## Erratum

In the article by A. Kasid *et al.*, entitled "Cytokine Regulation of Tumor Necrosis Factor- $\alpha$  and - $\beta$  (Lymphotoxin)-Messenger RNA Expression in Human Peripheral Blood Mononuclear Cells," which was published in the August 15, 1990 issue of *Cancer Research* (pp. 5072–5076), Figures 2 and 3 contained mistakes resulting from their initial preparation. The corrected figures with their legends appear below.

The authors note that the point of the experiments demonstrated in these figures, *i.e.*, that interleukin 4 inhibits interleukin 2 induction of tumor necrosis factor and lymphotoxin messenger RNA in peripheral blood mononuclear cells, is correct and remains unchanged.

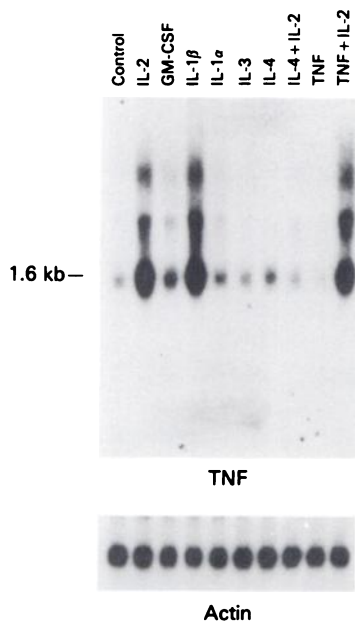

Fig. 2. Effect of cytokines on the expression of TNF mRNA. Total cellular RNA was obtained from PBMC, cultured untreated or treated with various cytokines at 1000 units/ml for 20 h. Northern blots were hybridized with  $^{32}$ P-labeled TNF cDNA probes. *kb*, kilobases.

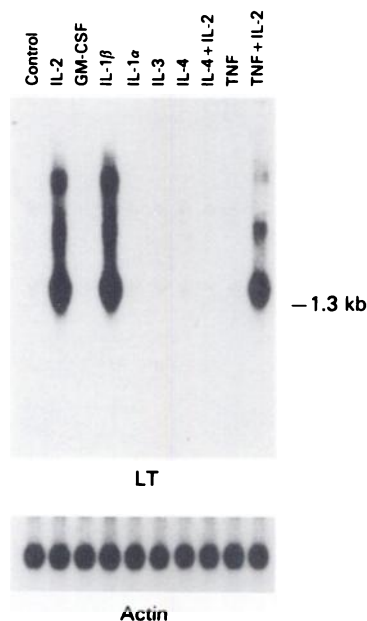

Fig. 3. Effect of cytokines on the expression of LT mRNA. Experimental details are the same as in Fig. 2. Northern blots were successively hybridized with  $^{32}$ P-labeled LT and human  $\gamma$ -actin probes. *kb*, kilobases.
