COVER LEGEND

The Japanese Foundation for Cancer Research, a forerunner of Japan's National Cancer Institute, was established in April 1908. In May 1934 the Foundation opened a cancer institute in Tokyo known as the Laboratories and Koraku Hospital of the Japanese Foundation for Cancer Research. Until World War II most of the financial aid for cancer investigations in Japan was provided by the Foundation (Nakahara, W., *Bull. Soc. Control Cancer*, 20: 10-11, 1938).

In February 1962 the present National Cancer Center Research Institute was opened on premises formerly occupied by the Imperial Japanese Navy, which disbanded its facilities at the close

of World War II. The former Naval Medical College and Hospital buildings were converted into the first units of the National Cancer Center Research Institute and Hospital. The Japanese Cancer Center includes 12 divisions in the basic biomedical, clinical, and epidemiological sciences. A view of the Center's more recent activities is given by W. Nakahara (collected papers from the National Cancer Center Research Institute, 1966, 2: v, 1967).

Photographs of the National Cancer Center Research Institute (*foreground*) located at Tsukiji 5-chome, Chuo-Ku, Tokyo, and of Dr. Waro Nakahara, Institute Director since May 1962, appear on the cover. We are indebted to Dr. Nakahara for furnishing the illustrations.
