Contents

Letter to the Editor.

483 Controlling Factors in Urethan Carcinogenesis in Mice: Effect of Enzyme Inducers and Metabolic Inhibitors.

487 Isolation and Partial Characterization of a Glyceraldehyde 3-Phosphate Dehydrogenase-inactivating Factor from Ehrlich Ascites Tumor Cells.
Francisco P. Marnarli and Saul Green.

491 Absence of an Effect of Partial Hepatectomy on Aflatoxin B1 Carcinogenesis.
Adrienne E. Rogers, Nora S. Kula, and Paul M. Newberne.

496 Effect of Immune Status on the Development of Artificially Induced Metastases in Different Anatomical Locations.
Jan Vaage, Kuang Chen, and Suzanne Merrick.

501 Effects of Some Fatty Acid Esters on the Viability and Transplantability of Ehrlich Ascites Tumor Cells.

505 Effect of Polynic Antibiotics on Ehrlich Ascites and Novikoff Hepatoma Cells.
Bruno Modovi, Roberto Strom, Alessandro Finazzi Agrò, Paola Caiafa, Pasquale De Sole, Argante Bozzi, Giuseppe Rotilio, and Alessandro Rossi Fanelli.

510 Some Properties of Substrains of L-Cells with a Decreased Sensitivity to Bis(2-chloroethyl)sulfide.
I. G. Walker and B. D. Reid.

516 Oncogenic Response of Rat Skin, Lungs, and Bones to Vinyl Chloride.
P. L. Viola, A. Bigotti, and A. Caputo.

523 In Vitro Test for Sensitivity of Leukemic Cells to l-Asparaginase.
Robert Schrek and William C. Dolowy.

527 Glucose and Acetate Utilization by Hyperplastic, Alveolar Nodule Outgrowths and Adenocarcinomas of Mouse Mammary Gland.
J. C. Bartley, Hope McGrath, and S. Abraham.

538 Bile Acid Involvement in Azo Dye Carcinogenesis.
Jack C. Holland and James D. Spain.

542 Ultrastructural and Biological Properties of a Cytomegalovirus Rescued from a Human Paranglioma.
Ursula Heine, Joan Kondratick, Dharam V. Ablashi, Gary R. Armstrong, and Albert J. Dalton.

550 Behavior of Opposing Pathways of Thymidine Utilization in Differentiating, Regenerating, and Neoplastic Liver.

557 Regulation of Adenylyl Cyclase in Hepatomas of Different Growth Rates.

561 Comparative Transfer RNA Methylase Capacity in Mouse Ascites Tumors and in Their Derived Tumorigenic and Nontumorigenic Cell Cultures.
R. T. Dell’Orco, D. G. R. Blair, and J. F. Morgan.

566 Distinctive Properties of Ferritin from the Reuber H-35 Rat Hepatoma.
Joseph C. K. Lee and Goetz W. Richter.

573 Gastric Tumors and Lung Lesions in the Rat following the Intragastric or Intraperitoneal Administration of N-(β-Chloroethyl)-N-nitrosourethan.
R. Schoental and J. P. M. Bensted.

577 Some Biochemical and Cytogenetic Properties of Rat Thyroid Tumors.

583 The Effects of β-2'-Deoxythioguanosine on Survival and Progression in Mammalian Cells.
S. C. Barranco and R. M. Humphrey.

587 Quantitative Study of Vascularity in Walker Carcinoma 256.
Chang W. Song and Seymour H. Levitt.
591 Symposium: Transfer RNA and Transfer RNA Modification in Differentiation and Neoplasia.

592 Program.

594 List of Participants.

595 Program Committee.

596 Introduction.

598 Introductory Remarks.

599 The Possible Role of Nucleic Acid Methylases in the Induction of Cancer.

600 Transfer RNA and Transfer RNA Methylase in Human Brain Tumors.

601 Giuseppe L. Viale.

602 In Vitro Transfer RNA Methylation in Paired Neoplastic and Nonneoplastic Cell Cultures.

603 R. Raymond Gantt.

604 Transfer RNA Methylation in Growing and “Resting” Adult and Embryonic Tissues and in Various Oncogetic Systems.

605 Robert C. Gallo.

606 Initiation of Malignant Transformation and the Significance of Changes in Transfer RNA Methylase Enzymes.

608 Agents of Modulation of the Transfer RNA Methylases.

609 Sylvia J. Kerr, Opendra K. Sharma, and Ernest Borek.

610 Transfer RNA's of Embryonic Tissue.

611 Owen M. Remnert.

612 Isoaccepting Transfer RNA’s in Mammalian Differentiated Cells and Tumor Tissues.

613 Wen-Kuang Yang.

614 The Regulation of Transfer RNA Methylation in Normal and Neoplastic Mammary Cells.

615 Roger W. Turkington.

616 Patterns of Isoaccepting Phenylalanine Transfer RNA in Human Leukemia and Lymphoma.

617 Arnold Mittelman.

618 Chemical Carcinogens and RNA.

619 I. Bernard Weinstein, Dezider Grunberger, Shinji Fujimura, and Louis M. Fink.

620 Studies on Transfer RNA$^{3'}$ from Morris 5123C Hepatoma.

621 Fabio Gonano and Giuseppe Pirro.

622 Application of a Tritium Derivative Method to Human Brain and Brain Tumor Transfer RNA Analysis.

623 Kurt Randerath.

624 Introduction to the Second Part of the Symposium.

625 Frederick C. Neidhardt.

626 Studies on Genetically Altered Transfer RNA Species in Escherichia coli.

627 John Carbon and Craig Squires.

628 Studies on Synthesis and Modification of Transfer RNA.

629 Malcolm L. Gefter and Elizabeth Bikoff.

630 Response of Modified Phenylalanine Transfer RNA to Recognition by Phenylalanine Transfer RNA Synthetase.

631 M. P. Stulberg and Lee R. Shugart.

632 Modified Bases and Transfer RNA Function.

633 Alan Peterkofsky, Marcia Litwack, and Jane Marmor.

634 Tryptophanyl Transfer RNA Synthetase from Lymphocytes of Human Chronic Lymphocytic Leukemia.

635 Howard P. Tchou, Alice J. Claflin, and Karl H. Muench.

636 Seryl Transfer RNA Changes during Estrogen-induced Phosvitin Synthesis and a Unique Seryl Transfer RNA Modification.

637 Morton R. Bernfield and Pekka H. Mäenpää.

638 Transfer RNA Modifications and Synthesis in Animal Cells.

640 Stimulation of Hemoglobin Synthesis in Developing Chick Blastodisc Blood Islands by a Minor Alanine-specific Transfer RNA.

641 S. D. Wainwright.

642 Transfer RNA Specificity in Mammalian Tissues and Codon Responses of Seryl Transfer RNA.

643 Dolph Hatfield, Franklin H. Portugal, and Mary Cailcut.

644 Methionine Transfer RNA$_{\text{P}}$: The Initiator Transfer RNA for Hemoglobin Biosynthesis.

645 W. French Anderson and David A. Shafritz.

646 Physiological Activity of Derivatives of a Modified Component of Transfer RNA, N-(Nebularin-6-ylcarbamoyl)-L-threonine.

648 Analysis of 5-Methyluridine Function in the Transfer RNA of Escherichia coli.

649 Glenn R. Björk and Frederick C. Neidhardt.

650 Influence of a Latent Virus on Transfer RNA-methylating Enzymes.

651 Elsie Wainfan.

652 Summary of Symposium on Transfer RNA and Transfer RNA Modification in Differentiation and Neoplasia.

653 P. C. Zamecnik.

654 Books Received.

655 Announcements.
SYMPOSIUM

Sponsored by the National Cancer Institute and the John E. Fogarty International Center for Advanced Study in the Health Sciences

TRANSFER RNA AND TRANSFER RNA MODIFICATION IN DIFFERENTIATION AND NEOPLASIA

Held at the National Cancer Institute
Bethesda, Maryland
October 5–7, 1970
PROGRAM

List of Participants .......................................................... 594
Program Committee .......................................................... 595

Introduction.

Ernest Borek ................................................................. 596
Introductory Remarks.

Carl G. Baker ................................................................. 598

The Possible Role of Nucleic Acid Methylases in the Induction of Cancer.

P. N. Magee ................................................................. 599

Transfer RNA and Transfer RNA Methylase in Human Brain Tumors.

Giuseppe L. Viale .......................................................... 605

In Vitro Transfer RNA Methylation in Paired Neoplastic and Nonneoplastic Cell Cultures.

R. Raymond Gantt ......................................................... 609

Altered Transfer RNA Methylase Patterns in Marek's Disease Tumors.

Lewis R. Mandel, Bruce Hacker, and T. A. Maag ................................................. 613

The Alkylation of Transfer RNA by Enzymes from Embryonic, Neoplastic, and Ethionine-treated Liver Tissues.

R. L. Hancock .............................................................. 617

Transfer RNA and Transfer RNA Methylation in Growing and "Resting" Adult and Embryonic Tissues and in Various Oncogenic Systems.

Robert C. Gallo .......................................................... 621

Initiation of Malignant Transformation and the Significance of Changes in Transfer RNA Methylase Enzymes.

David J. Pillinger and Ray Wilkinson ................................................. 630

Agents of Modulation of the Transfer RNA Methylases.

Sylvia J. Kerr, Opendra K. Sharma, and Ernest Borek ............................................. 633

Transfer RNA's of Embryonic Tissue.

Owen M. Rennert ......................................................... 637

Isoaccepting Transfer RNA's in Mammalian Differentiated Cells and Tumor Tissues.

Wen-Kuang Yang .......................................................... 639

The Regulation of Transfer RNA Methylation in Normal and Neoplastic Mammary Cells.

Roger W. Turkington ......................................................... 644

Patterns of Isoaccepting Phenylalanine Transfer RNA in Human Leukemia and Lymphoma.

Arnold Mittelman .......................................................... 647

Chemical Carcinogens and RNA.

I. Bernard Weinstein, Dezider Grunberger, Shinji Fujimura, and Louis M. Fink ............................................. 651

Studies on Transfer RNAPhosphate from Morris 5123C Hepatoma.

Fabio Gonano and Giuseppe Pirro .................................................... 656

Application of a Tritium Derivative Method to Human Brain and Brain Tumor Transfer RNA Analysis.

Kurt Randerath .............................................................. 658

Introduction to the Second Part of the Symposium.

Frederick C. Neidhardt ......................................................... 662

Studies on Genetically Altered Transfer RNA Species in Escherichia coli.

John Carbon and Craig Squires .......................................................... 663

Studies on Synthesis and Modification of Transfer RNA.

Malcolm L. Gefter and Elizabeth Bikoff ................................................. 667

Response of Modified Phenylalanine Transfer RNA to Recognition by Phenylalanyl Transfer RNA Synthetase.

M. P. Stulberg and Lee R. Shugart ......................................................... 671

Modified Bases and Transfer RNA Function.

Alan Peterkofsky, Marcia Litwack, and Jane Marmor ............................................... 675
