Primary Cutaneous Melanoma:

A Report from the Queensland Melanoma Project

An American Cancer Society Professional
Education Publication

This 29-page publication provides information on detection, staging, and treatment of melanoma. Numerous tables and charts present survival data and anatomical distribution by sex. Sections on clinical and differential diagnosis of melanoma include 25 four-color illustrations. This article originally appeared in the March/April 1976 issue of *Ca-A Cancer Journal for Clinicians*. This publication is available without charge from your local Division of the American Cancer Society.
