INDEX TO VOLUME 21
### INDEX TO VOLUME 21

#### AUTHOR INDEX

In addition to the regular issues of Cancer Research, the following supplements were published during 1961:

- Vol. 21, No. 3, Part 2, Cancer Chemotherapy Screening Data IX, pages 1–160.
- Vol. 21, No. 6, Part 2, Cancer Chemotherapy Screening Data X, pages 161–342.
- Vol. 21, No. 8, Part 2, Cancer Chemotherapy Screening Data XI, pages 343–516.
- Vol. 21, No. 10, Part 2, Cancer Chemotherapy Screening Data XII, pages 617–888.

Each of these supplements is indexed, and a cumulative index is found in No. 10, Part 2. The articles appearing in those supplements are listed in this index by author only, and such entries are indicated by “CS” preceding the number—e.g., CS 15.

6-Chlorouric acid, inhibition of uricase by, in rat liver in vitro. Duggan, Weigert, and Titus, 1047

Chloroquine mustard, chemical and metabolic studies of, in mice. Rutman, Steele, and Price, 1194
---, reactions with Ehrlich cells. Rutman, Steele, and Price, 1194

6-Chlorouric acid, inhibition of uricase by, in rat liver in vitro. Duggan, Weigert, and Titus, 1047

Chloropromazine, metabolism in normal and tumorous liver, in rat. Adamson and Fouts, 667

Cholesterol, in epidermis and dermis of mice during carcinogenesis by methylcholanthrene. Carruthers and Davis, 82

Cholinesterase, reduced serum activity in guinea pigs with locally implanted human tumor. LeMotta, Rabbott, and Wetsone, 749

Choriocarcinoma, human, estradiol-17β enzyme systems of. Kellogg, 319

Chorionic gonadotropin, secreted by human embryonal carcinoma, effect of colchicine and x-radiation. Midgley and Pierce, 545

Chromatographic separation, of nucleic acids from isologous newborn, adult, and neoplastic thymus. Smith and Kaplan, 1148

Chromatography, of urinary metabolites of N-2-fluorenylacetamide. Weisburger, Grantham, Morris, and Weisburger, 949

Chromosomes, constitution of, in bone marrow of leukemic and mon leukemic humans. Sandberg, Ishihara, Miwa, and Haushka, 678
---, in ontogeny and oncogeny. Haushka, 927
---, number of, of Krebs-2 ascites carcinoma cultured in vivo and in vitro. Ely and Gray, 1020
---, variation in cells derived from pig kidney, in vitro. Rudde, 885

Citrination, incidence in birds in zoological gardens in Philadelphia. Ratcliffe, 36

Cloudman melanoma S-91, CCRF cell line of, effect of Cytoxan on culture of. Foley, Friedman, and Drolet, 57
---, mouse, efficacy of phenylalanine mustards against. Luck, 393

Codeine, metabolism in normal and tumorous liver, in rat. Adamson and Fouts, 667

Colchicine, effect on differentiation of human embryonal carcinoma. Midgley and Pierce, 545
Dyes, localization of octodiofluorescein-131 in mouse brain tumors. Tocas and Okita, 201
—, as photosensitizers of inactivation of tumor cells in vitro. Bellin, Mohos, and Oster, 1365

Eagle’s KB cells. See KB cells.

Ear duct, rat, tumors of, produced by N-hydroxy-2-acetylaminofluorene. Miller, Hart, and Miller, 915
—, tumors of, induced by ingestion of 3-methoxy-4-aminoazobenzene and derivatives. Miller and Miller, 1069
—, glands, sebaceous tumors of, induced in hamsters with oral 20-methylcholanthrene. Della Porta, 575

Earle’s L strain cells. See Strain L cells.

EDTA. See Ethylenediaminetetraacetate.

Ehrlich ascites cells. Crabtree effect in, review. Ilsen, 960
—, dry mass increased after treatment with nitrogen mustard. Lee, Richards, and Forst, 1106
—, required photoinactivation of, in vitro. Bellin, Mohos, and Oster, 1365
—, effect of age of host on incidence of metastases from injected, in mice. Estensen and Baserga, 789
—, effects of 4-aminopyrazolo(3,4-d)pyrimidine and of 1-methyl-4-aminopyrazolo(3,4-d)pyrimidine on nucleic acid purine metabolism in. Henderson and Jungas, 173
—, effect of anaerobiosis on enzymatic pattern of. Adebonojo, Benesch, and King, 293
—, effect of glucose on glutamine utilization by. Kvanme and Svenneby, 92
—, effect of polylysine on leakage and retention of compounds by. Kornguth and Stahmann, 907
—, effect of purinethiol derivatives on mice in vivo. LePage and Jones, 649
—, effect of hexokinase specificity of preparations from. Lange and Kohn, 1055
—, inhibition by cordycepin. Jagger, Kredich, and Guarino, 216
—, mouse, metabolism of 4-aminopyrazolo(3,4-d)pyrimidine and related compounds in. Henderson and Jungas, 118
—, mouse, ribonucleic acid activity of. Colter, Kuhn, and Ellem, 48
—, reactions of chloroquine mustard and nitrogen mustard with. Rutman, Steele, and Price, 1134
—, subcutaneous transplants of, in mice, mammary duct stimulation by. Argyris and Argyris, 73

Ehrlich carcinoma, effect of cytoxan on. Sugiuara, Schmid, and Schmid, 1422
—, solid and ascitic, effects of uncoupling agents on glycine uptake by. Ellis and Schofield, 650
—, solid and ascitic, mouse, transplantability after frozen storage. Sugiuara, 496
—, vaccinia hemagglutinin inhibitor in ascites of, in mice. Wollman, 1096

Ehrlich-Landshut ascites cells, release of cytoplasmic enzymes from, in vitro. Holmberg, 1866

Ehrlich-Lehre ascites cells, antitumor effect of cebucubicin on, in mice in vivo. Gitter, Gallily, Shohat, and Lavie, 516
—, effect of synthetic estrogens on respiration of, in vitro. Dietrich and Friedland, 302

Ehrlich TGR ascites cells, thioguanine-resistant, effect of purinethiol derivatives on mice in vivo. LePage and Jones, 642

Ehrlich-TG-R cells, mouse, metabolism of 4-aminopyrazolo(3,4-d)pyrimidine and related compounds in. Henderson and Jungas, 118

Elatericin A, antitumor effect, in mice. Gitter, Gallily, Shohat, and Lavie, 516

Elatericin B, antitumor effect, in mice. Gitter, Gallily, Shohat, and Lavie, 516

Elatericin methylether, antitumor effect tested, in mice. Gitter, Gallily, Shohat, and Lavie, 516

Electronic structure, of DNA, and carcinogenic agents. Hoffmann and Ladinik, 474
—, of polynuclear aromatic hydrocarbons, and their carcinogenic effect. Koutecky and Zahradnik, 457

Electron microscopy, of FL and primary human amnion cells following high hydrostatic pressure. Landau and McAlear, 812
—, of HeLa cell lines sensitive and resistant to actinomycin D. Journey and Goldstein, 929
—, of isolated liver and tumor nuclei. Barton, 198
—, of L strain cells, virus-like particles in. Dales and Howatson, 198
—, of mitochondrial change in small intestine after 20-methylcholanthrene. Burt, Killmeyer, Thompson, and Grauer, 1427
—, of Walker carcinosarcoma 256, in rat. Mercer and Easty, 92
—, of Walker tumor. Fisher and Fisher, 537
—, of Yoshida ascites hepatoma cells. Bairati, 99

Electrophoresis, of erythrocytes in carcinoma. Rottino and Angers, 1445
—, of serum lactic dehydrogenase, in human. Hill, 371
—, of soluble proteins of mouse skin. Davenport, Abell, and Heidolph, 99

Embryo, rat, thymidine incorporation and DNA content of slices of. Aisenberg, 1560

Endocrinology, of ovarian tumor formation in parabiotic rats. Johnson and Witschi, 78

Endoxan. See Cyclophosphamide.

Environmental carcinogenesis, symposium paper. Hueper, 842

Enzymatic systems, DPN-dependent, antagonism by 6-aminonicotinamide, augmented by diethylstilbestrol. Dietrich and Martin, 361

Enzymes, activity in Sarcoma 180, in mice treated with 6-mercaptopurine. Fodor, Clarke, and Bodansky, 292
—, adenosine triphosphatase activity, in nuclei and mitochondria from mouse mammary adenocarcinoma. Miller and Goldschmidt, 64
—, carbohydrate, in rat normal liver and hepatoma. Weber, Banerjee, and Morris, 933
—, cytoplasmic, from ascites tumor cells, in vitro release of. Holmberg, 1890
—, deoxycytidylic deaminase and thymidylic synthetase in normal and neoplastic rat liver. Maley and Maley, 1421
—, effect of nitrogen on, in Strain L cells. Adebonojo, Benesch, and King, 292
—, electrophoretic fractionation of serum lactic dehydrogenase. Hill, 297
—, feedback control in Ehrlich ascites cells, carbamyl phosphate-aspartate transcarbamylase and dihydroorotase. Bresnick and Hitchings, 105
—, glutamic oxaloacetic transaminase activities of liver and other tumors in the rat. Dyer, Gullino, Essfeld, and Morris, 1382
—, hexokinase specificity of some tumor tissue extracts. Lange and Kohn, 1955
—, 5-hydroxytryptophan decarboxylase and serotonin deaminase in transplanted hepatomas and induced rat liver tumor. Kizer and Chan, 489
Food Protection Committee, Food and Nutrition Board, Subcommittee on Carcinogenesis, evaluation of carcinogenic hazard from food additives, 429

Formaldehyde-C\textsuperscript{14}, incorporation into nucleic acids of mouse leukemia. Trams, Nadkarni, and Smith, 507

\textbf{Gardner lymphosarcoma. See Lymphosarcoma 6C3HED Gardner.}

Genetic aspects, of physiological variability. Wolff, 1119

\textbf{Gardner lymphosarcoma. See Lymphosarcoma 6C3HED Gardner.}

\textbf{Genetic aspects, of physiological variability. Wolff, 1119}

\textbf{Genetics, chromosome number of Krebs-2 ascites carcinoma.}

\textbf{Genetic aspects, of physiological variability. Wolff, 1119}

\textbf{Genetics, chromosome number of Krebs-2 ascites carcinoma.}

\textbf{Genetic aspects, of physiological variability. Wolff, 1119}

Glucuronic acid conjugates, as urinary metabolites of N-2-furoylglucosamine. Weisburger, Grantham, Morris, and Welch, 933

\textbf{Gluconeogenesis, in Walker carcinooma, by histochemistry.}

Fisher and Fisher, 597

\textbf{Glutamate oxidation, in normal and neoplastic mitochondria.}

Aisenberg, 293

\textbf{Glutamic acid, in modifying effect of vincleukoblastine on dividing cells in \textit{vivo}.}

Cuts, 168

\textbf{Glutamic-oxalacetic transaminase, activities of liver and other tumors in the rat.}

\textbf{Glycine, effects of uncoupling agents on uptake of, by transplanted mouse tumors.}

Ellis and Schofield, 630

\textbf{Glycine-C\textsuperscript{14}, effects of 4-aminopyrazolo(3,4-d)pyrimidine and of 1-methyl-4-aminopyrazolo(3,4-d)pyrimidine on incorporation of, into nucleic acids of ascites tumors.}

Henderson and Junger, 173

\textbf{Glycine-2-C\textsuperscript{14}, effect of purinethiols on incorporation of, into ascites tumors in \textit{vivo}.}

LePage and Jones, 642

---, incorporation into nucleic acid purines and protein in Walker tumor inhibited by pseufouramine. Magee and Everts, 811

---, incorporation into protein, nucleotides, and nucleic acids of L-1 mouse tumor inhibited by thioTEPA. Pradhan, West, Baird, and Steward, 984

---, incorporation into rat liver, effect of 6-chloropurine. Duggan, Weigert, and Titus, 1047

\textbf{Glycylcolysis, effect on glutamine uptake by Ehrlich ascites cells.}

Kvamme and Svenneby, 92

---, of lymphoblasts in \textit{vivo}. Holuberg, Bos, deBruyn, and Emmelet, 383

\textbf{Goldfeder mammary adenocarcinoma DBAH, transplanted after frozen storage.}

Sugiura, 496

\textbf{Goldfeder spindle-cell mammary tumor BDAG, transplanted after frozen storage.}

Sugiura, 496

\textbf{Goldgi complex, in tissue-cultured human melanoma cells, with phase contrast microscopy.}

Rose, 706

---, of human melanomas in tissue culture. Rose and Strehlin, 1455

\textbf{Gonadotrophic hormone, and adrenal tumors in ovariectomized mice.}

Tullos, Kirshbraun, and Trestin, 780

---, choricol, secreted by human embryonal carcinoma, effect of ecolchicine and x-radiation. Midgley and Pierce, 545

---, overstimulation of rat ovaries by, and tumor formation in, Johnson and Witschi, 789

\textbf{Growth, mitochondrial characteristics of normal cells during.}

Mukherjee, De, and Mitra, 314

---, of free tumor cells in experimental subcutaneous cavity in mouse. Goldie, Walker, Avery, Houston, and McVie, 1113

\textbf{Guanine, metabolism in human leukocytes in \textit{vivo}.}

Shapira, Bornstein, Wells, and Winzler, 265

\textbf{Guanine-C\textsuperscript{14}, effects of 4-aminopyrazolo(3,4-d)pyrimidine and of 1-methyl-4-aminopyrazolo(3,4-d)pyrimidine on incorporation of, into nucleic acids of ascites tumors.}

Henderson and Junger, 173

\textbf{Guanine-8-C\textsuperscript{14}, anabolism and catabolism of, by mixed neoplasms and mixed tumors of rats and mice.}

Wheeler and Alexander, 390

---, metabolism in various rat and mouse tissues in \textit{vivo}. Wheeler and Alexander, 390

\textbf{Guest editorial, animal cancer as the primary tool.}

Day, 581

---, transplatable animal cancer as primary standard. Potter, 1831

\textbf{Guinea pigs, transplantation of tissue culture cell lines to brains and eyes of.}

Manuelidis, 876
Human applications of immunology to clinical cancer, symposium. Southam, 1302

- Cells in culture, PL and amnion, micromorphology of cultures of, following high hydrostatic pressure. Landau and McAlar, 512, 1024
- Chromosome patterns in various conditions. Hauschka, 957

- Clinical evaluation of thio guanosine in leukemias. Krakoff, Ellisen, and Tan, 1016
- Clinical experience with 6-aminonicotinamide, toxicity and lack of tumoricidal effects. Irter, Weissman, Thompson, Hyman, and Martin, 31
- Cytoplasm in gastrointestinal tract. Graf, Rapport, and Brandt, 1532
- Electrophoretic fractionation of serum lactic dehydrogenase. Hill, 671

Hydrocortisone, effect on methylcholanthrene-induced sarcomas in mice. Nakai, 221

Hydrostatic pressure, effect on mieromorphology of PL and primary human amnion cells. Landau and McAlar, 812

N-Hydroxy-4-acetylaminobiphenyl, strong carcinogenicity in the rat. Miller, Wyatt, Miller, and Hartmann, 1465

N-Hydroxy-2-acetaminofluorene, carcinogenic activity, in the rat. Miller, Miller, and Hartmann, 815

Hydroxy corticosterone-21-acetate, variations in sensitivity to, among five mammalian cell lines used in agar plate assay. Schuurmans, Duncan, and Olson, 773

3-Hydroxy-1,2,5,6-dibenzanthracene, zero-time binding to mouse skin proteins. Somerville and Heidelberger, 501

2-Hydroxy-4-dimethylaminoazobenzene, lack of carcinogenicity of, for extrahepatic rat tissues. Miller and Miller, 1068

5-Hydroxyindoleacetic acid, excretion of, during cyclophosphamide treatment of mast-cell neoplasms in mouse. Mengel and Kelly, 1545

Trans-4-Hydroxy-4-methylpent-2-enoic acid, antitumor effect tested in mice. Gitter, Gallily, Shohat, and Lave, 516

2-Hydroxy-4-monomethylaminoazobenzene, lack of carcinogenicity of, for extrahepatic rat tissues. Miller and Miller, 498

Hydroxyproline, epidermal, decreased in induced epiderma carcinogenesis, in mice. Fels and Greco, 40

- - - - , in rat liver, relation to collagen formation and fibrogenesis. Hutterer, Rubin, Singer, and Popper, 396

5-Hydroxytryptophan decarboxylase, in transplanted hepatomas and induced rat liver tumor. Kizer and Chan, 489

Hyperlipemia, effect on pulmonary metastases of Walker tumor in rat. Clifton, Agostino, and Minde, 1002

Hyphophesemcy, effect on level of polynuclear hydrocarbons in rat mammary glands after oral administration. Bock and Dao, 1024

Hypophysis. See Pituitary.

Hydroxyanthine-8-Cl, anabolism and catabolism of, by minced neoplasms and minced tissues of rats and mice. Wheeler and Alexander, 390

- - - - , metabolism in various rat and mouse tissues in vivo. Wheeler and Alexander, 390

Human choriocarcinoma, estradiol-17 beta, enzyme systems of. Kellogg, 519

Human embryonal carcinoma, effect of colchicine and x-radiation on differentiation of. Midgley and Pierce, 545

Human epidermoid carcinoma H.Ep. #2, large-scale chemotherapy screening against, in vitro. Toplin, 1042

Human epidermoid carcinoma H.Ep. #3, effects of cytostatic on, in vitro. Teller and Woolley, 881

- - - - , in mice, statistical methods and steroid therapy. Merker, Anido, and Mantel, 869

Human melanoma, in tissue culture, Golgi complex and melanin formation. Rose and Stehlin, 1453

- - - - , tissue-cultured cells, studied with phase contrast microscopy. Rose, 706

Human Sarcoma H.S. #1, in hamster, anabolism and catabolism of purines by minced. Wheeler and Alexander, 399

- - - - , effect of antitumor compounds on precursor utilization for pyrimidine synthesis in, carried in rats. Edinoff, Knoll, Marano, and Klein, 1377

- - - - , effects of cytostatic on, in rat. Teller and Woolley, 881

Human tumor, implanted in guinea pig eye, depressed serum cholinesterase activity. LaMotta, Bahbott, and Wetsstone, 749

Hydrocarbons, bound to mouse skin proteins, fractionation of latter. Davenport, Abell, and Heidelberger, 599

- - - - , carcinogenic, and electronic structure of DNA. Hoffmann and Ludik, 474

- - - - , polycyclic, concentration in mouse skin under various experimental conditions. Bock and Burnham, 510

- - - - , polynuclear, factors affecting level of, in rat mammary glands. Bock and Dao, 1024

- - - - , polynuclear aromatic, electronic structure and carcinogenic effect of. Koutecky and Zahradnik, 407

- - - - , zero-time binding to mouse skin proteins. Somerville and Heidelberger, 501
Index to Volume 21

Internal diffusion constant, smaller in induced hepatooma than in rat liver, in study of potassium flux. Humphrey, 1566

Intestine, cortisone effect on sulfonamide distribution in rats and mice. Malejka, Argus, and Ray, 673

hemangiosas induced in, by urethan, in mice. Kawamoto, Kirkshaum, Baneze, Tretin, and Taylor, 71

mouse metabolism of 4-aminoypyrazolo(3,4-d)pyrimidine and related compounds in. Henderson and Junga, 118

muscle, incorporation of thymidine into DNA in, and effect of 5-fluorouracil. Field, Kirsch, and Tong, 8

rat, effect of antitumor compounds on precursor utilization for pyrimidine synthesis in. Eidenoff, Knoll, Marano, and Klein, 1377

rat, thymidine incorporation and DNA content of slices of. Allenberg, 1560

rat and mouse, anabolism and catabolism of purines by mitoch. Wheeler and Alexander, 399

rat and mouse, purine metabolism in vivo. Wheeler and Alexander, 390

rat and mouse, sonicates of, catabolism of purines and purine nucleotides by. Wheeler and Alexander, 407

small, mitochondrial change in, in mice, after 20-methylcholanthrene. Burt, Killmeyer, Thompson, and Grauer, 1457

small, rat, tumors of, produced by N-hydroxy-2-acetylaminofluorene. Miller, Miller, and Hartman, 815

tumors of, induced in hamsters with oral 20-methylcholanthrene. Della Porta, 757

Insulin, permeability of normal liver and of hepatoma to, in rat. Humphrey, 1573

5-Iodo-2'-deoxyuridine, initial clinical studies with. Calabresi, Cardoso, Finch, Kligerman, von Essen, Chu, and Welch, 550

Iron, effects of Ehrlich ascites tumor on incorporation of, into heme. Origenes, Lester, and Labbe, 1430

histochemical analysis of, in spontaneous and induced primary tumors in rats. Arnold and Sasse, 761

Iron-protoporphyrin chelation, by liver mitochondria from control and tumor-bearing mice. Origenes, Lester, and Labbe, 1350

Irradiation. See also Radiation and X-radiation.

of benzpyrene-induced skin tumors in mouse, sulfur-35 uptake by surrounding connective tissue. Dubig, 885

total-body leukemia induction in mice by and inhibitory effect of testosterone. Wasi and Block, 463

JA-1 sarcoma, carbon dioxide metabolism in, in vitro. McCoy, Maxwell, and Kruse, 997

Jensen sarcoma, and variants, carbon dioxide metabolism in, in vivo. McCoy, Maxwell, and Kruse, 997

K region, reactivity, electronic structure of hydrocarbons and. Koutecky and Zahradnik, 457

KB cells, Eagle's, drug sensitivity of, in agar plate assay. Schuurmans, Duncan, and Olson, 773

not affected by normal rabbit serum in tissue culture. Tuttle and Foushee, 735

Kidney, cortisone effect on sulfonamide distribution in rats and mice. Malejka, Argus, and Ray, 673
Kidney—Continued
—, cultured, epithelial cells, transplanted into various mammals. Manulis, 876
—, mouse, metabolism of 4-aminopyrazolo(3,4-d)pyrimidine and related compounds in. Henderson and Junga, 118
—, phosphorylation in normal and neoplastic mitochondria, in rat. Asenin, 304
—, pig, chromosome variation in cultured cells of. Ruddle, 885
—, rat, respiration in mitochondria and homogenate of. Asenin, 295
—, rat and mouse, anabolism and catabolism of purines by minced. Wheeler and Alexander, 399
—, tumor of, transplantable, of the rat. Babcock and Southam, 130
Koala, New South Wales, acute leukemia in. Heuschele and Hayes, 1394
Kreb-2 carcinoma, ascites, chromosome number of, in vivo and in vitro culture. Ely and Gray, 1090
—, mouse, ribonuclease activity of. Colter, Kuhn, and Ellem, 48
—, cells, free cell growth in experimental subcutaneous cavity in the mouse. Goldie, Walker, Avery, Houston, and McIver, 1113
—, regression of, by use of mixed bacterial toxins in mice. Havas and Donnelly, 17
—, vaccinia hemagglutinin inhibitor in ascites of. Wolin, 1060
Kynureninase, rat liver, decreased after feeding of 3'-methyl-4-dimethylaminoazobenzene. Ptasnick, Brown, and Price, 1400
Kynurenine transaminase, no change after feeding of 3'-methyl-4-dimethylaminoazobenzene. Ptasnick, Brown, and Price, 1400
L-1 tumor. See Lymphosarcoma L-1.
L-fibroblasts. See Strain L fibroblasts.
Lactic dehydrogenase, activity in normal rat liver and hepatoma. Weber, Banerjee, and Morris, 993
—, activity in Sarcoma 180, in mice treated with 6-mercaptopurine. Podor, Clarke, and Bodansky, 352
—, activity of Strain L cells increased in anaerobiosis. Adehunojo, Bensch, and King, 252
—, activity released from ascites tumor cells in vitro. Holmberg, 1386
—, serum, electrophoresis of, in human, Illil, 271
Lates, of Euphobia, tumor promotion by. Roe and Peirce, 388
Lettré-Ehrlich ascites tumor, mouse, ribonuclease activity of. Colter, Kuhn, and Ellem, 48
Di-Leucine-1-C5, incorporation into Walker carcinoma 256 cell cultures. Green and Miller, 1034
Leukemia. See also Lymphoma.
—, acute, in New South Wales koala. Heuschele and Hayes, 1304
—, clinical effect of thioguanosine on. Krakoff, Ellison, and Tan, 1015
—, human, in vivo chromosome constitution of marrow from. Sandberg, Ishihara, Miwa, and Hauschka, 678
—, induction of, and immunity to Sarcoma 180, in mice. dePasqualini, Holmberg, Rabasa, and Pavlovsky, 387
—, in Hiroshima atom bomb survivors and other clinical cases. Upton, 717
—, in mice, influence of colchicine on. Kawamoto, Kirschbaum, Trentin, and Taylor, 309
—, irradiation-induced, in mice, inhibited by testosterone. Wasi and Block, 483
—, spontaneous, heterotransplantation from mice into newborn rats. Kirsten, Anderson, and Platz, 707
—, spontaneous, in mice, influence of urethan on. Kawamoto, Kirschbaum, Ibanez, Trentin, and Taylor, 71
—, tumor-induced lymphoid, in mice, response to drug therapy. Chirigos, Moloney, Humphreys, Mantel, and Goldin, 808
Leukemia AKR, spontaneous, heterotransplantation from mice into newborn rats. Kirsten, Anderson, and Platz, 767
Leukemia L1210, CCRF cell line of, effect of cytoxan on culture of. Foley, Friedman, and Drolet, 57
—, effect of caloric restriction on survival of mice. Laster, Schabel, Skipper, Wakoos, and Thomson, 895
—, effect of vincleukoblastine on cells of, in mice. Cardinali, Cardinali, and Blair, 1542
—, effect of vincleukoblastine on mitosis in ascites cells of. Cutts, 188
—, immunological depression of growth of, in mice. Wigzell, 365
—, large-scale chemotherapy screening against, in tissue culture. Tophill, 1049
—, mouse, anabolism and catabolism of purines by minced. Wheeler and Alexander, 399
—, mouse, asparagine, incorporation of alkylating agents into DNA of. Trans, Nadkarni, and Smith, 567
—, mouse, effects of nitrogen mustard, Myleran, and X-irradiation on nucleic acid biosynthesis in. Trans, Nadkarni, and Smith, 567
—, mouse, metabolism of 4-aminopyrazolo(3,4-d)pyrimidine and related compounds in ascites of. Henderson and Junga, 118
—, mouse, purine metabolism in vivo in. Wheeler and Alexander, 399
—, mouse, sonicate of, catabolism of purines and purine nucleotides by. Wheeler and Alexander, 407
Leukemia L4946, antitumor activity of cytoxan against, in mouse. Sugiuira, Schmid, and Schmid, 1412
—, mouse, anabolism and catabolism of purines by minced. Wheeler and Alexander, 399
—, mouse, transplantability after frozen storage. Sugiuira, 496
Leukemia L5178, mouse, anabolism and catabolism of purines by minced. Wheeler and Alexander, 399
Leukemia L5178Y, mouse, requirement for L-asparagine in culture. Haley, Fischer, and Welch, 283
—, pyrimidine metabolism in cells of, resistant to 6-azauridine. Pasternak, Fischer, and Handschumacher, 110
Leukemia P-1534, CCRF cell line of, effect of cytoxan on culture of. Foley, Friedman, and Drolet, 57
Leukemic cells, mice, stathmokinetic effect of vincaleukoblastine on. Cardinali, Cardinali, and Blair, 1542
—, mice, effectiveness of antileukemic drugs dependent on anatomical distribution of cell of. Skipper, Schabel, Trader, and Thomson, 1154
—, mouse, effects of nitrogen mustard, Myleran, and X-irradiation on nucleic acid biosynthesis in. Trans, Nadkarni, and Smith, 567
—, mouse, metabolism of 4-aminopyrazolo(3,4-d)pyrimidine and related compounds in ascites of. Henderson and Junga, 118
—, mouse, purine metabolism in vivo in. Wheeler and Alexander, 399
—, mouse, anabolism and catabolism of purines by minced. Wheeler and Alexander, 399
—, mouse, transplantability after frozen storage. Sugiuira, 496
Leukemic strains, of mice, and low-leukemic, relative immunologic capacity to resist infection. Murphy and Syverton, 921
Leukemogenesis, in mice, by x-rays, estrogen, methylcholanthrene, and urethan, influence of colchicine on. Kawamoto, Kirschbaum, Trentin, and Taylor, 309
Leukocytes, human, inhibition of mitosis by prednisolone in vitro. Nowell, 1518
—, human, in vitro metabolism of adenine and guanine. Shapiro, Bornstein, Wells, and Winzler, 365
Lewis bladder carcinoma, antitumor activity of cytoxan against, in mouse. Sugiuira, Schmid, and Schmid, 1412
—, incorporation of 6-mercaptopurine-538 into nucleic acids of. Bieber, Dietrich, Elion, Hitchings, and Martin, 228
—, mouse, transplantability after frozen storage. Sugiuira, 496
Lewis lung carcinoma, mouse, effect of cytoxan on. Sugiuira, Schmid, and Schmid, 1412
—, mouse, transplantability after frozen storage. Sugiuira, 496
Lipase, incorporation of 6-mercaptopurine-S 35 into nucleic acids in normal and neoplastic mitochondria. Pasternak, Fischer, and Handschumacher, 110
Lipide composition, of epidermis and dermis of mice undergoing methylcholanthrene-induced carcinogenesis. Caruthers and Davis, 82
Lipide fractions, from Sarcoma 180, no effect on transplanta
tion of Sarcoma 180. Malkiel and Hargis, 1461
Lymphosarcoma Murphy-Sturm, antitumor activity of cytoxin against, in rat. Sugitani, Schmid, and Schmid, 1412
—, phosphorylation in normal and neoplastic mitochondria, in rat. Aisenberg, 304
—, rate, respiration in mitochondria and homogenate of. Aisenberg, 295
—, rate, transplantability after frozen storage. Sugitani, 496
—, thymidine incorporation and DNA content of slices of. Aisenberg, 1200
Lymphosarcoma R2888 Dunning, studies on cachexia of rats bearing. Rechcigl, Grantham, and Greenfield, 238
DL-Lysine-1-C14, incorporation into protein of L-1 mouse tumor inhibited by thioureaTEPA. Pradhan, West, Baird, and Steward, 894
DL-Lysine-2-C14, incorporation into mouse skin proteins, effect of hydrocarbons on. Davenport, Abell, and Hartmann, 815
Mahan cells (Frisch), human, drug sensitivity of, in agar plate assay. Schuermanns, Duncan, and Olson, 773
Mammal, acute leukemia in New South Wales koala. Heuschele and Hayes, 1394
Mammary adenocarcinoma. See also Adenocarcinoma.
—, adenine triphosphatase activity of cell fractions of, in mouse. Miller and Goldfreid, 64
—, in mouse, cytoxin somewhat inhibitory on. Sugitani, Schmid, and Schmid, 1412
Mammary adenocarcinoma 72j. See Adenocarcinoma 72j
Mammary adenocarcinoma dbr, dye-sensitized photoinactivation of, in vitro. Bellin, Moln, and Oster, 1365
Mammary adenocarcinoma DRRB 109, CCRF cell line of, effect of Cytoxan on culture of. Foley, Friedman, and Morris, 152
Mammary carcinoma. See also Carcinoma.
Mammary carcinoma 755. See Adenocarcinoma 755.
Mammary carcinoma SDB1, spontaneous, in mice, immunological study of. Wiegell, 365
Mammary carcinoma SDB2, spontaneous, in mice, immunological study of. Wiegell, 365
Mammary gland, mammary duct stimulation by tumor transplants in mice. Argyris and Argyris, 73
—, normal, quantitative and histochemical analysis of heavy metals in, in rat. Arnold and Sasse, 781
—, rat, factors affecting polynuclear hydrocarbon level in. Bock and Ito, 1024
—, rat, tumors of, produced by N-hydroxy-2-acetylamino-fluorene. Miller, Miller, and Hartmann, 815
—, spontaneous tumors of, histochemical analysis of heavy metals in, in rat. Arnold and Sasse, 781
—, tumorigenesis of, in mice, effects of pituitary isograft on. Liebelt and Liebelt, 86
Mammary tumor agent, effects of single pituitary isograft on mammary tumorogenesis in mice, in presence or absence of. Liebelt and Liebelt, 86
Mammary tumors, induced in hamsters with oral 20-methylcholanthrene. Della Porta, 575
—, induced in hamster with urethan. Toth, Tomatis, and Shubik, 1387
—, induced in rodents by ionizing radiation. Yokoro, Furth, and Haran-Ghera, 178
—, induction in mice, with mammotrophin. Haran-Ghera, 790
—, spontaneous, accelerated development in mice pretreated with mammary tumor tissue. Hirsch and Iversen, 792
—, spontaneous and methylcholanthrene-induced, lack of effect of mixed bacterial toxins on, in mouse. Havas and Donnelly, 17
Mammotrophin, role in mammary tumor induction in mice. Haran-Ghera, 790
Mammotropit pituitary tumors, induced in rodents by x-rays. Yokoro, Furth, and Haran-Ghera, 178
Marrow, bone. See Bone marrow.
MB III, nonmalignant strain of lymphoblasts, glycolytic properties in vitro. Honenburg, Bos, deBruyn, and Emmelot, 358
MB VIA, malignant strain of lymphoblasts, glycolytic properties in vitro. Honenburg, Bos, deBruyn, and Emmelot, 358
Mecca lymphosarcoma. See Lymphosarcoma Mecca.
Mechlorethamine. See Methylbism-chloroethyI)amine.
3'-Me-DAB. See 3'-Methyl-4-dimethylaminobenzene.
Medium, culture, effect on chromosome number of Krebs-2 ascites carcinoma. Ely and Gray, 1029
Melanin formation, in human melanomas in tissue culture. Rose and Stehlin, 1455
Melanoma, human, Golgi complex and melanin formation in Golgi complex. Rose and Stehlin, 1455
—, human cells, tissue-cultured, studied with phase contrast microscopy. Rose, 706
—, malignant, in hamsters, growth and morphology of, pathologic characteristics of. Rosenberg, Kodani, and Rosenberg, 692
—, malignant, in hamsters, pathologic characteristics of melanotic and melanotic. Rosenberg, Assimacopoulos, Lober, Rosenberg, and Zimmermann, 697
—, mouse, efficacy of phenylalanine mustard against. Lack, 262
Melanoma Cloudman S-91. See Cloudman melanoma S-91.
Melanoma Harding-Passey. See Harding-Passey melanoma.
Melanotic tumors, induced in hamster by urethan. Toth, Tomatis, and Shubik, 1387
—, white hamster, induced by dimethylbenzantracene. Rappaport, Pietra, and Shubik, 601
Melphalan. See Sarcodysin.
6-Mercaptopurine, and derivatives, tested against Carcinoma 755. Schabel, Montgomery, Skipper, Laster, and Thomson, 690
—, cytotoxic effectiveness of, against Sarcoma 180 ascites. Mihich, Mulhern, Hornung, and Nichols, 392
—, drug sensitivity of frozen and nonfrozen tumors to. Sugitani, 496
—, effect alone and with azaserine on ascites tumor cells in vivo. LePage and Jones, 642
—, effect on bone marrow and tumor tissue of mice treated with. Vogel, 636
—, effect on metabolism of adenine and guanine in human leukocytes in vitro. Shapira, Bornstein, Wells, and Winzler, 265
—, ineffective against leukemia L1210 when cells inoculated into brain. Skipper, Schabel, Trader, and Thomson, 1144
—, lack of effect on transplantable mouse leukemia. Chirigos, Moloney, Humphreys, Mantel, and Goldin, 803
—, review on metabolic approaches to chemotherapy. Welch, 1475
—, ribonucleoside of, effective against Carcinoma 755. Schabel, Montgomery, Skipper, Laster, and Thomson, 690
—, tested against various mouse tumors with tumor-marrow index. Vogel, 1430
—, tumor-bearing mice treated with, and concentrations of enzymes, nitrogen, and DNA in tumor. Fodor, Clarke, and Bodansky, 292
—, variations in sensitivity to, among five mammalian cell lines used in agar plate assay. Schuurmans, Duncan, and Olson, 773
6-Mercaptopurine-S35, incorporation into nucleic acids of transplantable mouse tumors. Bieber, Dietrich, Ellon, Hitchens, and Martin, 228
Metals, heavy, histochemical analysis of, in spontaneous and induced primary tumors in rats. Arnold and Sasse, 761
Metastases, blood-borne, effect of age of host on incidence of, in mice. Estensen and Baserga, 799
Mitochondria—Continued

---, change in small intestine after 20-methylcholanthrene, electron microscopy. Burt, Killmeyer, Thompson, and Grauer, 1417
---, characteristics of, in normal cells in growth and function in epithelium of human cervix. Mukherjee, De, and Mitra, 314
---, normal and neoplastic, rat tissues, phosphorylation. Aisenberg, 295
---, normal and neoplastic, respiration in. Aisenberg, 295

Mitomycin C, drug sensitivity of frozen and nonfrozen tumors to. Sugiura, 496
---, effect on bone marrow and tumor tissue of mice treated with. Vogel, 636
---, ineffective against leukemia L1210 when cells inoculated into brain. Skipper, Schabel, Traylor, and Thomson, 1154
---, variations in sensitivity to, among five malignant cell lines used in agar plate assay. Schuurmans, Duncan, and Olson, 773

Mitois, in human leukocytes in vitro, inhibited by prednisolone. Nowell, 1518
---, in L1210 ascites tumor and normal rat bone marrow, effect of vincristine on. Cutts, 168
---, metaphase arrest, by vincristine in normal bone marrow and leukemic cells, in mice. Cardinali, Cardinali, and Blair, 114

Mitotic index, of hepatoma transplants in mice after partial hepatectomy. Trotter, 1778

Mixed agglutination reaction, in normal and malignant cells. Coombs, 1198

Mixed antiglobulin reaction, in normal and malignant cells. Coom, 1198

Miyono adenocarcinoma, effect of cytogenox on. Sugiura, Schmid, and Schmid, 1412
---, mouse, transplantability after frozen storage. Sugiura, 496

Mold, inhibition of Ehrlich ascites tumor by nucleoside from, called vorydecacin. Jagger, Krecich, and Guarino, 216

Moloney virus, leukemia induced with, in mice, response to drug therapy. Chirigos, Moloney, Humphreys, Mantel, and Goldin, 993

Mono-N-fluorethoxetanate, tumor and narrow damage from, in mice bearing 6CHSIED lymphosarcoma. Vogel, 783

Moore sarcoma No. 1, antitumor activity of cytogenox against, in rat. Sugiura, Schmid, and Schmid, 1412

Morris hepatoma 3683, glutamic-oxalacetic transaminase activity of, in rat. Dyer, Gullino, Ensfield, and Morris, 1522
---, 5-hydroxytryptophan decarboxylase and serotonin deaminase activity in, in rat. Kizer and Chan, 489
---, studies on cachexia of rats bearing. Rechcigl, Grantham, and Greenfield, 288

Morris hepatoma 3924-B, 5-hydroxytryptophan decarboxylase and serotonin deaminase activity in, in rat. Kizer and Chan, 489

Morris hepatoma 5123, phosphate enzymes in. Weber, Banerjee, and Morris, 1009
---, carbohydrate metabolism in. Weber, Morris, Love, and Ashmore, 1406
---, effect of dietary protein on inducible enzymes in, in rat. Pitot, Pottier, and Morris, 1009
---, glutamic-oxalacetic transaminase activity of, in rat. Dyer, Gullino, Ensfield, and Morris, 1522
---, 5-hydroxytryptophan decarboxylase and serotonin deaminase activity in, in rat. Kizer and Chan, 489
---, metabolism of drugs in vitro by, in rat. Adamson and Fouts, 667
---, rat, tryptophan pyrrolole and tyrosine a-ketoglutarate transaminase in. Pitot and Morris, 1009
---, sublines A, B, and C, activities of deoxyoctylidate deaminase and thymidylate synthetase in. Maley and Maley, 1412
---, thymidine incorporation and DNA content of slices of. Aisenberg, 1260

Murphy-Sturm lymphosarcoma. See Lymphosarcoma Murphy-Sturm.

Muscate, leg. cortisone effect on sulfonamide distribution in rats and mice. Malejka, Argus, and Ray, 767
---, mouse, metabolism of 5-amino-2-pyrimidone(SA)-4-(5-yl)imidazole and related compounds in. Henderson and Jungs, 118

Mustards, phenylalanine, efficacy against mouse melanoma. Luck, 262

Myotic agents, relative immunologic capacity of leukemic mice to. Murphy and Syverton, 192

Myleran, effect on nucleic acid biosynthesis in mouse leukemia. Trams, Nadkarni, and Smith, 567
---, incorporation into DNA of regenerating liver and tumor ases isomers. Trams, Nadkarni, and Smith, 567
---, tested against various mouse tumors with tumor-narrow index. Vogel, 1450

Myosin, test for, in rhabdomyosarcomas, by fluorescent antibody technic. Hiramoto, Jurandowski, Bernecky, and Pressman, 383

N-Aphthylisothiocyanate, intoxication of rats by, and fibrogenesis in the liver. Hutterer, Rubin, Singer, and Popper, 396

Nelson ascites tumor, mouse, transplantation after frozen storage. Sugiura, 496

Neoplasms. See Tumors.

Neoptotirin, metabolism in normal and tumorous liver, in rat. Adamson and Fouts, 667

New South Wales koala. See Koala.

Nicotin antagonist, 6-amino-nicotinamide and Adenocarcinoma 755 enzymatic systems. Dietrich and Martin, 361

N-Nitrobenzoic acid, metabolism in normal and tumorous liver, in rat. Adamson and Fouts, 667

Nitrogen, concentration in Sarcoma 180, in mice treated with 6-mercaptopurine. Fodor, Clarke, and Bodiansky, 232
---, content in Morris hepatoma 5123 cells, decreased compared with control liver. Weber, Banerjee, and Morris, 1009
---, effect on enzymatic pattern of strain L cells. Adebojola, Bensch, and King, 234
---, in normal and neoplastic tissue cell fractions. Aisenberg, 295
---, retention by normal and tumor-bearing rats. Rechcigl, Grantham, and Greenfield, 298

Nitrogen mustard. See Methylythyl(2-chlorethyl)amine.

Nitromin, cytogenox more effective as antitumor agent than. Sugiura, Schmid, and Schmid, 1412

Nuclei. See also Cell fractionation.

Nucleosides, adenosine triphosphate activity of, from mouse mammary adenocarcinoma. Miller and Goldfeder, 64
---, liver and tumor, ultrastructure of nuclear envelope. Barton, 198
**Index to Volume 21**

**Nucleic acids. See also Deoxyribonucleic acid and Ribonucleic acid.**
- adenine and guanine metabolism in normal and leukemic human leukocytes. Shapira, Bornstein, Wells, and Winzler, 265
- binding of chloroquine mustard to, in vitro. Rutman, Steele, and Price, 1124
- biosynthesis of, effect of 6-chlorouracil on, in rat liver in vitro. Duggan, Weigert, and Titus, 1047
- effect of antitumor compounds on precursor utilization for synthesis of pyrimidines. Eidinoff, Knoll, Marano, and Klein, 1377
- effect of thioTEPA on synthesis of, in tumor-bearing mice. Pradhan, West, Baird, and Steward, 984
- effects of 4-aminopyrazolo[3,4-d]pyrimidine and of 1-methyl-4-aminopyrazolo[3,4-d]pyrimidine on pyrimidine metabolism in ascites tumors. Henderson and Junga, 119
- from isologous newborn, adult, and neoplastic thymus, chromatographic fractionation of. Smith and Kaplan, 1148
- incorporation of 6-mercaptopurine-53S into, in transplantable mouse tumors. Bieber, Dietrich, Elion, Hitchings, and Martin, 228
- interaction of alkylation agents with, in mouse ascites lymphomas. Trans, Nadjarkni, and Smith, 560
- mechanism of action of 6-thioguanine, in mouse. LePage and Jones, 1590
- metabolism of 4-aminopyrazolo[3,4-d]pyrimidine in normal and neoplastic tissues. Henderson and Junga, 118
- of Ehrlich cells, alkylation of, by chloroquine mustard and nitrogen mustard, in vitro. Rutman, Steele, and Price, 1154
- 5'-Nucleotidase, adrenal, activity increased by Sarcoma 180 growth. Hilf, Breuer, and Borman, 1490
- 5'-nucleotidases, activity in Sarcoma 180, in mice treated with 6-mercaptopurine. Fodor, Clarke, and Bodansky, 232

—, mouse, chromosome variation in. Ruddle, 885

—, relative immunologic capacity of leukemic mice to. Murphy and Syverton, 921

—, streptovitacin A, variations in sensitivity to, among five mammalian cell lines used in agar plate assay. Schuurmans, Duncan, and Olson, 773

Strain PK cells, chromosome variation in. Ruddle, 885

—, Streptococcus pyogenes, and Serratia marcescens, effect of preparations from, on mouse tumors. Havas and Donnelly, 17

—, relative immunologic capacity of leukemic mice to. Murphy and Syverton, 921

—, streptovitacin A, variations in sensitivity to, among five mammalian cell lines used in agar plate assay. Schuurmans, Duncan, and Olson, 773

Strophalin K, variations in sensitivity to, among five mammalian cell lines used in agar plate assay. Schuurmans, Duncan, and Olson, 773

Styrylquinoline, derivative of, effect on glycolysis of lymphoblasts in vitro. Homburg, 1386

Subcommittee on Carcinogenesis, Food Protection Committee. Problems in the evaluation of carcinogenic hazard from use of food additives, 524

Sucinate oxidation, in normal and neoplastic mitochondria. Aisenberg, 292

Succinic dehydrogenase, absent in Walker carcinoma, by histochemistry. Fisher and Fisher, 527

—, in rat pituitary, effects of estrogens on. Bultrus and Melchior, 1890
Index to Volume 21

Succrose, permeability of normal liver and of hepatoma to, in rats. Humphrey, 1278
Sulphhydril groups, soluble, correlated with histopathology in hamster cheek pouch during carcinogen application. Morris, Scott, and Reikin, 1352
Sulfonamide, effect of cortisone on distribution of, in rats and mice. Malejska, Argus, and Ray, 673
Sulfur-35, uptake by connective tissues surrounding irradiated mouse skin tumors. Dubhig, 485
Sulfur mustard, incorporation into DNA of regenerating liver and mouse ascites tumors. Trans, Nadkarni, and Smith, 509
Supernatant fraction. See Cell fractionation.
Supplements. See also Chemotherapy.

T 3 ascites tumor, effect of purinethiol derivatives on mice in vivo. LePage and Jones, 642
  —, effect of 6-thioguanine on survival of mice bearing. LePage and Jones, 1590
  —, established as viable cell strain shows in tissue culture. Guerin and Morgan, 378
  —, ribonuclease activity of. Colter, Kuhn, and Ellen, 18
TEM. See Triethylenemelamine.
TEPSA. See Triethylenephosphoramide.
Tests, phosphorylation in normal and neoplastic mitochondria, in rat. Aisenberg, 304
  —, rat, respiration in mitochondria and homogenate of. Aisenberg, 295
  —, rat, thymidine incorporation and DNA content of slices of. Aisenberg, 1560
Testosterone, alone or with diethylstilbesterol, effect on Adenocarcinoma 755 metabolism. Dietrich and Martin, 301
  —, inhibition of irradiation-induced leukemia in mice by. Wasil and Block, 483
Tetrahydroelatericin A, antitumor effect tested, in mice. Gitter, 1362
Thioguanine, compared with thioguanosine, clinical evaluation. Kruskall, Ellison, and Tan, 1015
  —, mechanism of action of, in mice. LePage and Jones, 1250
Thioguanosine, clinical evaluation of, compared with thioguanine. Schabel, Montgomery, Skipper, Laster, and Thomson, 690
  —, mechanism of action of, in mice. LePage and Jones, 1590
  —, variations in sensitivity to, among five mammalian cell lines used in agar plate assay. Schuermann, Duncan, and Olson, 743
Thioguanosine, clinical evaluation of, compared with thioguanine in leukemias. Kruskall, Ellison, and Tan, 1015
  —, effectiveness against Carcinoma 755, in mice. Schabel, Montgomery, Skipper, Laster, and Thomson, 690
Thioline, photoactivation of tumor cells in vitro sensitized by. Bellin, Mohos, and Oster, 1365
ThioTEPA. See N,N', N'-Triethylenetriphosphoramide.
Thorotrast, reticuloendothelial interference with, effect on hepatic metastases. Fisher and Fisher, 275
Threonine dehydrase, effect of dietary protein on, in rat liver and Hepatoma 5123. Piot, Potier, and Morris, 1001
Thymidine, exogenous, incorporation into DNA of mammalian cells in vitro. Kiris and Revis, 1141
  —, turnover in mouse marrow and intestine, and response to 5-fluorouracil, in vivo. Field, Kiris, and Tung, 2
Thymidine-2-C14, uptake in DNA synthesis, in normal and neoplastic tissues. Aisenberg, 1560
Thymidylate synthetase, in normal and neoplastic rat liver. Maley and Maley, 1421
Thymus, and irradiation-induced leukemia in mice, effect of testosterone. Wasil and Block, 483
  —, nucleic acids from isologous newborn, adult, and neoplastic thymus, chromatographic fractionation of. Smith and Kaplan, 1148
  —, weight reduced by cortisone, in rats and mice. Malejska, Argus, and Ray, 673
Thyroid gland, of rat, induction of neoplasms in, by x-radiation of gland. Lindsay, Sheline, Potter, and Chaihoff, 9

Thyroid hormone, effect on implants of mouse pituitary thyrotrropic tumors. Werner and Grinberg, 522

Thyrotrrophic tumors, pituitary, mouse, survival of implants during prolonged suppression by thyroid hormone. Werner and Grinberg, 522

Time-lapse cinematography, of human melanomas in tissue culture. Rose and Stehlin, 1455

Tissue culture, See also Culture.
---, chromosome variation in cell populations derived from pig kidney. Rudde, 685
---, growth and morphologic of transplanted melanotic and amelanotic hamster tumors in. Rosenberg, Kodani, and Rosenberg, 836
---, growth of L-fibroblasts in diffusion chambers in resistant mice in vivo. Gabourel, 506
---, inactivity of cyclophosphamide in mammalian cell culture. Foley, Friedman, and Drolet, 57
---, inhibition of human leukocyte mitosis by prednisolone. Nowell, 1518
---, of human melanoma, Golgi complex and melanin formation in. Rose and Stehlin, 1455
---, of K404-2 ascites carcinoma, chromosome number when cultured in vivo and in vitro. Ely and Gray, 1020
---, of leukemia L5178Y cells, mouse, requirement for x-asparagine. Halay, Fischer, and Welch, 332
---, of nonmalignant and malignant lymphoblasts, glycocytic and respiratory properties of. Homborg, Bos, deBruyn, and Emmelot, 353
---, of Strain L cells, effect of nitrogen on enzymatic pattern. Adebonojo, Borsch, and King, 322
---, TA3 and Ehrlich ascites tumors established as permanent cell strains. Guerin and Morgan, 378
---, transplantation of cell lines from, to animals. Manuelidis, 876

Tissue culture system, in large-scale cancer chemotherapy screening. Topfin, 1042

Tissue distribution, of radioactive after administration of 4-aminopyrazolo(3,4-d)pyrimidine-C14 in mouse. Henderson and Junga, 115

Tissues, normal, quantitative and histochemical analysis of heavy metals in, in rat. Arnold and Sasse, 761

Tobacco tar, skin tumors induced in mice with, lack of effect. Gabourel, 506

Toxins, mixed bacterial, in treatment of induced, spontaneous, and transplanted mouse tumors. Havas and Donnelly, 17

Toxoid hormone preparation, composition and properties of, from human malignant tissues. Yunoki and Griffin, 537

TPN-linked dehydrogenase, activity in human choriocarcinoma homogenates. Kellogg, 319

Transaminase, alanine-a-ketoglutamate, activity and growth of Walker tumor with cortisol. Rosen, Budnic, Solomon, and Nichol, 620
---, glutamic-oxalacetic, activities of liver and other tumors in the rat. Dyer, Guillino, Enafeld, and Morris, 1342
---, glutamic-oxalacetic, in rat pituitary, effects of estrogens on. Baltrus and Melchor, 1360

Transhydrogenase, estradiol-sensitive, activity in human choriocarcinoma homogenates. Kellogg, 319

Transplantability, of Sarcoma 180 ascites, effect of tumor-inhibitory agents on. Mihich, Mulherm, Hornung, and Nichol, 323
---, of various tumors after frozen storage. Sugira, 496

Transplantable animal cancer, as primary standard, guest editorial. Potter, 1381

Transplantation, effect of partial hepatectomy on subcutaneously transplanted hepatomas in mice. Trotter, 778
---, freeze-preservation of cell suspensions and use in, of tumors. Vaitkevicius, Simpson, and Brennan, 187
---, heterologous, of spontaneous leukemia from mice into newborn rats. Kirsten, Anderson, and Platz, 707

---, heterologous, of tissue culture lines to various animals. Manuelidis, 876
---, heterologous tissue, effect on adrenal adenine nucleotide-metabolizing enzymes. Hill, Breuer, and Borman, 1439
---, of mouse sarcomas, changes in tumor susceptibility with reversal of polydactylysm. Isberwood and Strong, 796
---, of polyoma virus-induced tumors in mice. Sjogren, Hellstrom, and Klein, 329
---, of Sarcoma 180 tumor in mice, mammary duct stimulation by. Argyris and Argyris, 75
---, of single pituitary isograft, into mice, effects on mammmary tumorigenesis. Liebelt and Liebelt, 86
---, of spontaneous kidney tumor of the rat. Babcock and Southam, 130
---, of tumors in rats and mice, effect of underfeeding. White, 281
---, of varying tumor cell numbers, and effect of guinea pig serum, in Walker 256 rat tumor. Kwak, Jameson, Ryan, and Kurtz, 44

Trauma, surgical, as co-carcinogen, with dibenzpyrene, in mouse. Gottfried, Molomut, and Patti, 658

Triamcinolone, effect on methylcholanthrene-induced sarcomas in mice. Nakai, 221

Triethylenemelamine, C14-labeled, incorporation into DNA of regenerating liver and mouse ascites tumors. Trams, Nadkarni, and Smith, 560
---, effect on mouse lung metastases, following intravenous injection of tumor cells. Kondo and Moore, 1396
---, effect on virus-induced mouse leukemia and transplantable leukemia. Chirigos, Moloney, Humphreys, Mantel, and Golkin, 583
---, tested against various mouse tumors with tumor-marrow index. Vogel, 1450

N.N',N'-Triethylenephosphoramide, cytotoxic effectiveness of, against Sarcoma 180 ascites. Mihich, Mulherm, Hornung, and Nichol, 323
---, effect on bone marrow and tumor tissue of mice treated with. Vogel, 636
---, effect on synthesis of protein and nucleic acids in tumor-bearing mouse. Pradhan, West, Baird, and Steward, 984
---, response of normal and tumorous human tissues to, in culture. Cobb, Walker, and Wright, 588
---, tested against various mouse tumors with tumor-marrow index. Vogel, 1450

Triglyceride fatty acids, in epididymis and dermis of mice during carcinogenesis by methylcholanthrene. Carruthers and Davis, 82

Trypan blue staining, of cultured Walker 256 tumor cells, affected by normal rabbit serum. Tuttle and Foushee, 735

Tryptophan, effect of administration of, on tryptophan pyrrolase in rat liver and Hepatoma 5128. Pitot and Morris, 1009
---, excretion of metabolites of, during cyclophosphamide treatment of mast-cell neoplasm, in mouse. Mengel and Kelly, 1342
---, in modifying effect of vincaleukoblastine on dividing cells in vivo. Cutts, 168
---, metabolism of, rats, effect of feeding of 3'-methyl-4-dimethylaminoazobenzene on. Petasnick, Brown, and Price, 1400

Tryptophan pyrrolase, effect of dietary protein on, in rat liver and Hepatoma 5128. Pitot, Potter, and Morris, 1001
---, in rat liver and Hepatoma 5128. Pitot and Morris, 1009
---, rat liver, decreased after feeding of 3'-methyl-4-dimethylaminoazobenzene. Petsanick, Brown, and Price, 1100

Tumor growth, and underfeeding, in rats and mice. White, 261
---, effect of varying implant cell numbers on, in rat. Kwak, Jameson, Ryan, and Kurtz, 44
---, immunological depression in mouse strain systems. Wiggell, 365
---, of Ehrlich ascites cells, inhibited by corydcephlin. Jagger, Kredich, and Guarino, 216
Index to Volume 21

Tumorigenesis. See Carcinogenesis.

Tumor induction, immunity to sarcoma and induction of leukemia in mice. dePasquale, Holmgren, Rabasa, and Pavlovsky, 387

Tumor lipids, lipide hapten in gastrointestinal tract, in human. Grunewald, and Brandt, 1385

Tumor-marrow index, laboratory evaluation of antineoplastic compounds. Vogel, 1430

Tumor progression, and chromosomes in development and cancer. Hauschka, 957

Tumor, promotion, by Euphorbia latices. Roe and Peirce, 338

Tumors, at various sites, induced in hamster by urethan. Graf, Rapport, and Brandt, 1001

Tumor-marrow index, laboratory evaluation of antineoplastic compounds. Vogel, 1430

Tyrosine, a-ketoglutarate transaminase, in rat liver and Hepatoma 5128. Pitot and Morris, 1099

Tyrosine, effect of administration of, on tyrosine a-ketoglutarate transaminase in rat liver and Hepatoma 5128. Pitot and Morris, 1099

carcinogenesis with, in hamster. Toth, Tomatis, and Shubik, 1397

test for effect on nucleic acid pyrimidine synthesis in rat tissues. Eidnoff, Knoll, Marano, and Klein, 1377

with x-rays or estrogen, leukemogenic effect of, in mice, influence of colchicine on. Kawamoto, Kirschbaum, Trentin, and Taylor, 309

Uricase, in rat liver, inhibited by 6-chlorouracil in vitro. Duggan, Weigert, and Titus, 1047

Uridine, incorporation into nucleic acids of leukemic cells in culture. Pasternak, Fischer, and Handschuhammer, 110

Urine bladder, damaged in rats and dogs by cyclophosphamide. Philips, Sternberg, Crown, and Vidal, 1577

Urinary metabolites, of N-2-fluorobenzylamine, chromatography of. Weisburger, Grantham, Morris, and Weisburger, 949

Urinary bladder, damaged in rats and dogs by cyclophosphamide. Philips, Sternberg, Crown, and Vidal, 1577

Urinary bladder, damaged in rats and dogs by cyclophosphamide. Philips, Sternberg, Crown, and Vidal, 1577

V. carcinoma, passage of cells of, through capillaries in rabbits. Zeidman, 38

Vaccinia hemagglutinin, inhibitor of, in ascites of Ehrlich carcinoma of mouse. Wolin, 1030

Vaccine, antitumor effect of psicofuranine on rats bearing. Wolin, 1030

Virus-induced tumors, polyoma, in mice, transplantation of. Toth, Tomatis, and Shubik, 1397

Virus-lymphoid leukemia induced with. Response to drug therapy. Chirigos, Moloney, Humphreys, Mantel, and Goldin, 905

Viral carcinogenesis, cell differentiation as determinant of susceptibility to, symposium paper. Kaplan, 981

Viruses, tumor, effect on cell behavior. Rubin, 1244

Virus-like particles, in association with L strain cells. Dales Anido, and Mantel, 869

Vitamin, antagonist of, clinical experience with 6-aminonicotinic acid. Herter, Weismann, Thompson, Hyman, and Martin, 31

Walker carcinosarcoma 256, amino acid and protein metabolism in cell cultures of. Green and Miller, 1034

Walker carcinosarcoma 256, amino acid and protein metabolism in cell cultures of. Green and Miller, 1034
Walker carcinosarcoma 256—Continued

---, metabolism of radioactive albumin in rats bearing.
Busch, Fujitaya, and First, 371
---, nonspecificity of hexokinase for glucose in preparations
from. Lange and Koln, 1025
---, normal rabbit serum cytotoxic for, in tissue culture.
Tuttle and Foushee, 735

---, phosphorylation in normal and neoplastic mitochondria,
in rat. Aisenberg, 304

---, rat, effect of implant cell numbers on takes of, and
inhibitory effect of guinea pig serum on. Kwak, Jameson,
Ryan, and Kurtz, 44
---, rat, respiration in mitochondria and homogenate of.
Aisenberg, 355

---, rat, transplantability after frozen storage. Sugiura, 496

---, thymidine incorporation and DNA content of slices of.
Aisenberg, 1960

Warburg's theory, data in contradiction to, on lymphoblasts
in vitro. Homburg, Bos, de Bruyn, and Emmeloet, 333

Water, retention by normal and tumor-bearing rats. Reich-
cigl, Grantham, and Greenfield, 238

Weight loss, host, relation to false positives in evaluation of
anticancer agents. Laster, Schabel, Skipper, Wilcox, and
Thomson, 895

Xanthine-8-C14, anabolism and catabolism of, by minced neo-
plasms and minced tissues of rats and mice. Wheeler and
Alexander, 399
---, metabolism in various rat and mouse tissues in vitro.
Wheeler and Alexander, 399

Xanthine oxidase, in rat liver, inhibited by 6-chloropurine in
vitro. Duggan, Weigert, and Titus, 1047

X-ray radiation. See also Irradiation and Radiation.
---, effect on differentiation of human embryonal carcino-
a. Midgley and Pierce, 545

---, effect on nucleic acid biosynthesis in mouse leukemia.
Trams, Nadkarni, and Smith, 567

---, leukemogenic effect of, in mice, influence of colchicine
on. Kawamoto, Kirschbaum, Trentin, and Taylor, 309

---, mammatropic pituitary tumors induced in rodents by.
Yokoro, Furth, and Haran-Ghara, 178

---, of PK cells, effect on chromosome variations. Ruddle, 885

---, of thyroid gland, in induction of neoplasms in the rat.
Lindsay, Sheline, Potter, and Chaikoff, 9

Yoshida ascites hepatoma, electron microscopy of cells of.
Bairati, 989

Yoshida hepatoma AH 130. See Yoshida ascites hepatoma.

Zinc, histochemical analysis of, in spontaneous and induced
primary tumors in rats. Arnold and Sasse, 761
