase activity of. Weber and Cantero, 105
——, heterologous transplantation of, effect of lyophilized tumor injections on. Pikovski and Schlesinger, 283
——, solid form of, grown in tissue culture. Hogue and Rubin, 468
Sarcoma 180, cell spread of, as a lethal factor. Goldie, Walker, Jeffries, and Guy, 288
——, effect of 1,2-bis-(p-chloroethyl)-1ethane and methyl-bis-(p-chlorehyl)amine on mouse bearing. Sassenrath, Morrow, Larson, and Greenberg, 735
——, growth, inhibited by N-methylformamide. Skipper, Schabel, Binns, Thomson, and Wheeler, 143
——, protein changes in mice bearing. Bernfeld and Homburger, 530
——, solid and acisic forms, effects of phosphoramide on. Sugiu and Stock, 38
——, (SKI), incorporation of labeled purines and of formate-C into nucleic acid purines of. Bennett, Skipper, Stock, and Rhodes, 485
——, (SRI), incorporation of labeled purines and of formate-C into nucleic acid purines of. Bennett, Skipper, Stock, and Rhodes, 485
Sarcoma Ma387, effects of phosphoramide on. Sugiu and Stock, 38
——, incorporation of labeled purines and of formate-C into nucleic acid purines of. Bennett, Skipper, Stock, and Rhodes, 485
Sarcoma B39, effects of phosphoramides on. Sugiu and Stock, 38
Sarcoma T241, effects of phosphoramide on. Sugiu and Stock, 38
Scurvy glands, auditory, changes in, produced by 2-acetylaminofluorene. Laws, Rodal, Hoey, and Mathille, 139
——, degeneration of, caused by carcinogens. Suntseff, Cowdry, and Croninger, 637
Serine, biosynthesis of, by tumors from nonamino acid precursors. Kit, 715
——, effect of injection of large doses of, on other amino acids, in normal and tumor-bearing rats. Greenberg and Sassenrath, 620
——, in liver, effect of ethionine on, in normal and tumorous rats. Levy, Murphy, and Dunn, 302
——, isolated from mouse lymphoma protein, effect of A-methoprin on incorporation of formate-C$^{14}$ into. Williams, Slater, and Winzler, 589
Serine dehydrase, concentration in livers of tumor-bearing rats. Greenberg and Sassenrath, 620
Shope papilloma, response of skin from rabbits immune to, after in vitro infection and transplantation. Greene, 124
Shope papilloma virus, infectiousness of, after growth in embryonic, nonplastic, and cancerous states of domestic rabbit skin. Greene, 748
Silastic, rodent tumors induced by subcutaneous imbedding of. Oppenheimer, Oppenheimer, Daniehesfy, Stout, and Eirich, 383
Silk, rodent tumors induced by subcutaneous imbedding of. Oppenheimer, Oppenheimer, Daniehesfy, Stout, and Eirich, 383
Skin, chicken, early development of squamous-cell carcinoma after methylcholanthrene painting of. Knight and Tabor, 383
——, domestic rabbit, infectiousness of Shope papilloma virus after growth in embryonic, nonplastic, and cancerous states of. Greene, 748
——, embryonic, after heterologous transplantation. Greene, 170
——, human, experimental production of metastasis in apocrine sweat gland. Shelley and Cahn, 671
——, level of 25-cholestenol in, after treatment with carcinogens and other chemicals. Kundtuch and Baumann, 188
——, rabbit, ultrastructure of cell surface of normal and cancerous epidermis. Coman and Anderson, 541
——, sebaceous glands of, degeneration caused by carcinogens in mice. Suntseff, Cowdry, and Croninger, 637
——, tumors of, induced by 2-acetylamino-fluorene in combination with croton oil or 9,10-dimethyl-1,2-benzanthracene. Ritchie and Saffiotti, 84
——, tumors of, in mice, methods for determining relative potencies of complex materials. Horton and Demnann, 701
Sodium pantothenate, effect alone and with other B vitamins on tumor incidence of. Drosophila fed a low-tumor diet. Friedman, Hamby, and Kopac, 755
Soybean hemagglutinin, nonspecific effect of, on tumor growth. Liener and Seto, 407
Spleen, development of ovarian neoplasms after transplantation into. Gardner, 109
——, hamster, pentosesnucleic acid synthesis in. Balis, Prag, and Brown, 673
——, in ribo metabolism of pyruvate-C by, in tumor-bearing rats. Busch, 565
——, lesion of, after inoculation of lymphoid tumor into chicken. Julian, 405
——, leukemic, in mice, effects of A-methoprin on nucleic acid synthesis in. Balis and Dancis, 603
——, mouse, effect of tumor fractions on uptake of adenine-C$^{14}$ into deoxyribonucleic acids of. Furlong, Watson, Davis, and Griffin, 710
Sterols, level in skin, after treatment with carcinogens and other chemicals. Kundtuch and Baumann, 128
Stomach, emptiness of, effect on tumor induction in forestomach of mouse. Berenberg and Haran, 504
Cancer Research

Tumors, granulosa-cell, in mice, effect of quinacrine on. Vassey, Edmonds, Irvin, Green, and Irvin, 578
— growth of, effect of ethionine alone or with amino acids on. Dunn and Murphy, 700
— growth of, effect of iophylized tumor injections on. Pikovski and Schlesinger, 583
— growth of, effect of normal tissue inocula on. Schneyer, 281
— growth of, in rat, effect of alloxan diabetes on. Goranson and Tiler, 626
— growth of, nonspecific effect of soybean hemagglutinin on. Liener and Seto, 407
— human, analysis for electrolyte, water, and nitrogen content of. Waterhouse, Terepka, and Sherman, 544
— human, increased aldolase content in adenocarcinoma of colon and rectum. Sibley and Fleisher, 806
— incidence of, effects of vitamin variations on, in Drosophila. Friedman, Harii, and Kopac, 375
— induced, by methylcholanthrene, oxygen utilization of, in rats, in vitro. Holtkamp, Hill, and Rutledge, 554
— induction of, in the stomach of mouse, effect of dose of carcinogen and emptiness of stomach on. Berenblum and Haran, 504
— influence of growth of, on plasma proteins in mice. Bernfeld and Homberger, 359
— in mice, effect of oral administration of quinacrine on growth of. Vassey, Edmonds, Irvin, Green, and Irvin, 578
— in rat, after whole-body radiation. Koletsky and Gustafson, 100
— interstitial-cell, in mice, effect of quinacrine on. Vassey, Edmonds, Irvin, Green, and Irvin, 578
— mammary, acceleration in transplantation and killing time of, in mice pretreated with tumor tissue preparation. Miroff, Martines, and Bittner, 437
— of skin, of mice, method for measuring relative potencies of various compounds. Horton and Denman, 701
— significance of, effects of vitamin analogs on, in Drosophila. Friedman, Harii, and Kopac, 382
— production of, in rats by polyethylene implants. Bering, McLaurin, Lloyd, and Ingraham, 300
— significance of mutation on origin of, review. Burdette, 201
— size of, effect on transplantability and lethality of mammary tumors in mice. Martines, Miroff, and Bittner, 409
— size of, relation to frequency of metastases. Bernard, Dutton, and Radakovich, 525

Ultraviolet light, effect of visible light on carcinogenicity of, in mice. Griffin, Dolman, Bohlke, Bouvert, and Tatum, 523
Uracil-N1, incorporation of, into PNA pyrimidines of Ehrlich ascites tumor. Lagerkvist, Reichard, Carlsson, and Graboss, 164
β-Ureidoglycine acid, lack of incorporation of, into PNA pyrimidines of Ehrlich ascites tumor. Lagerkvist, Reichard, Carlsson, and Graboss, 164
L-Ureidosuccinic acid-N1, incorporation of, into PNA pyrimidines of Ehrlich ascites tumor. Lagerkvist, Reichard, Carlsson, and Graboss, 164
Urethan, effect on cellular division and differentiation, in rat intestine. Friedman, Sargent, and Drutz, 479
— effect on growth of E. coli. Skipper, Schabel, Binns, Thomson, and Wheeler, 148
— effect on level of serum aldolase in tumor-bearing rats. Sibley, Fleisher, and Higgins, 506
— effect on various carcinomas. Tarnowski and Stock, 287
— relation of, to mutagenesis and carcinogenesis, review on. Burdette, 201
Urinary proteins, in normal and tumor-bearing rats. Rumsfeld and Baumann, 774

VX rabbit carcinoma, spread of cell suspensions of, in lymphatic system. Zeidman, 719
— ultrastructure of cell surfaces of. Coman and Anderson, 541

Virchow's node, pathogenesis of, in relation to spread of cancer in the lymphatic system. Zeidman, 719

Virus, isolated from Hodgkin's disease lymph nodes, characteristics of. Bostick and Hanna, 630
— Mongo encephalitis, growth of, in Ehrlich ascites cells in vivo. Flannagan and Colter, 857
— Shope papilloma, infectiousness of, after growth in embryonic, neoplastic, and carcinous states of domestic rabbit skin. Greene, 748
— Shope papilloma, response of skin from rabbits immune to, after in vitro infection and transplantation. Greene, 84

Viruses-like particles, associated with Rous sarcoma. Gaylord, 58

Vitamin analogs, effects of, on tumor penetration in Drosophila. Friedman, Harii, and Kopac, 382

Vitamin B12, influence of, on liver disease due to a "labile methyl"-free diet. Bennett, Helleman, and Donnelly, 398

Vitamins, effect of variations of, on tumor incidence of a tu-e strain of Drosophila. Friedman, Harii, and Kopac, 575

Wagner osteogenic sarcoma, effects of phosphoramides on. Sugiu and Stock, 38
— incorporation of labeled purines and of formate-C14 into nucleic acid purines of. Bennett, Skipper, Stock, and Rhoads, 485

Walker 256 carcinosarcoma, effect of alloxan diabetes on growth of, in rat. Goranson and Tiler, 626
— effect of 1,3-bis(2-chloroethyl)amine and methyl-β-(3-chloroethyl)amine on rats bearing. Sassenrath, Morrisson, Larson, and Greenberg, 785
— effect of cortisone and ammonium chloride on growth of, in normal and adrenalectomized rats. Selvy, 28
— effect of N,N'-(4-methyl-m-phenylene)-bis(aziridine-carboxamide) on growth of, in rats. Herbut and Kraemer, 811
— effect of partial hepatectomy on growth of. Paschikia, Cantarow, Staeyn, and Hobbs, 579
— effect of phosphoramide on. Sugiu and Stock, 38
— effect of thiorium dioxide on resistance to. Bernard, Dutton, and Radakovich, 15
— effect on serum aldolase level in rats bearing. Sibley, Fleisher, and Higgins, 506
— free amino acid concentrations of various tissues following injection of selected amino acids into rats bearing. Greenberg and Sassenrath, 620
— incorporation of labeled purines and of formate-C14 into nucleic acid purines of. Bennett, Skipper, Stock, and Rhoads, 585
— lack of effect of thiorium dioxide on incidence of metastases. of Bernard, Dutton, and Radakovich, 525
— metabolism of pyruvate-2-C14 by normal and tumor tissues in rats bearing. Busch, 365
— nonspecific effect of soybean hemagglutinin on growth of. Liener and Seto, 407
— peroxidase and cytochrome oxidase in cell fractions of. Neufeld, Lucas, Martin, and Stots, 550
— weight and lipid content of intestines in rats with. Bloor and Haven, 173

Water, content of, in various human tumors. Waterhouse, Terepka, and Sherman, 544
— content of, in Yoshida sarcoma, effect of radiation on. Gardella and Lichtler, 529

Xiphophorus maculatus, thyroid tumors in kidneys of. Baker, Berg, Gorbman, Nigrelli, and Gordon, 118

X-rays, as a factor in the development of pituitary tumors in mice. Dent, Gadsden, and Furth, 70
— effect of testosterone propionate on gonadotrophic level following. Vermande-Van Eck and Chang, 280
— effect on level of serum aldolase in tumor-bearing rats. Sibley, Fleisher, and Higgins, 506
— effect on nucleic acid, nitrogen, and water content of Yoshida sarcoma. Gardella and Lichtler, 599
— tumor induction in Drosophila by, counteracted by cysteine. Plaine, 151
— whole body, as a carcinogenic agent for rats. Koletsky and Gustafson, 100

Yoshida sarcoma, effect of radiation on nucleic acid, nitrogen, and water content of. Gardella and Lichtler, 529
INFORMATION FOR AUTHORS

Manuscripts for Cancer Research must represent new and original contributions, not previously published, and, if accepted, not to be published elsewhere. They should be typed, double-spaced, with ample margins, on bond paper. The original and one carbon copy should be submitted. Manuscript pages should be numbered consecutively. Every paper should end with a brief, logical summary in which the points proved by the investigation are outlined.

Critical reviews on subjects dealing with cancer and allied fields will be considered for publication in Cancer Research. Such reviews should attempt to correlate the various approaches to a problem in a manner that will indicate the trends and emphasize the aspects that require further clarification. Critical analyses of the pertinent issues and expressions of opinions are encouraged. Preferably, the reviews should not exceed 7 pages (6,000 words) in length, including references.

Comments: A limited space will be available for the publication of comments on published data in the cancer field; they should not exceed 500 words. Comments written for the presentation of new data will not be published.

The title of the paper should be as short as is compatible with a clear indication of the subject matter. Chemical formulas should not be included in the title. The title of the paper, the name of the author (or authors), location, and any acknowledgments should appear on a separate page.

Footnotes should be numbered consecutively and should appear on a separate sheet.

Tables should be typed on separate sheets and should be numbered. Each must have a brief descriptive title. Tables should be arranged for vertical position on the page, either in single or double column. Every column must be supplied with an appropriate heading.

Illustrations: The preparation of photographs, charts, and graphs is particularly important, and authors are requested to follow very carefully the directions given below.

Half-tone illustrations (photomicrographs and photographs) are designated figures and are printed as plates at the end of each article. Figures in moderate numbers will be accepted if they are of good technical quality and essential for the clarity of the presentation. Plates in color and excessive numbers of figures, if accepted, will be charged to the author. Only clear glossy photographs should be submitted. Mount all photographs tightly together on white cardboard. Place as many together as will make a plate not to exceed 6 x 8½ inches. Each figure should include the appropriate number on a lower corner, and they should be numbered consecutively starting with Figure 1.

Legends for plate figures should be typed separately in consecutive order on standard-sized paper with the heading "Legends for Figures." Line cut illustrations (graphs and charts) are designated charts and are printed in the text. These should be numbered in consecutive order starting with Chart 1. Charts should be planned so as to eliminate waste space; they should be ruled off close to the area of the curves, and descriptive matter should not extend beyond the curves. Charts should be so prepared that no letter or figure will be less than 2 mm. high after reduction to the size in which it will appear. Generally they will be reduced to fit either the one- (3-inch) or two- (6-inch) column width of the page. Original line drawings on high quality white drawing paper or board, blue tracing cloth, or coordinate paper printed in blue should be used. Typewritten charts are not desirable, as they permit but slight reduction. Only India ink should be used for drawing or lettering. One set is sufficient. Legends for each chart should be typed separately in consecutive order on standard-sized paper with the heading "Legends for Charts."

Mounts of charts and photographs larger than 8½ x 11 inches will not be accepted. When original drawings exceed this size, photographed reductions should be sent.

References should include, in order: author, title, journal abbreviation (Quarterly Cumulative Index Medicus form), volume number in arabic numerals, inclusive pages, and year. Book references should give: author, title, pages, edition number, city, publisher, and year. All references should be checked with the original publications and should be arranged in alphabetical order. Each number in the references is to refer to only one paper. References to unpublished work or personal communications should appear in footnotes. The following examples illustrate the desired style:

Changes in proof: Any but minor changes from the manuscript which are made in proof will be billed to the author.

Reprints may be ordered before publication, at cost, according to a schedule of prices accompanying the galley proof of the article.

Manuscripts, reviews, and correspondence related to contributions should be addressed to: Dr. Harold P. Rusch, Editor, Cancer Research, McArdle Memorial Laboratory, University of Wisconsin, Madison 6, Wisconsin.

INFORMATION FOR SUBSCRIBERS

All subscriptions and business inquiries should be addressed to the publishers, The University of Chicago Press, 5750 Ellis Avenue, Chicago 37, Illinois.
In the first half of this monograph Dr. Mainx considers the "ways of work" in biology; the interrelation of morphology, physiology, and genetic points of view; the organism as an open system and the historical character of the organism; the structure of organic diversity; and the population as the natural form of existence of living things.

The second half is devoted to a discussion of proper and improper use of speculation in biology conceived as an empirical science.

Vol. I, No. 9, INTERNATIONAL ENCYCLOPEDIA OF UNIFIED SCIENCE. 1955 104 pages paper $2.00

CORRECTION

This advertisement, as it appeared in previous issues of Cancer Research, erroneously listed the professional affiliation and position of the translator of FOUNDATIONS OF BIOLOGY, Professor Joseph H. Woodger. Professor Woodger's correct affiliation is given above. We regret any inconvenience that this error may have occasioned.

Destined To Become a Medical Classic

PHYSIOLOGY AND BIOCHEMISTRY OF THE SKIN

by

STEPHEN ROTHMAN, M.D.

- Dr. Rothman's research in the physiology and biochemistry of the skin from the dermatological point of view signalized a whole new approach to problems in the field. Now, he incorporates his findings into an over-all picture of the existing knowledge on the subject. The result is an absolutely essential, definitive reference work, and a stimulus to advanced research for years to come. PHYSIOLOGY AND BIOCHEMISTRY OF THE SKIN is the only book which deals with all the physiological functions and biological processes of the skin. It is both important and unique.

SPECIAL CHAPTERS CONTRIBUTED BY

ZACHARY FELSHER, M.D. • PETER FLESCH, M.D., Ph.D. • A. BUNSEN LERNER, M.D., Ph.D.
ALLAN LORINCZ, M.D. • HERMANN PINKUS, M.D. • GEORGE C. WELLS, M.B., M.R.C.P.
