COVER LEGEND

M. A. Novinsky (1841–1914), a Russian veterinarian, in 1875–1876 first transplanted malignant neoplasms successfully from one animal to another, using dogs. His contribution was recognized by recent reviews of his work by Shabad of Moscow and by Shimkin (Cancer, 8: 652-653, 1955). The drawings of transplanted tumors are from Novinsky’s thesis for a Master’s degree, printed in St. Petersburg in 1877. The portrait is from L. M. Shabad, “M. A. Novinsky,” Moscow, Acad. Med. Sci., USSR, 1950.
