Contents

i Letter to the Editor.

483 Controlling Factors in Urethan Carcinogenesis in Mice: Effect of Enzyme Inducers and Metabolic Inhibitors.

487 Isolation and Partial Characterization of a Glyceraldehyde 3-Phosphate Dehydrogenase-inactivating Factor from Ehrlich Ascites Tumor Cells.
Francisco P. Marnarli and Saul Green.

491 Absence of an Effect of Partial Hepatectomy on Aflatoxin B1 Carcinogenesis.
Adrianne E. Rogers, Nora S. Kula, and Paul M. Newberne.

496 Effect of Immune Status on the Development of Artificially Induced Metastases in Different Anatomical Locations.
Jan Vaage, Kuang Chen, and Suzanne Merrick.

501 Effects of Some Fatty Acid Esters on the Viability and Transplantability of Ehrlich Ascites Tumor Cells.

505 Effect of Polyeic Antibiotics on Ehrlich Ascites and Novikoff Hepatoma Cells.
Bruno Modovi, Roberto Strom, Alessandro Finazzi Agrò, Paola Caiafa, Pasquale De Sole, Argante Bozzi, Giuseppe Rotilio, and Alessandro Rossi Fanelli.

510 Some Properties of Substrains of L-Cells with a Decreased Sensitivity to Bis(2-chloroethyl)sulfide.
I. G. Walker and B. D. Reid.

516 Oncogenic Response of Rat Skin, Lungs, and Bones to Vinyl Chloride.
P. L. Viola, A. Bigotti, and A. Caputo.

523 In Vitro Test for Sensitivity of Leukemic Cells to l-Asparaginase.
Robert Schrek and William C. Dolowy.

527 Glucose and Acetate Utilization by Hyperplastic, Alveolar Nodule Outgrowths and Adenocarcinomas of Mouse Mammary Gland.
J. C. Bartley, Hope McGrath, and S. Abraham.

538 Bile Acid Involvement in Azo Dye Carcinogenesis.
Jack C. Holland and James D. Spain.

542 Ultrastructural and Biological Properties of a Cytomegalovirus Rescued from a Human Paraganglioma.
Ursula Heine, Joan Kondratick, Dharam V. Ablashi, Gary R. Armstrong, and Albert J. Dalton.

550 Behavior of Opposing Pathways of Thymidine Utilization in Differentiating, Regenerating, and Neoplastic Liver.

557 Regulation of Adenyl Cyclase in Hepatomas of Different Growth Rates.

561 Comparative Transfer RNA Methylase Capacity in Mouse Ascites Tumors and in Their Derived Tumorigenic and Nontumorigenic Cell Cultures.
R. T. Dell’Orco, D. G. R. Blair, and J. F. Morgan.

566 Distinctive Properties of Ferritin from the Reuber H-35 Rat Hepatoma.
Joseph C. K. Lee and Goetz W. Richter.

573 Gastric Tumors and Lung Lesions in the Rat following the Intragastric or Intraperitoneal Administration of N-(β-Chloroethyl)-N-nitrosourethan.
R. Schoental and J. P. M. Bensted.

577 Some Biochemical and Cytogenetic Properties of Rat Thyroid Tumors.

583 The Effects of β-2'-Deoxythioguanosine on Survival and Progression in Mammalian Cells.
S. C. Barranco and R. M. Humphrey.

587 Quantitative Study of Vascularity in Walker Carcinoma 256.
Chang W. Song and Seymour H. Levitt.
Symposium: Transfer RNA and Transfer RNA Modification in Differentiation and Neoplasia.

Program.

List of Participants.

Program Committee.

Introduction.

Ernest Borek.

Introductory Remarks.

Carl G. Baker.

The Possible Role of Nucleic Acid Methylases in the Induction of Cancer.

P. N. Magee.

Transfer RNA and Transfer RNA Methyalse in Human Brain Tumors.

Giuseppe L. Viale.

In Vitro Transfer RNA Methylation in Paired Neoplastic and Nonneoplastic Cell Cultures.

R. Raymond Gantt.

Altered Transfer RNA Methyalse Patterns in Marek's Disease Tumors.

Lewis R. Mandel, Bruce Hacker, and T. A. Maag.

The Alkylation of Transfer RNA by Enzymes from Embryonic, Neoplastic, and Ethionine-treated Liver Tissues.

R. L. Hancock.

Transfer RNA and Transfer RNA Methylation in Growing and “Resting” Adult and Embryonic Tissues and in Various Oncogenic Systems.

Robert C. Gallo.

Initiation of Malignant Transformation and the Significance of Changes in Transfer RNA Methyalse Enzymes.

David J. Pfifflinger and Ray Wilkinson.

Agents of Modulation of the Transfer RNA Methyalse.

Sylvia J. Kerr, Opendra K. Sharma, and Ernest Borek.

Transfer RNA's of Embryonic Tissue.

Owen M. Rentner.

Isoaccepting Transfer RNA's in Mammalian Differentiated Cells and Tumor Tissues.

Wen-Kuang Yang.

The Regulation of Transfer RNA Methylation in Normal and Neoplastic Mammary Cells.

Roger W. Turkington.

Patterns of Isoaccepting Phenylalanine Transfer RNA in Human Leukemia and Lymphoma.

Arnold Mittelman.

Chemical Carcinogens and RNA.

I. Bernard Weinstein, Dezider Grunberger, Shinji Fujimura, and Louis M. Fink.

Studies on Transfer RNA from Morris 5123C Hepatoma.

Fabio Gonano and Giuseppe Pirro.

Application of a Tritium Derivative Method to Human Brain and Brain Tumor Transfer RNA Analysis.

Kurt Randerath.

Introduction to the Second Part of the Symposium.

Frederick C. Neidhardt.

Studies on Genetically Altered Transfer RNA Species in Escherichia coli.

John Carbon and Craig Squires.

Studies on Synthesis and Modification of Transfer RNA.

Malcolm L. Gefter and Elizabeth Bikoff.

Response of Modified Phenylalanine Transfer RNA to Recognition by Phenylalanyl Transfer RNA Synthetase.

M. P. Stulberg and Lee R. Shugart.

Modified Bases and Transfer RNA Function.

Alan Peterkofsky, Marcia Litwack, and Jane Marmor.

Tryptophanyl Transfer RNA Synthetase from Lymphocytes of Human Chronic Lymphocytic Leukemia.

Seryl Transfer RNA Changes during Estrogen-induced Lysosyme Synthesis and a Unique Seryl Transfer RNA Modification.

Merton R. Bernfield and Pekka H. Mäenpää.

Transfer RNA Modifications and Synthesis in Animal Cells.

Stimulation of Hemoglobin Synthesis in Developing Chick Blastodisc Blood Islands by a Minor Alanine-specific Transfer RNA.

S. D. Wainwright.

Transfer RNA Specificity in Mammalian Tissues and Codon Responses of Seryl Transfer RNA.

Dolph Hatfield, Franklin H. Portugal, and Mary Calcuts.

Methionine Transfer RNA: The Initiator Transfer RNA for Hemoglobin Biosynthesis.

W. French Anderson and David A. Shafritz.

Physiological Activity of Derivatives of a Modified Component of Transfer RNA, N-(Nebularin-6-ylcarbamoyl)-L-threonine.

Analysis of 5-Methyluridine Function in the Transfer RNA of Escherichia coli.

Glenn R. Björk and Frederick C. Neidhardt.

Influence of a Latent Virus on Transfer RNA-methylating Enzymes.

Elsie Wainfan.

Summary of Symposium on Transfer RNA and Transfer RNA Modification in Differentiation and Neoplasia.

P. C. Zamecnik.

Books Received.

Announcements.
SYMPOSIUM

Sponsored by the National Cancer Institute and the John E. Fogarty International Center for Advanced Study in the Health Sciences

TRANSFER RNA AND TRANSFER RNA MODIFICATION IN DIFFERENTIATION AND NEOPLASIA

Held at the
National Cancer Institute
Bethesda, Maryland
October 5–7, 1970
# PROGRAM

Tryptophanyl Transfer RNA Synthetase from Lymphocytes of Human Chronic Lymphocytic Leukemia.

Howard P. Tchou, Alice J. Claflin, and Karl H. Muench

Seryl Transfer RNA Changes during Estrogen-induced Phosvitin Synthesis and a Unique Seryl Transfer RNA Modification.

Merton R. Bernfield and Pekka H. Mäenpää

Transfer RNA Modifications and Synthesis in Animal Cells.

M. W. Taylor, S. A. S. Volkers, B. K. Choe, and J. G. Zeikus

Stimulation of Hemoglobin Synthesis in Developing Chick Blastodisc Blood Islands by a Minor Alanine-specific Transfer RNA.

S. D. Wainwright

Transfer RNA Specificity in Mammalian Tissues and Codon Responses of Seryl Transfer RNA.

Dolph Hatfield, Franklin H. Portugal, and Mary Caicuts

Methionine Transfer RNAF: The Initiator Transfer RNA for Hemoglobin Biosynthesis.

W. French Anderson and David A. Shafritz

Physiological Activity of Derivatives of a Modified Component of Transfer RNA, N-(Nebularin-6-ylcarbamoyl)-L-threonine.

Ross H. Hall, Syed N. Alam, C. M. Chen, William H. Dyson, C. I. Hong, and Girish B. Chheda

Analysis of 5-Methyluridine Function in the Transfer RNA of Escherichia coli.

Glenn R. Björk and Frederick C. Neidhardt

Influence of a Latent Virus on Transfer RNA-methylating Enzymes.

Elsie Wainfan

Summary of Symposium on Transfer RNA and Transfer RNA Modification in Differentiation and Neoplasia.

P. C. Zamecnik
