PROGRAM PLANNING COMMITTEE

Co-Chairmen
E. Ronald Atkinson
George M. Hahn

Committee Members
Jane B. Marmor
Jack W. Milder

American Cancer Society Staff
Frank J. Rauscher, Jr.
Stefano Vivona
Lee Kanwisher

PROGRAM

List of Participants ......................................................... 2234
Foreword.

Jack W. Milder ............................................................. 2235

SESSION I
Animal Models and Clinical Studies

Chairman: Joan M. Bull

Hyperthermic Treatment of Human Tumors Heterotransplanted in Nude Mice.
Beppino C. Giovanella, John S. Stehlin, Randall C. Shepard, and Leo J. Williams ........ 2236
Large Animal Studies of Hyperthermia and Irradiation.
Edward L. Gillette ......................................................... 2242
Normal Tissue and Solid Tumor Effects of Hyperthermia in Animal Models and Clinical Trials.
F. Kristian Storm, William H. Harrison, Robert S. Elliott, and Donald L. Morton ...... 2245
A Clinical Investigation of Total-Body Hyperthermia as Cancer Therapy.
James M. Larkin ............................................................ 2252
Results of Eleven Years' Experience with Heated Perfusion for Melanoma of the Extremities.
John S. Stehlin, Jr., Beppino C. Giovanella, Peter D. de Ipolyi, and Robert F. Anderson . . 2255
Clinical and Biological Studies of Localized Hyperthermia.
J. H. Kim and E. W. Hahn ................................................ 2258
Summary of the Informal Discussion on Animal Models and Clinical Studies.
Joan Bull ................................................................. 2262

SESSION II
Adjuvant Techniques for Hyperthermia

Chairman: George M. Hahn

Potential for Therapy of Drugs and Hyperthermia.
George M. Hahn .......................................................... 2264
Interactions of Hyperthermia and Chemotherapy in Animals.
Jane B. Marmor ............................................................ 2269
Kinetics of Cell Kill by Hyperthermia.
Bijoy K. Bhuyan ............................................................ 2277
Possible Benefits of Hyperthermia to Chemotherapy.
C. D. Kowal and J. R. Bertino ......................................... 2285

2232 CANCER RESEARCH VOL. 39

Downloaded from cancerres.aacrjournals.org on April 14, 2017. © 1979 American Association for Cancer Research.
Potential for Hyperthermia and Radiation Therapy.
  Herman D. Suit and Leo E. Gerweck .......................... 2290
Summary of the Informal Discussion of Adjuvant Techniques for Hyperthermia.
  George M. Hahn .................................................. 2299

SESSION III

Thermal Dosimetry

Chairman: Richard Johnson

Thermal Dosimetry and Clinical Requirements.
  Kenneth H. Luk and Theodore L. Phillips ...................... 2300
Regional Blood Flow in Human Tumors.
  Matti J. Mäntylä ................................................ 2304
Aspects of Thermoregulatory Physiology Pertinent to Hyperthermic Treatment of Cancer
  John Bligh ........................................................ 2307
Assessment of Current Hyperthermia Technology.
  E. Ronald Atkinson .............................................. 2313
Thermal Dosimetry and Temperature Measurements.
  D. A. Christensen ................................................ 2325
Summary of the Informal Discussion of Thermal Dosimetry.
  Richard Johnson .................................................. 2328

SESSION IV

Future Clinical and Basic Research Needs

Chairman: Henry S. Kaplan

Recommendations for Future Research in Hyperthermia at the Molecular, Cellular, and Animal Levels.
  William C. Dewey ................................................. 2330
Clinical Instrumentation Requirements with a Review of the Perth Hyperthermia Experience.
  William L. Caldwell ............................................. 2332
Remarks on Physiology and Tissue Response in Animals.
  John Bligh ......................................................... 2336
Combined Modalities.
  Joan Bull .......................................................... 2337
  Henry S. Kaplan .................................................. 2338
