JOHANN-GEORG-ZIMMERMANN PRIZE

The Society of the Friends of the Medical School of Hannover announces the availability of the Johann-Georg-Zimmermann prize for 1977 in the amount of 50,000 marks. Further details concerning the procedure for submission of nominees can be obtained by writing to Geva v. Huenersdorff, Medizinische Hochschule Hannover, Karl-Wiechert-Allee 9, 3000 Hannover 61, Germany.

UICC FELLOWSHIP PROGRAMS

The Union Internationale Contre le Cancer (UICC) announces two fellowship programs: the International Cancer Research Technology Transfer Program (ICRETT), and the International Cancer Research Workshop Program (ICREW).

The ICRETT Program will enable investigators from two different countries: to carry out brief research that will develop new or improved technology or methodology to further the progress of cancer research; to engage in collaboration to compare the results of and detect causes of discrepancies in the results of parallel or related research in different countries; to meet for intensive discussion and/or demonstration so that the new or improved technology or methodology of an acknowledged expert can be used by investigators in another country. The funds for this Program will be provided by the International Cancer Research Data Bank (ICRDB) of the National Cancer Institute of the United States and will be administered by the UICC.

There is no deadline for the receipt of applications; they may be submitted at any time throughout the year. The selection of successful applicants will be as rapid as possible. Each successful applicant will receive a travel allowance calculated on the basis of the tourist/economy-class air fare and a living allowance sufficient to cover board and lodging expenses. No allowances will be paid for dependents.

The ICREW Program will provide funds to support workshops designed to bring together a small number of promising scientists to: discuss or demonstrate newly developed or improved specialized technology or methodology; discuss methods for overcoming obstacles or for resolving apparent disagreement and differences of opinion impeding further progress in a given field of study; discuss new approaches that might be applied to solve specific problems in cancer research; discuss the organization of international bilateral or multilateral studies related to cancer research. These workshops should preferably have not more than 10 to 12 participants, and a participation of over 25 persons will be accepted only under exceptional circumstances.

The funds, provided by the ICRDB of the National Cancer Institute of the United States and administered by the UICC, will cover at least 30% (up to a maximum of \$10,000) of the total cost of a workshop. Exceptions to this funding limit may be allowed at the discretion of the funding agency.

Applications must be submitted on the prescribed form, upon request of which, the proposed site of location for the workshop must be specified and the UICC in turn will provide the per diem rate for this location.

To be eligible, the application must specify the title of the workshop, the proposed site and location, the starting and finishing dates, a budget itemizing the estimated costs, the amount of financial support requested, and the amount of funds provided from other sources.

Closing dates for the receipt of applications will be: January 1, March 1, June 1, and September 1.

Successful applicants will be notified within a period of 60 days from the closing date indicated above.

Traveling expenses will be calculated on the basis of tourist/economy scheduled airline rates or first-class railway fares. Each participant will receive a living allowance
