L. Foulds. Tumor Progression: Guest Editorial .......................................................... 355
Cell Strains in Vitro ........................................................................................................ 357
Joseph Leighton, Ira Kline, Morris Belkin, Frances Legallais, and Henry C. Orr. The Similarity in 
Histologic Appearance of Some Human “Cancer” and “Normal” Cell Strains in Sponge- 
Matrix Tissue Culture .................................................................................................... 359
Frank Vellios and Juanita Griffin. The Pathogenesis of Dimethylbenzanthracene-induced Car- 
cinoma of the Cervix of Rats .......................................................................................... 364
L. H. Smith, T. Makinodan, and C. C. Congdon. Circulating Rat Platelets in Lethally X- 
radiated Mice Given Rat Bone Marrow ........................................................................ 367
L. L. Bennett, Jr., and Howard E. Skipper. Searches for Exploitable Biochemical Differences be- 
tween Normal and Cancer Cells. III. Effects of Aminosulfasazolecarboxamide on Purine Metabo- 
ism ..................................................................................................................................... 370
Horace Goldie, Matthew Walker, Alvin R. Graham, and Georgia B. Mitchell. Effect of 
Amino-teropterin and of ThioTEPA on Growth and Implantation of Free Tumor Cells from 
Ascites Tumors ................................................................................................................ 374
Z. Thaddeus Mankowski, Irene Corey Diller, and Mary E. Fisher. The Effect of Various 
Fungi on Mouse Tumors with Special Reference to Sarcoma 37 ..................................... 382
J. A. Miller, E. C. Miller, and G. C. Finger. Further Studies on the Carcinogenicity of Dyes Re- 
lated to 4-Dimethylaminobenzene. The Requirement for an Unsubstituted 2-Position ...... 387
Charles Heidelberger, Kenneth C. Leibman, Eberhard Harbers, and P. M. Bhargava. The 
Comparative Utilization of Uracil-2-C14 by Liver, Intestinal Mucosa, and Flexner-Jobling Car- 
cinoma in the Rat ............................................................................................................ 390
H. Ira Pilgrim. A Method of Evaluating Tumor Morbidity as Applied to the Effect of Ovari- 
ectomy at Different Ages on the Development of Mammary Tumors in C3H Mice ........ 405
Helene Wallace Toolan. Permanently Transplantable Human Tumors Maintained in Conditioned 
Heterologous Hosts: H. Chon. #1, H. Ep. #4, and H. Ad. #1 ........................................ 418

Symposium sponsored by the American Cancer Society: Role of Hormones in the Origin and 
Control of Abnormal and Neoplastic Growth. Participants—Ralph I. Dorfman, Francisco Duran- 
Reynals, Jacob Furth, T. F. Gallagher, W. U. Gardner, O. Hechter, Roy Hertz, Charles Huggins, 
Arthur Kirschbaum, A. Lacassagne, Guy F. Marrian, Gerald C. Mueller, Olof H. Pearson, Leo T. 
Samuels, Paul E. Steiner, and Claude A. Villee .............................................................. 422

SYMPOSIUM
SPONSORED BY THE AMERICAN CANCER SOCIETY

Role of Hormones in the Origin and Control of Abnormal and Neoplastic Growth

Program arranged by the
SCIENTIFIC REVIEW COMMITTEE OF THE
AMERICAN CANCER SOCIETY

Held at the
WESTCHESTER COUNTRY CLUB, RYE, N.Y.
DECEMBER 13-14, 1956

PROGRAM

HARRY M. WEAVER. Foreword ....................................... 422
ROY HERTZ. An Appraisal of the Concepts of Endocrine Influence on the Etiology, Pathogenesis, and Control of Abnormal and Neoplastic Growth ............................................. 423
ARTHUR KIRSCHBAUM. The Role of Hormones in Cancer: Laboratory Animals ................................. 432
JACOB FURTH. Discussion of Problems Related to Hormonal Factors in Initiating and Maintaining Tumor Growth ................................................................. 454
PAUL E. STEINER. Discussion: Hormones in Carcinogenesis ................................................................. 464
F. DURAN-REYNALS. Comments on Hormones, Neoplasia, and Virus Infection ........................................ 465
CHARLES HUGGINS. Control of Cancers of Man by Endocrinological Methods ............................... 467
OLOF H. PEARSON. Discussion of Dr. Huggins’ Paper “Control of Cancers of Man by Endocrinological Methods” ................................................................. 473
PAUL E. STEINER. Discussion: Hormones in the Growth of Cancer ............................................................. 480
W. U. GARDNER. Summary of Informal Discussion of First Day .............................................................. 481
GERALD C. MUELLER. A Discussion of the Mechanism of Action of Steroid Hormones ....................... 490
CLAUDE A. VILLEE. Effects of Estrogens and Anti-Estrogens in Vitro .................................................... 507
O. HECHTER. Reflections about Hormone Action and Implications for the Cancer Problem ...................... 512
T. F. GALLAGHER. On Alterations in Adrenal Function, Especially with Adrenocortical Carcinoma ........ 520
LEO T. SAMUELS. Discussion of Dr. Gallagher’s Paper ................................................................. 530
RALPH I. DORFMAN. Comments on the Metabolism of Steroid Hormones ................................................ 535
A. LACASSAGNE. Thoughts on the Scientific Review Committee Meeting in Rye, New York, December 13 and 14, 1956 ................................................................. 537
GUY F. MARRIAN. Summary of Informal Discussions of Second Day .................................................. 539
Comment on Dr. Marrian’s Report .......................................... 545
