Contents of Volume 5

H. G. Crabtree. Influence of Unsaturated Dibasic Acids on the Induction of Skin Tumors by Chemical Carcinogens ................................................. 346
C. D. Haagen, and H. T. Randall. Milk-Induced Mammary Carcinoma in Mice. ....... 352
Kenneth G. Scott. Metabolic Studies on Leukemic Mice with the Aid of Radioactive Phosphorus .......................................................... 365
Way J. Tomlinson, and Lester A. Wilson, Jr. The Incidence of Malignant Tumors in British West Indian and Panamanian Negro Autopsy Populations ..................... 368
Abstracts ........................................................................ 372-382
Reports of Research........................................................... 372-376
Clinical and Pathological Reports.......................................... 376-382
Book Reviews .................................................................... 383-384

JULY, 1945. NUMBER 7
A. Glücksmann. The Histogenesis of Benzpyrene-Induced Epidermal Tumors in the Mouse. 385
G. C. Mueller, J. A. Miller, and H. P. Rusch. The Disappearance of Carcinogenic Hydrocarbons in Autoxidizing Lipids ......................................... 401
L. M. Sharad. On Tumor-Producing Chemical Substances .................................. 405
William H. Woghom. Methylcholanthrene Papillomas and the Virus Problem ........ 420
B. Misurksi, M. Pirovski, G. Goldmarber, and L. Doltanski. Effect of X-Rays on the Transmissibility of Fowl Sarcoma in Its Nonfilterable Phase. ........... 422
Jacob Heiman. The Effect of Progesterone and Testosterone Propionate on the Incidence of Mammary Cancer in Mice. 426
H. P. Rusch, B. E. Kline, and C. A. Baumann. The Influence of Caloric Restriction and of Dietary Fat on Tumor Formation with Ultraviolet Radiation ................... 431
Abstracts ........................................................................ 436-446
Reports of Research........................................................... 436-440
Clinical and Pathological Reports.......................................... 440-446
Book Reviews .................................................................... 447-448

AUGUST, 1945. NUMBER 8
W. L. Simpson, and W. Cramer. Fluorescence Studies of Carcinogens in Skin. II. Mouse Skin after Single and Multiple Applications of 20-Methylcholanthrene ................ 449
L. F. Wicks, and L. Suntzeff. Changes in Epidermal Cholesterol During Methylcholanthrene Carcinogenesis in Mice ........................................... 464
Rupert A. Willis. Further Studies on the Mode of Origin of Carcinomas of the Skin .................. 469
G. C. Mueller, and H. P. Rusch. The Effect of 3,4-Benzpyrene on the Autoxidation of Unsaturated Fatty Acids .................................................. 480
E. C. Dodds, W. Lawson, and P. C. Williams. Testing Carcinogen Analogues for Carcinogenic Activity .......................................................... 485
Abstracts ........................................................................ 487-496
Reports of Research........................................................... 487-491
Clinical and Pathological Reports.......................................... 491-496

SEPTEMBER, 1945. NUMBER 9
W. U. Gardner. Some Influences of Hormones on the Growth and Persistence of Transplanted Testicular Tumors ................................................. 497
George W. Woolley, and C. C. Little. The Incidence of Adrenal Cortical Carcinoma in Male Mice of the Extreme Dilution Strain over One Year of Age ........... 506
Charles Hugins, and Peter Vincent Moulder. Estrogen Production by Sertoli Cell Tumors of the Testis .......................................................... 510
Alexander Lipschütz, Demetrio Yanine, Juan Schwartz, Silvio Brunzone, Julio Acuña, and Salomón Silberman. Induction and Prevention of Fibromyoepithelioma of the Utricular Bed in Male Guinea Pigs ........................................... 515
H. Burrows, Edna M. F. Roy, and B. Schober. Potential Differences in the Skin of Mice during Carcinogenesis ...................................................... 524

Downloaded from cancerres.aacjrjournals.org on April 12, 2017. © 1945 American Association for Cancer Research.
vi Contents of Volume 5

ROBERT SCHREK, and GERALD R. ALLABREN. Statistical Analysis of 2,407 Admissions to the Tumor Clinic of Veterans Hospital, Hines, Illinois, during 1943 .................................................. 539

NOTE TO THE EDITOR ...................................................... 547

ABSTRACTS ........................................................................... 548-560
Reports of Research .......................................................... 548-550
Clinical and Pathological Reports .................................... 551-560

OCTOBER, 1945. NUMBER 10

L. BERENBLUM. A System of Grading Carcinogenic Potency ........................................................... 561

H. P. RUSCH, G. C. MUELLER, and B. E. KLINE. The Effect of the Autoxidizability of Lipoidal Solvents on Sarcogenesis by 3,4-Benzpyrene ........................................................................ 565

V. SUNTZEFF, CHRISTOPHER CARRUTHERS, and E. V. COWDRY. Influence of Age on Calcium in Epidermal Carcinogenesis Induced by Methylcholanthrene in Mice ........................................ 572

WILLIAM H. WAGLON. Chronic Inflammation and Carcinogenesis .................................................. 576

FRITZ BISCHOFF, LOUISE P. INGRAHAM, and GEORGE J. CLARKE. Influence of Nontoxic Amounts of Estradiol upon Carcinogenesis in Intact and Castrated Male and Female Mice of the Marsh-Buffalo Strain .......................................................... 579

FRITZ BISCHOFF. Influence of Breeding on the Incidence and Onset of Carcinoma of the Mammary Gland in Marsh-Buffalo Mice .......................................................... 582

S. G. WARNER, M. C. REINHARD, and H. L. GOLTZ. The Relative Importance of the Milk Agent and Inherited Susceptibility to It in the Development of Mammary Tumors in Mice ........................................................................ 584

PROCEEDINGS OF THE AMERICAN ASSOCIATION FOR CANCER RESEARCH, INC.
36th Annual Meeting, New York, N. Y., May 8, 1945 ......................................................................... 587-598
Proceedings of Scientific Sessions .................................................. 587-594
Proceedings of Business Sessions .................................................. 595-598
ABSTRACTS ........................................................................... 599-608
Reports of Research .......................................................... 599-604
Clinical and Pathological Reports .................................... 605-608

NOVEMBER, 1945. NUMBER 11

ALBERT TANNENBAUM. The Dependence of Tumor Formation on the Degree of Caloric Restriction .................................................................................................................... 609

ALBERT TANNENBAUM. The Dependence of Tumor Formation on the Composition of the Calorie-Restricted Diet as Well as on the Degree of Restriction ........................................... 616

PHILIP P. COHEN. Glyoxalase Activity of Liver from Rats Fed p-Dimethylaminobenzene. .......... 626

PHILIP P. COHEN, and EVA K. SOBER. Glyoxalase Activity of Erythrocytes from Cancerous Rats and Human Subjects .......................................................... 631

D. E. LEA. The Biological Assay of Carcinogens ........................................................................... 633

B. E. KLINE, J. A. MILLER, and H. P. RUSCH. Certain Effects of Egg White and Biotin on the Carcinogenicity of p-Dimethylaminobenzene in Rats Fed a Sub-Protective Level of Riboflavin ........................................................................ 641

WILHELMINA F. DUNNING, MAYNE R. CURTIS, and MARK E. MAUN. Spontaneous Malignant Mixed Tumors of the Rat, and the Successful Transplantation and Separation of both Components from a Mammary Tumor .......................................................... 644

B. R. BURMESTER, and C. O. PRICKETT. The Development of Highly Malignant Tumor Strains from Naturally Occurring Avian Lymphomatosis .................................................. 652

ABSTRACTS ........................................................................... 661-669
Reports of Research .......................................................... 661-664
Clinical and Pathological Reports .................................... 665-669
BOOK REVIEW ....................................................................... 670-672

DECEMBER, 1945. NUMBER 12

A. H. M. KIRBY. Studies in Carcinogenesis with Azo Compounds. I. The Action of Four Azo Dyes in Mixed and Pure Strain Mice .......................................................... 673

A. H. M. KIRBY. Studies in Carcinogenesis with Azo Compounds. II. The Action of Azo Compounds in Mice, and the Bearing Thereof on Theories of Azo Dye Carcinogenesis ........ 683
