CONTENTS

Carcinogenesis

4907 Comparison of Protein Adducts of Benzene Oxide and Benzoquinone in the Blood and Bone Marrow of Rats and Mice Exposed to [14C]Benzene. Thomas A. McDonald, Karen Yeowell-O’Connell, and Stephen M. Rappaport.

Endocrinology

Experimental Therapeutics

4940 Inhibition of Cyclic AMP-triggered Aromatase Gene Expression in Human Choriocarcinoma Cells by Antisense Oligodeoxynucleotide. Karin Ackermann, Jürgen Fauss, and Walter Pyerin.

4947 Increased Survival and Multilineage Hematopoietic Protection from Delayed and Severe Myelosuppressive Effects of a Nitrosourea with Recombinant Interleukin-11. Rodney Maze, Thomas Moritz, and David A. Williams.

4952 Induction of Apoptosis by Quercetin: Involvement of Heat Shock Protein. Yu-quan Wei, Xia Zhao, Yoshitaka Kariya, Hideki Fukata, Keisuke Teshigawara, and Atsushi Uchida.

4974 Extramustine-Binding Protein and Specific Binding of the Anti-Mitotic Compound Extramustine in Astrocytoma. A. Tommy Bergenheim, Per Björk, Jonas Bergh, Eva von Schoultz, Helena Svedberg, and Roger Henriksson.

Molecular Biology and Genetics

Regular Articles

Biochemistry and Biophysics

4885 The Inability of the Mouse mdr2 Gene to Confer Multidrug Resistance Is Linked to Reduced Drug Binding to the Protein. Ellen Buschman and Philippe Gros.

4899 Development and Reversion of Methionine Dependence in a Human Glioma Cell Line: Relation to Homocysteine Remethylation and Coahalamin Status. Torunn Fiskerstrand, Benedicte Christensen, Ole Bjørn Tynes, Per Magne Ueland, and Helga Refsum.

Perspectives in Cancer Research

4855 Mutations in the p53 Tumor Suppressor Gene: Clues to Cancer Etiology and Molecular Pathogenesis. M. S. Greenblatt, W. P. Bennett, M. Hellstein, and C. C. Harris.

4883 ATP-dependent Transport of Glutathione S-Conjugates by the Multidrug Resistance-associated Protein. Gabriele Jedlitschky, Inka Leier, Ulrike Buchholz, Melvin Center, and Dietrich Keppler.

4899 Development and Reversion of Methionine Dependence in a Human Glioma Cell Line: Relation to Homocysteine Remethylation and Cobalamin Status. Torunn Fiskerstrand, Benedicte Christensen, Ole Bjørn Tynes, Per Magne Ueland, and Helga Refsum.
5011 Cell Cycle Arrest by Colcemid Differs in Human Normal and Tumor Cells. Mitra N. Jha, James R. Bamburg, and Joel S. Bedford.

Tumor Biology

4993 Contortrostatin, a Snake Venom Disintegrin, Inhibits β1 Integrin-mediated Human Metastatic Melanoma Cell Adhesion and Blocks Experimental Metastasis. Mohit Trikha, Yves A. De Clerck, and Francis S. Markland.

5005 Apoptosis in Human Fibrosarcoma Cells Is Induced by a Multimeric Synthetic Tyr–Ile–Gly–Ser–Arg (YIGSR)-containing Polypeptide from Laminin. Woo Ho Kim, H. William Schnaper, Motoyoshi Nomizu, Yoshihiko Yamada, and Hynda K. Kleinman.

5011 Cell Cycle Arrest by Colcemid Differs in Human Normal and Tumor Cells. Mitra N. Jha, James R. Bamburg, and Joel S. Bedford.

Letters to the Editor

Announcements

Future Annual Meetings of the AACR
Gertrude Elion Cancer Research Award
New Privileges and Responsibilities of Corresponding Membership
Broadening of Associate Membership
Call for Nominations for Association Awards
Call for Nominations for Honorary Membership
Call for Suggestions for Association Officers and Directors
AACR Special Conferences in Cancer Research
Recent Death
Calendar of Events

Also available in the back of this issue:
Advance Registration Form for the 86th Annual Meeting
Guidelines for Submitting Disks to AACR Publications

AACR forms available in the back of this issue:
Application for Active and Corresponding Membership
Application for Associate Membership
