CONTENTS

Karl E. Paschkis. Growth-promoting Factors in Tissues: A Review
Nathan Kaliss. Immunological Enhancement of Tumor Homografts in Mice: A Review
Frederik B. Bang. Three Dilemmas in the Study of Viruses and Tumor Cells
Charles I. Thomas, Helen Harrington, and Mary Sue Bovington. Uptake of Radioactive Phosphorus in Experimental Tumors. III. The Biochemical Fate of P³² in Normal and Neoplastic Ocular Tissue
George E. Foley and Harry Eagle. The Cytotoxicity of Anti-Tumor Agents for Normal Human and Animal Cells in First Tissue Culture Passage
Harry Eagle and George E. Foley. Cytotoxicity in Human Cell Cultures as a Primary Screen for the Detection of Anti-Tumor Agents
P. G. Scholefield. Studies on Fatty Acid Oxidation. VI. The Effects of Fatty Acids on the Metabolism of Ehrlich Ascites Carcinoma Cells
O. Chalvet, R. Daudel, and C. Moser. A Note on the Interaction of Carcinogenic Molecules with Cellular Protein
John H. Weisburger, Elizabeth K. Weisburger, and Harold P. Morris. Differences in the Metabolism of N-2-Fluorenylacetonitrile in the Guinea Pig and the Rat
Frank H. Ruddle, Lawrence Berman, and Cyril S. Stulberg. Chromosome Analysis of Five Long-Term Cell Culture Populations Derived from Nonleukemic Human Peripheral Blood (Detroit Strains)
K. E. Paschkis and A. Cantarow. Pregnancy, Tumor Growth, and Liver Regeneration
Peter C. Novell and Leonard Berwick. The Surface Ultrastructure of Normal and Leukemic Rat Lymphocytes
Chester M. Southam and Virginia I. Babcock. Viral Oncolysis Studies with a Metastatic Human Tumor in Chicks
E. C. Moore and G. A. LePage. The Metabolism of 6-Thioguanine in Normal and Neoplastic Tissues
Jack R. Cooper. Studies on 6-Uracil Methyl Sulfone. I. Nonenzymatic Metabolism
Julian J. Jaffe and Jack R. Cooper. Studies on 6-Uracil Methyl Sulfone. II. Anti-Tumor Activity
Vincent T. Oliverio and Charles Heidelberger. The Interaction of Carcinogenic Hydrocarbons with Tissues. V. Some Structural Requirements for Binding of 1,2,5,6-Dibenzanthracene
Charles E. Wenner, John H. Hackney, and Francis Moliterno. The Hexose Monophosphate Shunt in Glucose Catabolism in Ascites Tumor Cells
