ELSEVIER

Until the publication of **Cancer Genetics and Cytogenetics**, scientists and clinicians working at the interface of oncology, cytology, and genetics found it difficult to form a cohesive view of their closely related disciplines. Research conducted in human, animal, molecular, population, and biochemical genetics and cytogenetics found its way into as many as forty to fifty different specialty journals.

The need for a single comprehensive source was filled by the publication of **Cancer Genetics and Cytogenetics**. Since 1979, the journal's wide acceptance has necessitated its expansion from a single volume in four issues to five volumes in twenty issues. You'll find high-quality, international, multidisciplinary coverage in **Cancer Genetics and Cytogenetics**. Original articles and short communications from the field keep you abreast of widely applicable research, while review articles, by members of the editorial board, focus on important topics in the authors' respective fields of expertise.

Find out why your colleagues respect and rely on **Cancer Genetics and Cytogenetics** – enter your subscription or send for a sample copy today.

Selected reading from **Cancer Genetics and Cytogenetics**:

Nonrandom Chromosome Alterations in Rhabdomyosarcoma. *J. Trent, J. Casper, P. Meltzer, F. Thompson, and J. Fogh*

Chromosomes and Causation of Human Cancer and Leukemia. LIV. Near-Tetraploidy in Acute Leukemia. *R. Abe, A. Raza, H.D. Preisler, C.K. Tebbi, and A.A. Sandberg*

1985 Subscription Information

Volumes 14-18 (20 issues in 5 volumes), ISSN 0165-4608 \$495.00

For air delivery in the U.S., Canada, or Mexico, add \$47.00. Subscribers outside the U.S. should add \$33.00 for surface delivery (not available to Europe), \$26.50 for surface air lift delivery to Europe, \$60.00 for surface air lift to Japan, or \$104.00 for air delivery to the rest of the world. All subscriptions begin with the first issue of the calendar year. Subscription rates valid through Dec. 31, 1985.

WILMOT CANCER RESEARCH FELLOWSHIPS

The University of Rochester School of Medicine offers research training to physicians who have completed at least one year of residency or research experience. Fellowships will begin July 1, 1986. Opportunities exist in any discipline relevant to the cause, diagnosis, treatment, or prevention of cancer, including endocrinology, experimental therapeutics, genetics, hematology, immunology, microbiology, molecular and cellular biology, pathology, and radiation oncology.

Beginning stipends range from \$27,000 to \$30,000, based on postgraduate experience. There is an annual allowance of \$5,000 for related research costs. Support is provided for up to three years.

For further information, contact:
WILMOT CANCER RESEARCH FELLOWSHIP PROGRAM
Medical Center Box 601
University of Rochester School of Medicine & Dentistry
601 Elmwood Avenue
Rochester, NY USA 14642

DIRECTOR

COMPREHENSIVE CANCER CENTER OF METROPOLITAN DETROIT

The Comprehensive Cancer Center of Metropolitan Detroit is seeking a Director to develop, coordinate, and manage the interinstitutional cancer research programs of Wayne State University, the Michigan Cancer Foundation, and the Detroit Medical Center affiliate hospitals and institutions. Programs involve a large patient population and significant research space supported by more than \$15 million. Candidates will have proven administrative leadership experience, and a demonstrated record of success in clinical and/or basic cancer research. Applications should be received by June 1, 1985.

Send curriculum vitae to:

Sam C. Brooks, Ph.D.
Chairman, Search Committee
Michigan Cancer Foundation
Room 208
110 E. Warren Avenue
Detroit, Michigan 48201

The Comprehensive Cancer Center of Metropolitan Detroit is an Affirmative Action/Equal Opportunity Employer.

"I'D LIKE TO MAKE AN APPOINTMENT WITH THE DOCTOR"

Be prepared, Doctor. More patients will be asking about colorectal cancer. According to a survey* conducted by the American Cancer Society, many people would like to receive more information about colorectal cancer, and 83% said they would want to be checked for it. Further, they are learning that this cancer can be detected *before* symptoms appear. The present cure rate is 44%. The cure rate *could* be as high as 75%, with early detection and appropriate management.

For asymptomatic persons the Society recommends annual digital rectal examination at age 40 and over; at age 50 and over, an annual stool blood test, as well as sigmoidoscopy every three to five years,

following two initial annual negative sigmoidoscopies.

We're here to help. You can reach us at your local American Cancer Society office or write to our Professional Education Department at National Headquarters, 90 Park Avenue, New York, N.Y. 10016. Ask about the Society's Colorectal Check program of professional and public education for the early detection of colorectal cancer.

*"Cancer of the Colon and Rectum: Summary of Public Attitude Survey," *Ca* 33:359-365, 1983 (Nov.-Dec.).
