Our name might give you the impression that we specialize only in oncogenes. As you can clearly see, our product line goes well beyond oncogenes. And even this extensive listing is only a fraction of our total line! We have cytoskeletal protein products, hemopoietic factor products, cytokines, interleukins, DNA tumor virus antibodies, cell adhesion antibodies, cardiovascular reagents, and products for neuroscience research. If you don't see what you need for your research, just give us a call at 800-662-2616 from anywhere in the continental US (NY included) or at 516-222-0023 from outside the US.

### SH2 Domains

- src, PLCγ, p85 agarose & western blotting reagents
- Quantitative ELISA’s: TGFα, EGF-R, pantropic p53
- Phosphatases 1B & T Cell

All products except TransProbe-1™ are for research use only. Not for use in diagnostic or therapeutic procedures.

SENIOR RESEARCH SCIENTIST

The Section of Hematology/Oncology and the Department of Pathology at the University of Arkansas for Medical Sciences are expanding their major program in cancer research. A primary area of focus will include autologous and allogeneic (related and unrelated) bone marrow transplantation using stem cell selection, T-cell depletion, gene therapy and in utero transplantation. A full-time laboratory based position is available at the Assistant or Associate Professor level with a major start-up package. Besides his/her own research in hematopoiesis and/or transplantation biology, the investigator will be involved in servicing the clinical Bone Marrow Transplantation Program supervising T-cell depletion and stem cell selection procedures. Dedicated laboratory space will be available for basic research and bone marrow processing. For this position experience in cell isolation, flow cytometry and cell culture techniques as well as knowledge of molecular biology techniques are preferred. A Ph.D. degree in Immunology or Biology and at least 3 years experience in cell biology with an emphasis on hematopoiesis are required.

Our compensation and benefits package reflects our commitment to attract the best scientific talent available.

If you are interested, please send CV and cover letter with three references to:

Bart Barlogie, M.D.
Director, Division Hematology/Oncology
University of Arkansas for Medical Sciences
4301 West Markham, Mail Slot 508
Little Rock, AR 72205-9985

The University of Arkansas is an equal opportunity/affirmative action employer. Women and minorities are encouraged to apply. Deadline for receipt of applications is March 31, 1993.

A Multidisciplinary Workshop on
Experimental and Clinical Precancerous Lesions:
APPROACHES TO CANCER PREVENTION AND EARLY DIAGNOSIS

Hotel Montreux Palace, Montreux, Switzerland, March 29-31, 1993

Chairpersons: P.A. Marks (USA) and R. Weil (CH)

Organizing Committee: H. zur Hausen (D), J. Jenkins (UK), L. Norton (USA), N. Odartchenko (CH), B.A.J. Ponder (UK), J. Rosai (USA), M. Sporn (USA), T. Sugimura (J)

Scientific Secretary: H. Turler, Université de Genève, Departement de Biologie Moléculaire, 30, Quai Ernest Ansermet, 1211 Geneva 4, Switzerland Tel. (22) 702-6114 or 6193 - Fax (22) 3296102

Main Topics: • Definition of Precancerous Lesions and of Cancer by Clinical, Histological, Genetic and Molecular Methods • Gene Mutations Involved in Development of Tumors • Chemoprevention Mechanisms Involved in Tumor Formation by SV40 and the Papilloma Viruses • Oncogenes and Tumor Suppressor Genes, Experimental and Clinical Implications

Registration fee: USD 300.00 Sponsor: Ares-Serono Symposia

GENERAL MOTORS CANCER RESEARCH FOUNDATION
INTERNATIONAL SYMPOSIUM
"RESISTANCE AGAINST ANTICANCER DRUGS: MOLECULAR MECHANISMS
AND CLINICAL OPPORTUNITIES"
Toronto, Canada, May 6-8, 1993

Dr. Victor Ling, Chairman
Ontario Cancer Institute, Toronto

Scientific Committee
Dr Plet Borst, Netherlands Cancer Center, Amsterdam; Dr Bruce Chabner, National Institutes of Health, Bethesda, MD; Dr Helen Chan, Hospital for Sick Children, Toronto, Ontario, Canada; Dr Philippe Gros, McGill University, Montreal, Quebec, Canada; Dr Ken Tew, Fox Chase Cancer Center, Philadelphia, PA; Dr Lap-Chee Tsui, Hospital for Sick Children, Toronto, Ontario, Canada; Dr Takashi Tsuruo, University of Tokyo, Japan.

Session Topics
* P-glycoprotein and non-P-glycoprotein MDR
* ABC transporters from various systems
* Topoisomerase mediated resistance
* Glutathione metabolism related resistance
* Other mechanisms of resistance
* Clinical studies: detection and circumvention of drug resistance
* Daily poster sessions and poster discussions

The conference site is the Four Seasons "Inn on the Park". Registration fee is $250Cdn/$215US which covers Opening Reception and 8 meals. For further information please contact the conference secretariat at (416)924-0671 X 4985 or Fax (416) 926-6529. The attendance at this symposium is limited and the abstract/application deadline is March 1st, 1993.

Hardware, Operating system, Software

Acceptable word processing packages are listed in Guidelines for Submitting Disks to AACR Publications, found in the back of every issue of Cancer Research. Tables and illustrations will be set from hard copy.

To submit your paper on disk, simply send a completed Disk Submission Form (found on the reverse of the Guidelines for Submitting Disks to AACR Publications) with your disk, labeled as shown above, to the AACR Publications Department. Be sure that the disk file is the most recent version of your paper and matches the hard copy printout.

For review purposes, 4 hard copy printouts of the manuscript and 4 copies of the original illustrations must accompany all submissions.
83rd ANNUAL MEETING OF THE
AMERICAN ASSOCIATION FOR CANCER RESEARCH
MAY 20-23, 1992 • SAN DIEGO

Each cassette is $11.50. • Programs consists of one to three cassettes.

Women in Cancer Research (WICR) was founded in 1988 for the purpose of providing support and recognition for the achievements of professional women in cancer research. Its 350 members cooperate primarily through networking, "mentoring," and mutual education. With the collaboration of the American Association for Cancer Research (AACR), WICR has compiled a Directory of Members that it is hoped will be useful for a variety of important purposes, including recommendations as well as the facilitation of communication among scientists in the field. During AACR meetings, WICR sponsors seminars and lectures, designed to enhance the research skills of its members, and it also hosts a reception to foster informal networking. In the past year, three WICR members (Lois Epstein, Ariel Hollinshead, and Margaret Kripke, the incoming President of the AACR) developed a report, "Features of a Successful Mentoring Program," for application on individual university campuses by senior faculty for the benefit of junior faculty.

Leila Diamond (left) was the moving spirit and first President of WICR and continues to serve WICR by maintaining the organizational archives. After many years at the Wistar Institute, she is now writing a biography of her friend and colleague, Charlotte Friend. Dr. Diamond has been an active member of the AACR since 1967 and served on its Board of Directors from 1980 to 1983. Her extensive AACR committee service includes terms as Chairperson of the Membership and Rhoads Award Committees and as a member of the Clowes Award, Nominating, Program, Public Issues, and Tellers Committees.

Brigid G. Leventhal (center) is the immediate Past President of WICR. She was responsible for initiating the formal incorporation of the organization and for drafting its By-Laws. Dr. Leventhal is Professor of Oncology/Pediatrics at Johns Hopkins University School of Medicine. She has been an active member of the AACR since 1970 and served on its Board of Directors from 1986 to 1989. Moreover, she has served as a member of the AACR Nominating, Program, Public Education, and Special Memberships Committees.

Sandra R. Wolman (right) is President of WICR from 1992 to 1993. She is in close contact with the AACR with the intention of establishing a formal working relationship between the two organizations. In 1993, WICR will give its first Student Travel Awards and will host several workshops and a lecture at the AACR Annual Meeting. Dr. Wolman is Professor of Pathology at Wayne State University School of Medicine. She has been an active member of the AACR since 1972 and served on its Board of Directors from 1988 to 1991. In addition, she has served on the AACR Exhibits, Program, and Publications Committees.

Margaret Foti
