|      | John E. Byfield and Justin J. Stein.                                                             | H. L. Falk.                                                            |
| 2233 | Symposium on Carcinogens of Plant Origin.                                                        |                                                                       |
| 2282 | Biochemical Responses to Aflatoxins.                                                             | Gerald N. Wogan.                                                       |
| 2288 | Comparative Aspects of Aflatoxin-induced Hepatic Tumors.                                        | M. C. Lancaster.                                                       |
| 2293 | Toxicity to Experimental Animals of 943 Isolates of Fungi.                                      | C. M. Christensen, G. H. Nelson, C. J. Mirocha, and Fern Bates.        |
| 2312 | Synergism between Cyclopropenoid Fatty Acids and Chemical Carcinogens in Rainbow Trout (Salmo
Physiologic Activity of Some Fungal Estrogens Produced by Fusarium.  
C. J. Mirocha, C. M. Christensen, and G. H. Nelson.

Effects of Teratogenic Agents in Range Plants.  
Wayne Binns, Lynn F. James, Richard F. Keeler, and Lew Dell Balls.

The Influence of a Low Lipotrope Diet on Response of Maternal and Fetal Rats to Lasiocarpine.  
P. M. Newberne.

Cocarcinogenic Principles from the Seed Oil of Croton tiglium and from Other Euphorbiaceae.  
Erich Hecker.

Tumor-promoting Agents from Croton tiglium L. and Their Mode of Action.  
B. L. Van Duuren and A. Sivak.

Tobacco Carcinogenesis.  
B. L. Van Duuren.

The Nature of Tumor-promoting Agents in Tobacco Products.  
Fred G. Bock.

A Geographic Study of the Relationship between Oral Cancer and Plants.  
Lucia J. Dunham.

The Carcinogenicity of Essential Oils, Flavors, and Spices: A Review.  
F. Homburger and Eliahu Boger.

The Mutagenic Action of Caffeine in Higher Organisms.  
Wilhelm Kuhlmann, Hans-Georg Fromme, Eva-Maria Heege, and Wolfram Oster TAG.

The Effects of Soil and Diet on Disease.  
E. F. Rose.

Toxicologic Research on Substances from Fusarium nivale.  
Takashi Tatsuno.

COVER LEGEND

Edgar Allen (1892–1943) was an internationally known authority on the physiology of sex and reproduction and was one of the best known anatomists of his era. He demonstrated, in 1923, that the ovarian follicle was a source of a hormone, which was extracted and purified in collaboration with E. A. Doisy (E. Allen and E. A. Doisy, J. Am. Med. Assoc., 81: 819–821, 1923). Later he investigated the relation of ovarian hormones to the genesis of cancer of the genital tract (E. Allen and W. U. Gardner, Cancer Res., 1: 359–366, 1941). An obituary appears in Science, 97: 368–369, 1943.

William Ullman Gardner (b. 1907), an associate of Allen, succeeded him as Professor of Anatomy at Yale University. Gardner has made many contributions to our knowledge of the role of hormones in neoplasia, of the role of heredity to hormonal and neoplastic responses, and of hormonal imbalance in tumorigenesis (cf. Cancer Res., 2: 476–488, 1942; Ibid., 5: 497–505, 1954; Ibid., 8: 397–411, 1948). His influence extends through his students, many of whom made their initial discoveries under his guidance. He was President of the American Association for Cancer Research, 1946–1947, and occupies important posts in national and international cancer organizations.

We are indebted to Yale University for the portraits; Allen (left); Gardner (right).
SYMPOSIUM

Sponsored by the
International Union Against Cancer

SYMPOSIUM ON CARCINOGENS OF PLANT ORIGIN

Held at
National Institutes of Health
Bethesda, Maryland
April 8-10, 1968
Program

List of Participants ................................................................. 2235
Introductory Comments

Hans L. Falk ................................................................. 2236
Toxicology and Carcinogenic Action of Pyrrolizidine Alkaloids

R. Schoental ................................................................. 2237
The Induction of Neoplasms of the Urinary Bladder of the Cow and the Small Intestine of the Rat by Feeding Bracken Fern (Pteris aquilina)

J. M. Price and A. M. Pamukcu ............................................. 2247
The Radiomimetic Nature of Bracken Toxin

I. A. Evans ................................................................. 2252
Toxicology of Cycasin

G. L. Laqueur and M. Spatz ................................................... 2262
Plants Associated with Esophageal Cancer Cases in Curacao

Julia F. Morton ............................................................... 2268
Biologic Screening of Selected Plant Material for Carcinogens

R. W. O’Gara ................................................................. 2272
Carcinogens from Fungi Pathogenic for Man

F. Blank, O. Chin, G. Just, D. R. Meranze, M. B. Shimkin, and R. Wieder .................................................. 2276
Biochemical Responses to Aflatoxins

Gerald N. Wogan .............................................................. 2282
Comparative Aspects of Aflatoxin-induced Hepatic Tumors

M. C. Lancaster .............................................................. 2288
Toxicity to Experimental Animals of 943 Isolates of Fungi

C. M. Christensen, G. H. Nelson, C. J. Mirocha, and Fern Bates .................................................. 2293
Mycoxotins in Fermented Food

Synergism between Cyclopropenoid Fatty Acids and Chemical Carcinogens in Rainbow Trout (Salmo gairdneri)

D. J. Lee, J. H. Wales, J. L. Ayers, and R. O. Sinnhuber .................................................. 2312
Physiologic Activity of Some Fungal Estrogens Produced by Fusarium

C. J. Mirocha, C. M. Christensen, and G. H. Nelson .................................................. 2319
Effects of Teratogenic Agents in Range Plants

Wayne Binns, Lynn F. James, Richard F. Keeler, and Lew Dell Balls .................................................. 2323
The Influence of a Low Lipotrope Diet on Response of Maternal and Fetal Rats to Lasiocarpine

P. M. Newberne .............................................................. 2327
Cocarcinogenic Principles from the Seed Oil of Croton tiglium and from Other Euphorbiaceae

Erich Hecker ................................................................. 2338
Tumor-promoting Agents from Croton tiglium L. and Their Mode of Action

B. L. Van Duuren and A. Sivak .................................................. 2349
Tobacco Carcinogenesis

B. L. Van Duuren .............................................................. 2357
The Nature of Tumor-promoting Agents in Tobacco Products

Fred G. Bock ................................................................. 2363
A Geographic Study of the Relationship between Oral Cancer and Plants

Lucia J. Dunham .............................................................. 2369
The Carcinogenicity of Essential Oils, Flavors, and Spices: A Review

F. Homburger and Eliahu Boger .............................................. 2372
The Mutagenic Action of Caffeine in Higher Organisms

Wilhelm Kuhlmann, Hans-Georg Fromme, Eva-Marie Heege, and Wolfram Ostertag .................................................. 2375
The Effects of Soil and Diet on Disease

E. F. Rose ................................................................. 2390
Toxicologic Research on Substances from Fusarium nivale

Takashi Tatsuno .............................................................. 2393
Cancer Research
