Contents

1217 Tumorigenicity of N-Nitrosohexamethyleneimine.
   C. M. Goodall, W. Lijinsky, and L. Tomatis.

1223 Soluble RNA Ethylase Activity of Normal and Neoplastic Mouse Tissues.
   R. L. Hancock.

1231 The Establishment of a Cell Line of Human Hormone-synthesizing Trophoblastic Cells in Vitro.
   Roland A. Patillo and George O. Gey.

1237 Tyrosinase Activity in Serum from Normal and Melanoma-bearing Mice.
   I. Aravindakshan Menon and Herbert F. Haberman.

1242 Effect of Treatment with 1,3-Bis(2-chloroethyl)-1-nitrosourea or Cyclophosphamide on Spleen Colony-forming Units and Survival Time of Leukemic Mice.
   S. Vadlamudi, V. S. Waravdekar, J. N. Choudry, and A. Goldin.

1250 Heme Synthesis in Normal and Leukemic Leukocytes.
   Fumimaro Takaku, Osamu Wada, Shigeru Sassa, and Kiku Nakao.

1256 Ultrastructural Alterations Caused by Cytostatic Sugar-Alcohol Derivatives.
   K. Lapis and I. Benedeczky.

1275 Symposium: Conference on Tumor-specific Antigens.

1276 Program.

1278 Guests.

1279 Introductory Remarks.
   Jack W. Milder.

1280 Experimental Tumor Immunology.
   Chandler A. Stetson (Chairman), Edward A. Boyse, Lloyd J. Old, Elisabeth Stockert, Naoya Shigeno, Gayla Geering, Herbert F. Oettgen.

1300 Search for Tumor-specific Antigens in Human Tumors of Possible Viral Origin.
   Chandler A. Stetson (Chairman), Eva Klein, George Klein, Jagadish S. Nakdarni, Jayshree J. Nadkarni, Hans Wigzell, Peter Clifford, Frank J. Rauscher, Jr., Wallace P. Rowe, Andrew M. Lewis, Jr., Wilbur Fiske Noyes.

1326 Antigens of Chemically Induced Tumors.
   George Klein (Chairman), Richmond T. Prehn.

1331 Search for Tumor-specific Antigens in Other Human Cancers.

1357 Serologic Methods Applicable to the Study of Cell Antigens.

1404 Other Approaches in Studying Tumor Antigens.

1433 The Evaluation of the Immunologic Capability of Cancer Patients.
   Chester M. Southam (Chairman), Daniel G. Miller, John P. Merrill, Robert S. Schwartz.

1457 Miscellaneous.
   M. M. Sigel, R. A. Fugmann.

1460 Book Reviews.

Special Announcement: Availability of Reprints of Cover Photographs.
SYMPOSIUM

Sponsored by the
American Cancer Society

CONFERENCE ON TUMOR-SPECIFIC ANTIGENS

Held at the
Westchester Country Club
Rye, New York
November 13-15, 1967
LIST OF GUESTS

1278

Introductory Remarks

Jack W. Milder.

1279

EXPERIMENTAL TUMOR IMMUNOLOGY

Chandler A. Stetson, Chairman

1280

Genetic Origin of Tumor Antigens

Edward A. Boyse, Lloyd J. Old, Elisabeth Stockert, and Naoya Shigeno.

1288

Serologic Approaches to the Study of Cancer in Animals and in Man

Lloyd J. Old, Edward A. Boyse, Gayla Geering, and Herbert F. Oettgen.

1294

SEARCH FOR TUMOR-SPECIFIC ANTIGENS IN HUMAN TUMORS OF POSSIBLE VIRAL ORIGIN

Chandler A. Stetson, Chairman

1300

Surface IgM-kappa Specificity on a Burkitt Lymphoma Cell in Vivo and in Derived Culture Lines

Eva Klein, George Klein, Jagdish S. Nadkarni, Jayshree J. Nadkarni, Hans Wigzell, and Peter Clifford.

1311

Virologic Studies in Human Leukemia and Lymphoma: The Herpes-type Virus

Frank J. Rauscher, Jr.

1319

Serologic Surveys for Viral Antibodies in Cancer Patients

Wallace P. Rowe and Andrew M. Lewis, Jr.

1321

Verrucae: Virus Structure, Localization of Antigens, and Comparison with the Shope Papilloma

Wilbur Fiske Noyes.

1325

Summary: Experimental Tumor Immunology; and Search for Tumor-specific Antigens in Human Tumors of Possible Viral Origin

Chandler A. Stetson.

1326

ANTIGENS OF CHEMICALLY INDUCED TUMORS

George Klein, Chairman

1331

Tumor-specific Antigens of Putatively Nonviral Tumors

Richmond T. Prehn.

1335

Cellular Location of Carcinoembryonic Antigens of the Human Digestive System

Phil Gold, Michael Gold, and Samuel O. Freedman.

1338

Myelin as a Locus for Radioantibody Absorption in Vivo in Brain and Brain Tumors

Eugene D. Day.

1344

Production of Embryonal Serum α-Globulin by Hepatomas: Review of Experimental and Clinical Data

G. I. Abelev.

1351

The “Abnormality” of Myeloma Proteins

Henry G. Kunkel.

1354

Summary: Antigens of Chemically Induced Tumors; and Search for Tumor-specific Antigens in Other Human Cancers

George Klein.

1357

SEROLOGIC METHODS APPLICABLE TO THE STUDY OF CELL ANTIGENS

Ernest Witebsky, Chairman

1357

The Possible Use of Complement for the Detection of Cell Surface Antigens

Hans J. Müller-Eberhard.

1361

The Role of Cellular Antigens in Complement-induced Cytocidal, Immune Adherence, and Phagocytic Reactions

Robert A. Nelson, Jr.
The Study of Normal and Malignant Cell Antigens by Mixed Agglutination
Richard S. Metzgar and Samuel R. Oleinick. ................................................. 1366

Robert C. Mellors. ......................................................................................... 1372

Agglutination, Cytotoxicity, and Gel Diffusion Technics in Studies on Cell and Tissue Antigens.
Felix Milgrom. ............................................................................................... 1382

Cell-associated Hypersensitivity Studied in Vitro.
John R. David. ............................................................................................... 1387

Cell-associated Immune Reactions.
Baruj Benacerraf. ......................................................................................... 1392

Summary: Serologic Methods Applicable to the Study of Cell Antigens.
Ernest Witebsky. ........................................................................................... 1399

Other Approaches in Studying Tumor Antigens
Abraham G. Osier, Chairman

The Use of Tolerance to Reduce the Complexity of Reactions to Antigen Mixtures.
R. E. Billingham and Willys K. Silvers. ......................................................... 1404

The Use of Enhancement in Studying Tumor Antigens.
J. R. Batchelor. .............................................................................................. 1410

Human Histocompatibility Antigens in Normal and Neoplastic Tissues.
J. J. van Rood, A. van Leeuwen, A. Schippers, and H. Bainer. .................. 1415

Bases for the Recognition of Antigenicity.
G. J. V. Nossal and A. Abbot. ..................................................................... 1423

Summary: Other Approaches in Studying Tumor Antigens.
Abraham G. Osier. ......................................................................................... 1430

The Evaluation of the Immunologic Capability of Cancer Patients
Chester M. Southam, Chairman

The Immunologic Status of Patients with Nonlymphomatous Cancer.
Chester M. Southam. .................................................................................... 1433

The Immunologic Capability of Patients with Lymphoma.
Daniel G. Miller. ........................................................................................... 1441

The Immunologic Capability of Uremic Patients.
John P. Merrill. ............................................................................................. 1449

Are Immunosuppressive Anticancer Drugs Self-defeating?
Robert S. Schwartz. ...................................................................................... 1452

Summary: Evaluation of Immunologic Capability of Cancer Patients.
Chester M. Southam. ..................................................................................... 1455

Miscellaneous

Studies on Immunoglobulins Reactive with Tumor Cells and Antigens.
M. M. Sigel and R. A. Fugmann. ................................................................. 1457
