Contents

1359  Cancer in Man at Site of Prior Benign Lesion of Skin or Mucous Membrane: A Review.  
      Lucia J. Dunham.

1375  Antigenic Changes on the Surface of Lymphocytes from Patients with Chronic Lymphocytic Leukemia.  

1384  Tumor Inhibition, Persistence, and Binding of Actinomycin D in Mouse Skin.  
      A. Segal, T. Honohan, M. Schroeder, C. Katz, and B. L. Van Duuren.

1391  Transformation of Hamster Embryo Cells by Epoxides and Other Derivatives of Polycyclic Hydrocarbons.  

1397  Effect of Tilorone Hydrochloride and Congener on Reticuloendothelial System, Tumors, and the Immune Response.  

1404  Studies of Mammary Carcinoma Induced by 7,12-Dimethylbenz(a)anthracene Administration.  
      Tariq M. Murad and Emmerich von Haam.

1416  Uptake and Metabolism of N3-Formyltetrahydrofolate by L1210 Leukemia Cells.  
      Aly Nahas, Peter F. Nixon, and Joseph R. Bertero.

1422  Drug-induced Differentiation of a Rat Glioma in Vitro.  
      Shirley W. Silbert and Milton N. Goldstein.

1428  Stress and Murine Sarcoma Virus (Moloney)-induced Tumors.  
      Alfred Amkraut and George F. Solomon.

1434  Characterization of a Transplantable, Canine, Immature Mast Cell Tumor.  

1442  Lymphatic Leukemia and Pulmonary Tumors in Female Swiss Mice Fed Bracken Fern (Pteris aquilina).  
      A. M. Pamukcu, E. Ertürk, J. M. Price, and George T. Bryan.

1446  Antigenic Changes of L1210 Leukemia in Mice Treated with 5-(3,3-Dimethyl-1-triazeno)imidazole-4-carboxamide.
Antisera by the Use of Passively Administered Antibody.

Peter C. Ungaro, Walter P. Drake, Donald H. Buchholz, and Michael R. Mardiney, Jr.

1526 Early Appearance of Serum α-Fetoprotein during Hepatocarcinogenesis as a Function of Age of Rats and Extent of Treatment with 3'-Methyl-4-dimethylaminoazobenzene.

Robert Kroes, Gary M. Williams, and John H. Weisburger.

1533 Ether-Lipids, α-Glycerol Phosphate Dehydrogenase, and Growth Rate in Tumors and Cultured Cells.

Barbara V. Howard, H. P. Morris, and J. Martyn Bailey.

1539 Two Different Species of Dihydrofolate Reductase in Mammalian Cells Differentially Resistant to Amethopterin and Methasquin.

Alberta M. Albrecht, June L. Biedler, and Dorris J. Hutchison.

1547 Inhibition of RNA-dependent DNA Polymerase by Thymidylate Derivatives.

Anthony W. Schrecker, Michael B. Sporn, and Robert C. Gallo.

1554 On the Correlation between the Hepatocarcinogenicity of the Carcinogen, N-2-Fluorenylacetamide, and Its Metabolic Activation by the Rat.

1562 Early Effects of 12-O-Tetradecanoyl-phorbol-13-acetate on the Incorporation of Tritiated Precursor into DNA and the Thickness of the Interfollicular Epidermis, and Their Relation to Tumor Promotion in Mouse Skin.

Alberto N. Raick, Katarina Thumn, and B. Roy Chivers.

COVER LEGEND

This month our cover features the Institute of Experimental and Clinical Oncology of the Academy of Medical Sciences of the USSR, located at Kashirskoye Chausse in Moscow, M478. It was founded in 1951 and is the largest center in the USSR for laboratory and clinical research on cancer.

Nikolai Nikolaevich Blokhin (b. 1912 in Lukoyanov) has been Director of the Institute since its opening. He was graduated from Gorky State Medical Institute in 1934 and in the same year founded the Institute of Restorative Surgery, Orthopedics, and Traumatology where he was Director of General Surgery from 1950 to 1952. He was President of the Academy of Medical Sciences of the USSR (1960–1968) and President of the International Union Against Cancer (1966–1970). The author of over 50 works, Dr. Blokhin has contributed to the literature on cancer control, plastic surgery, and chemotherapy of cancer.

Leon Manusovich Shabad (b. 1902 in Minsk) is a pathologist who is Chief of the Department of Carcinogenic Agents at the Institute. He graduated from the Leningrad Medical Institute in 1924, and in 1925 began working in the field of experimental oncology. Shabad is a member of the Academy of Medical Sciences of the USSR. He is world renowned for his work on environmental carcinogenesis, for which he was awarded a prize by the United Nations in 1962. His numerous publications include books on pathology and oncology. He continues to be a frequent contributor to the cancer literature in English as well as in the Russian language (e.g., J. Natl. Cancer Inst., 47: 987–1005, 1971; Cancer Res., 32: 617–627, 1972).

Professors Blokhin (left) and Shabad (right) are corresponding members of the American Association for Cancer Research.
