CONTENTS

Ralph Vinegar. Photosensitized Inactivation of Ascites Tumor Cells .......................................................... 135

A. J. Donnelly, H. F. Havas, and M. E. Groesbeck. Mixed Bacterial Toxins in the Treatment of Tumors. II. Gross and Microscopic Changes Produced in Sarcoma 37 and in Mouse Tissues .......................................................... 149

J. D. Spain and C. C. Clayton. Inhibition of Azo Dye Carcinogenesis by Thorotrast and Iron Oxide .......................................................... 155

Ralph M. Johnson, S. Albert, and Renee R. Wagshal. Lymph Node and Serum Protein Studies in Mice Bearing Spontaneous Neoplasms. I. Lysine-C14 Incorporation into Serum and Lymph Node Proteins .......................................................... 159

M. D. Eaton and A. R. Scapa. Studies on Simplified Media for Survival of Ehrlich Ascites Cells .......................................................... 164

Frederie A. French and B. L. Freedlander. Carcinostatic Action of Polycarbonyl Compounds and Their Derivatives. I. 3-Ethoxy-2-ketobutyrdehyde and Related Compounds .......................................................... 172

Joseph Meites. Effects of Thyroxine and Triiodothyronamide on Induction of Skin Tumors in Mice by 9,10-Dimethyl-1,2-benzanthraene and Croton Oil .......................................................... 176

Isaac Berenblum, Nechama Haran-Ghera, Ruth Winnick, and Theodore Winnick. Distribution of C14-labeled Urethans in Tissues of the Mouse and Subcellular Localization in Lung and Liver .......................................................... 181

Liselotte I. Hecht and Van R. Potter. Nucleic Acid Metabolism in Regenerating Rat Liver. V. Comparison of Results in Vivo and in Tissue Slices .......................................................... 186

Erwin Schwenk and Dean F. Stevens. Biosynthesis of Cholesterol and Fatty Acids in Tumor-bearing Animals .......................................................... 193

Barry Pierce, Frank J. Dixon, Jr., and Ethel Verney. The Biology of Testicular Cancer. II. Endocrinology of Transplanted Tumors .......................................................... 204

Horace Goldie, Matthew Walker, Calvin A. Brown, and Walton M. Belle. Homeostatic Mechanism Regulating Cellular Composition of Peritoneal Exudate in Normal and Ascites Tumor-bearing Mice .......................................................... 207

Dorris J. Hutchison. Metabolism of Resistant Mutants of Streptococcus faecalis. I. Isolation and Characterization of the Mutants .......................................................... 214

M. Earl Balis, Valia Hylin, M. Katharine Coulta, and Dorris J. Hutchison. Metabolism of Resistant Mutants of Streptococcus faecalis. II. Incorporation of Exogenous Purines .......................................................... 220

Philip Feigelson and Jack D. Davidson. The Metabolism of Pyrazolo[3,4-d]pyrimidines by the Rat .......................................................... 226

John F. Thomson and Florence J. Klippel. Intracellular Distribution of Uricase and Catalase in Livers of Tumor-bearing Mice and Mice Given Injections of Aminotriazole .......................................................... 229

L. Z. Saunders and C. N. Barron. Primary Pigmented Intraocular Tumors in Animals .......................................................... 234

Announcements .......................................................... 246
