TABLE OF CONTENTS

Foreword
Thomas W. Kensler, Michael A. Trush, and Michael G. Simic ................................................................. 1876s

MECHANISMS OF CANCER AND AGING

Recent Studies on the Metabolic Activation of Chemical Carcinogens
James A. Miller ................................................................................................................................................... 1879s

Oncogene Activation and Tumor Suppressor Gene Inactivation during Multistage Mouse Skin Carcinogenesis
G. Tim Bowden, Brandt Schneider, Rick Domann, and Molly Kulesz-Martin ................................................ 1882s

Modulation of Oxidant Formation in Mouse Skin in Vivo by Tumor-promoting Phorbol Esters
Lawrence J. Marnett and Chuan Ji ..................................................................................................................... 1886s

Reactive Oxygen Species in Tumorigenesis
Daniel I. Feig, Thomas M. Reid, and Lawrence A. Loeb ................................................................................. 1890s

Reactive Oxygen-dependent DNA Damage Resulting from the Oxidation of Phenolic Compounds by a Copper-
Redox Cycle Mechanism
Yunbo Li and Michael A. Trush ......................................................................................................................... 1895s

Enzymatic Repair of Oxidative DNA Damage
Masahiko S. Satoh and Tomas Lindahl .............................................................................................................. 1899s

The Pathway Regulating GADD153 Induction in Response to DNA Damage Is Independent of Protein Kinase C
and Tyrosine Kinases
Jennifer D. Luethy and Nikki J. Holbrook ......................................................................................................... 1902s

BIOMARKERS AND SUSCEPTIBILITY FACTORS

Molecular Biomarkers for Aflatoxins and Their Application to Human Cancer Prevention
John D. Groopman, Gerald N. Wogan, Bill D. Roebuck, and Thomas W. Kensler ........................................... 1907s

Biomarkers for Human Uptake and Metabolic Activation of Tobacco-specific Nitrosamines
Stephen S. Hecht, Steven G. Carmella, Peter G. Foiles, and Sharon E. Murphy ................................................ 1912s

DNA Markers of Oxidative Processes in Vivo: Relevance to Carcinogenesis and Anticarcinogenesis
Michael G. Simic .................................................................................................................................................. 1918s

Radioadaptation to the Mutagenic Effect of Ionizing Radiation in Human Lymphoblasts: Molecular Analysis of
HPRT Mutants
O. Rigaud and E. Moustacchi ............................................................................................................................... 1924s

Inflammation, Chromosomal Instability, and Cancer: The Schistosomiasis Model
Miriam P. Rosin, Wagida A. Anwar, and Amanda J. Ward ................................................................................ 1929s

MOLECULAR DIAGNOSTICS

Mutagenesis of the H-ras Protooncogene and the p53 Tumor Suppressor Gene
Peter Cerutti, Perwez Hussain, Charareh Pourzand, and Fernando Aguilar ..................................................... 1934s

Cancer Screening Based on Genetic Alterations in Human Tumors
Li Mao and David Sidransky ............................................................................................................................... 1939s

Phenotypic and Genotypic Events in Gastric Carcinogenesis
Pelayo Correa and Yih-horang Shiao .................................................................................................................. 1941s

Test Reliability Is Critically Important to Molecular Epidemiology: An Example from Studies of Human
Papillomavirus Infection and Cervical Neoplasia
Mark H. Schiffman and Arthur Schatzkin ............................................................................................................. 1944s

NUTRITION, EXERCISE, AND CANCER

Experimental Evidence for Inhibition of N-Nitroso Compound Formation as a Factor in the Negative Correlation
between Vitamin C Consumption and the Incidence of Certain Cancers
Sidney S. Mirvish .................................................................................................................................................. 1948s

Is There a Significant Role for Lipid Peroxidation in the Causation of Malignancy and for Antioxidants in
Cancer Prevention?
Anthony T. Diplock, Catherine A. Rice-Evans, and Roy H. Burdon ................................................................... 1952s
