(2) Use of drugs in long-term disease-free survivors with Burkitt's tumor (Burkitt, Burchenal, Ngu, and Ziegler). (3) Use of topical chemotherapy and enhancement of host response for cures in skin cancers (Klein). (4) Use of combination drug therapy resulting in prolonged survival, in acute lymphatic leukemia (Frei, Freireich, Holland, and Pinkel). (5) Use of combination drug therapy, resulting in prolonged survival, in Hodgkin's disease (Frei, Carbone, and DeVita). (6) Treatment of mycosis fungoides, with topical chemotherapy and enhancement of host response (Van Scott). (7) Supportive measures in treatment of toxicity, infection, and hemorrhage, due to side effects of drugs (Djerassi and Freireich).
