Contents

450  The Inhibition of Croton Oil-promoted Mouse Skin Tumorigenesis by Steroid Hormones.  Sidney Belman and Walter Troll.

455  The Effect of Cyclic Adenosine 3',5'-Phosphate on Tumor Immunity.  Perry G. Rigby.

501  Immunological and Cytogenetic Properties of Developing Thyroid Tumors in the Rat.  A. Al Saadi and Gerald J. Mizejewski.

516  Tumor-specific, Cell-mediated Immune Resistance to Autochthonous Tumors.

Volume 32 / Number 3 / March 1972

522  Evaluation of Combination Chemotherapy in Vivo and in Culture with 1,β-D-Arabinofuranosylcytosine and 1-Formylisoquinoline Thiosemicarbazone.  Gerald B. Grindey, Enrico Mihich, and Charles A. Nichol.

527  Interaction of Drugs Inhibiting Different Steps in the Synthesis of DNA.  Gerald B. Grindey and Charles A. Nichol.

535  Therapeutic Efficacy of Cyclophosphamide as a Function of Its Metabolism.  N. E. Sladek.

543  Isolation and Chemical Characterization of Cell Surface Sialoglycopeptide Fractions during Progression of Rat Ascites Hepatoma AS-30D.  David F. Smith and Earl F. Walborg, Jr.

550  Mutagenic Selectivity for the RNA-forming Genes in Relation to the Carcinogenicity of Alkylating Agents and Polycyclic Aromatics.  O. G. Fahmy and Myrtle J. Fahmy.

558  Effects of Cytosine Arabinoside and 1,3-Bis(2-chloroethyl)-1-nitrosourea on Human Glial Tumor Cells.  Tsu T. Chen and John Mealey, Jr.

573  Morphogenesis of Two Immunologically Induced Mouse Lymphomas.  Gerhard R. Krueger and Ursula I. Heine.

583  Epidermodysplasia Verruciformis as a Model in Studies on the Role of Papovaviruses in Oncogenesis.  Stefania Jablonska, Jan Dabrowski, and Kazimierz Jakubowicz.

590  Liberation of a Mouse Uterus-specific Protein in the Serum during Uterine Carcinogenesis.  Didier Dufour, Roberto Estrada, and Suhasini P. Taskar.

595  The Effect of cis-Platinum(II)diamminodichloride on Bone Marrow.  Miroslav Žák, Jaroslav Drobník, and Zdeněk Režný.
600 Daunorubicin Metabolism by Human Hematological Components.
David H. Huffman and Nicholas R. Bachur.

606 Coordinated Treatment of Childhood Rhabdomyosarcoma with Surgery, Radiotherapy, and Combination Chemotherapy.
Charles B. Pratt, H. Omar Hustu, Irvin D. Fleming, and Donald Pinkel.

611 Effect of Estrogen Administration on Glucose 6-Phosphate Dehydrogenase and Lactate Dehydrogenase Isoenzymes in Rodent Mammary Tumors and Normal Mammary Glands.
Arthur H. Richards and Russell Hilf.

617 Transplacental Effect of Some Chemical Compounds on Organ Cultures of Embryonic Kidney Tissue.

628 Age-specific Changes in the Proliferation of Ehrlich Ascites Tumor Cells Grown as Solid Tumors.
Peevush K. Lala.

637 Enzymatic Activation of the Oncogen 3-Hydroxyxanthine.

Gerhard Stöhrer, Elaine Corbin, and George Bosworth Brown.

643 The Binding of 9,10-Dimethyl-1,2-benzanthracene to Mouse Epidermal Satellite DNA in Vivo.

648 Brief Communications:
Polyadenylic-Polyuridylic Acid, an Adjuvant to Surgery in the Treatment of Spontaneous Mammary Tumors in C3H/He Mice and Transplantable Malignoma in the Hamster.
Fanny Lacour, Alfred Spira, Jean Lacour, and Michel Prade.

650 Letter to the Editor:
The Radiation Response of Human Malignant Melanoma Cells in Vitro and in Vivo.
Shirley Hornsey.

652 Announcements.

COVER LEGEND

Amédée Borrel (1867-1936) was one of the earlier proponents of the filterable virus theory of cancer. He presented his views in a thoughtful series of papers on "Le problème du cancer," in the Rev. Bull. Inst. Pasteur, 5: 497-512, 593-608, and 641-662, 1907. Borrel was professor of bacteriology and hygiene at the University of Strasbourg, France. He was associated with the Pasteur Institute in Paris, developing with Calmette a plague vaccine. He was a member of the French Academy of Sciences.

Charles C. Oberling (1895-1960), a product of the University of Strasbourg, was a disciple of Borrel and a strong advocate of the virus etiology of neoplasia. His basic training was in pathology, but he was a generalist not only in cancer but in life as well. His career included a deanship of the medical school in Teheran, Iran (1939-1947), several years in the United States, and the directorship of the Institut de Recherches sur le Cancer of the Université de Paris in Villejuif. In 1943 he wrote the book Le Cancer (Paris: Gallimard, Ed. 7, 1954) which W. H. Woglom translated into English as The Riddle of Cancer (Yale Univ. Press, 1952), and which is a masterpiece of its kind. Oberling had many warm friends throughout the world, and this warmth is reflected in his obituaries (Cancer Res., 20: 1274-1276, 1960; Cancer, 13: 868-870, 1960).

We are indebted to Dr. Ludwik Gross for the portraits and his assistance. Borrel appears at right; Oberling, left. The portraits are reprinted with permission of Pergamon Press, Inc., New York, from the second edition of Oncogenic Viruses (1970) by Ludwik Gross.
