“That happy face belongs to my friend Cecil Andrus’ daughter Tracy. Lately people say there’s something new about her smile. Something I understand better than anyone. When I wasn’t much older than Tracy, I beat cancer too.”

Senator Frank Church

Almost 30 years separate our victories. Years that brought major advances in the treatment of cancer. When I was fighting for my life, Tracy’s chances wouldn’t have been good. Then most people with Hodgkin’s disease, people like Tracy, died within 5 years.

But your generosity helped change things. You funded research that developed new treatments. Treatments that saved Tracy’s life. Now she’s leaving her job as a legislative assistant and going back to our home state of Idaho. Back to school. Back to a life that’s much dearer for nearly having lost it.

Tracy and I aren’t unique. Almost 2 million Americans have beaten cancer. But much still remains to be done. Through research, rehabilitation and education, the American Cancer Society is making your contributions count.

American Cancer Society

CANCER CAN BE BEAT

Almost 2 million people are living proof your contributions count.
