N-B-G Kit Aids Study of Leukocytes in Blood Film!

Recent research reports indicate that Naphthol AS-E Phosphate is especially useful for study of leukocytes in blood film. Previous research had reported the value of this and other Naphthol compounds for demonstration of alkaline or acid phosphatase in frozen sections mounted on glass slides.

To aid in these studies NBCo has prepared a convenient, economical kit of nine Naphthol AS phosphates, each bottle containing 250 mg. The complete kit at $13.95 represents 20% savings over the individual price schedule... another instance when important biochemicals come from NBCo at important savings.

NBCo... world's largest biochemicals house with more than 2600 products of unsurpassed quality... delivers anywhere, with utmost speed and dispatch.
