Contents

1359 Cancer in Man at Site of Prior Benign Lesion of Skin or Mucous Membrane: A Review.
Lucia J. Dunham.

1375 Antigenic Changes on the Surface of Lymphocytes from Patients with Chronic Lymphocytic Leukemia.

1384 Tumor Inhibition, Persistence, and Binding of Actinomycin D in Mouse Skin.
A. Segal, T. Honohan, M. Schroeder, C. Katz, and B. L. Van Duuren.

1391 Transformation of Hamster Embryo Cells by Epoxides and Other Derivatives of Polycyclic Hydrocarbons.

1397 Effect of Tilorone Hydrochloride and Congeners on Reticuloendothelial System, Tumors, and the Immune Response.

1404 Studies of Mammary Carcinoma Induced by 7,12-Dimethylbenz(a)anthracene Administration.
Tariq M. Murad and Emmerich von Haam.

1416 Uptake and Metabolism of N^3-Formyltetrahydrofolate by L1210 Leukemia Cells.
Aly Nahas, Peter F. Nixon, and Joseph R. Bertero.

1422 Drug-induced Differentiation of a Rat Glioma in Vitro.
Shirley W. Silbert and Milton N. Goldstein.

1428 Stress and Murine Sarcoma Virus (Moloney)-induced Tumors.
Alfred Amkraut and George F. Solomon.

1434 Characterization of a Transplantable, Canine, Immature Mast Cell Tumor.

1442 Lymphatic Leukemia and Pulmonary Tumors in Female Swiss Mice Fed Bracken Fern (Pteris aquilina).
A. M. Pamukcu, E. Ertürk, J. M. Price, and George T. Bryan.

1446 Antigenic Changes of L1210 Leukemia in Mice Treated with 5-(3,3-Dimethyl-1-triazeno)imidazole-4-carboxamide.
Antisera by the Use of Passively Administered Antibody. 
Peter C. Ungaro, Walter P. Drake, Donald H. Buchholz, and Michael R. Mardiney, Jr.

Early Appearance of Serum α-Fetoprotein during Hepatocarcinogenesis as a Function of Age of Rats and Extent of Treatment with 3′-Methyl-4-dimethylaminoazobenzene. 
Robert Kroes, Gary M. Williams, and John H. Wetsburger.

Ether-Lipids, α-Glycerol Phosphate Dehydrogenase, and Growth Rate in Tumors and Cultured Cells. 
Barbara V. Howard, H. P. Morris, and J. Martyn Bailey.

Two Different Species of Dihydrofolate Reductase in Mammalian Cells Differentially Resistant to α-Amethopterin and Methasquin. 
Alberta M. Albrecht, June L. Biedler, and Dorris J. Hutchison.

Inhibition of RNA-dependent DNA Polymerase by Thymidylate Derivatives. 
Anthony W. Schrecker, Michael B. Sporn, and Robert C. Gallo.

On the Correlation between the Hepatocarcinogenicity of the Carcinogen, N-2-Fluorenylacetamide, and Its Metabolic Activation by the Rat. 

Early Effects of 12-O-Tetradecanoyl-phorbol-13-acetate on the Incorporation of Tritiated Precursor into DNA and the Thickness of the Interfollicular Epidermis, and Their Relation to Tumor Promotion in Mouse Skin. 
Alberto N. Raick, Katarina Thumn, and B. Roy Chivers.

The Effect of Varying the Length of the Nursing Period on the Postpartum Growth of Chemically Induced Rat Mammary Tumors. 
George M. McCormick, II.

A Study of Multinucleated Tumor Cells Demonstrating the Effect of Transplant Duration on Serum Changes in Cancer-bearing Hamsters. 
Dorothy M. Gillespie and Dean F. Stevens.

Effects of Infant Thymectomy and Antilymphocyte Serum on Xenotransplantation of a Human Leukemia in the Hamster. 
Linda Poole Merk and Richard A. Adams.

Use of Bacillus Calmette-Guérin as Adjuvant in Human Cell Vaccines. 
Joseph E. Sokal, C. William Aungst, and Tin Han.

Sex Differences in Cell Proliferation and N-Hydroxy-2-acetylaminofluorene Sulfotransferase Levels in Rat Liver during 2-Acetylaminofluorene Administration. 
Carlton D. Jackson and Charles C. Irving.

Type C Viruses in the Pancreas of Normal C57BL Mice. 
Gabriella Della Torre and Giuseppe Della Porta.

Mutagenicity of N-Nitrosopiperazines for Salmonella typhimurium in the Host-mediated Assay. 
Errol Zeiger, Marvin S. Legator, and William Lijinsky.

Leon Manusovich Shabad (b. 1902 in Minsk) is a pathologist who is Chief of the Department of Carcinogenic Agents at the Institute. He was graduated from the Leningrad Medical Institute in 1924, and in 1925 began working in the field of experimental oncology. Shabad is a member of the Academy of Medical Sciences of the USSR. He is world renowned for his work on environmental carcinogenesis, for which he was awarded a prize by the United Nations in 1962. His numerous publications include books on pathology and oncology. He continues to be a frequent contributor to the cancer literature in English as well as in the Russian language (e.g., J. Natl. Cancer Inst., 47: 987-1005, 1971; Cancer Res., 32: 617-627, 1972).

Professors Blokhin (left) and Shabad (right) are corresponding members of the American Association for Cancer Research.
