CONTENTS

Ludwik Gross. Viral Etiology of “Spontaneous” Mouse Leukemia: A Review .................................................. 371

Donald W. King, Klaus G. Bensch, and Stanley Simbonsis. The Lack of Effect of Heparin on Mitosis in Strain L Cells .................................................. 382

William L. Nyhan and Harris Busch. Metabolic Patterns for L-Glutamate-U-C14 in Tissues of Tumor-bearing Rats .................................................. 385

J. B. Allison, R. W. Wannemacher, Jr., T. Russell, and J. R. McCoy. The Uptake of S35 from Methionine by Plasma Proteins, in Protein-depleted and Tumor-bearing Dogs .................................................. 394

George Miroff and W. E. Cornatzer. Phosphorus Metabolism of a C3H Ascites Tumor in Vivo .................................................. 398

George Miroff and W. E. Cornatzer. Phosphorus Metabolism of a C3H Ascites Tumor in Vitro .................................................. 403

George G. Rose. An Appraisal of a Biological Response by Strain HeLa Cells in Tissue Culture to 100 Human Sera .................................................. 411

Harry S. N. Greene. Transplantability of the Shope Papilloma from the Initial Infection to the Stage of Histological Carcinoma .................................................. 418

Harry S. N. Greene. A Spontaneous Melanoma in the Hamster with a Propensity for Amelanotic Alteration and Sarcomatous Transformation during Transplantation .................................................. 422

P. E. Hughes. The Significance of Staining Reactions of Preneoplastic Rat Liver with Fluorescein-Globulin Complexes .................................................. 426

Ethelda N. Sassenrath, Juliet W. Welch, and David M. Greenberg. Tumor-Host Relationships. III. Composition Studies on Experimental Tumors .................................................. 433

M. Earl Balis, Vafia Hylin, M. Katharine Coulta, and Dorris J. Hutchison. Metabolism of Resistant Mutants of Streptococcus faecalis. III. The Action of 6-Mercaptopurine .................................................. 440

Alan C. Sartorelli and G. A. LePage. The Development and Biochemical Characterization of Resistance to Azaserine in a TA3 Ascites Carcinoma .................................................. 457

Jean Scholler and John J. Bittner. Further Studies of Chemotherapeutic Agents in Spontaneous Mammary Adenocarcinomas of Mice and in Transplants of Recent Origin .................................................. 464

E. C. Miller, J. A. Miller, R. R. Brown, and J. C. MacDonald. On the Protective Action of Certain Polycyclic Aromatic Hydrocarbons against Carcinogenesis by Aminoazo Dyes and 2-Acetylaminothioether .................................................. 469

A. R. Currier, Fred J. Ansfield, Forde A. McIver, Harry A. Waisman, and Charles Heidelberger. Clinical Studies with 5-Fluorouracil .................................................. 478

J. V. Skiff, Jr., A. A. Stein, M. Maisel, C. Heilbrunn, and D. Hertz. Observations on the Heterologous Transplantation of Human Tumors .................................................. 485
