# TABLE OF CONTENTS

## Foreword
Thommas W. Kensler, Michael A. Trush, and Michael G. Simic .......................................................... 1876s

## MECHANISMS OF CANCER AND AGING

**Recent Studies on the Metabolic Activation of Chemical Carcinogens**
James A. Miller .................................................................................................................. 1879s

**Oncogene Activation and Tumor Suppressor Gene Inactivation during Multistage Mouse Skin Carcinogenesis**
G. Tim Bowden, Brandt Schneider, Rick Domann, and Molly Kulesz-Martin ................................... 1882s

**Modulation of Oxidant Formation in Mouse Skin in Vivo by Tumor-promoting Phorbol Esters**
Lawrence J. Marnett and Chuan Ji ..................................................................................... 1886s

**Reactive Oxygen Species in Tumorigenesis**
Daniel I. Feig, Thomas M. Reid, and Lawrence A. Loeb .......................................................... 1890s

**Reactive Oxygen-dependent DNA Damage Resulting from the Oxidation of Phenolic Compounds by a Copper-Redox Cycle Mechanism**
Yunbo Li and Michael A. Trush ....................................................................................... 1895s

**Enzymatic Repair of Oxidative DNA Damage**
Masahiko S. Satoh and Tomas Lindahl ............................................................................. 1899s

**The Pathway Regulating GADD153 Induction in Response to DNA Damage Is Independent of Protein Kinase C and Tyrosine Kinases**
Jennifer D. Luethy and Nikki J. Holbrook ....................................................................... 1902s

## BIOMARKERS AND SUSCEPTIBILITY FACTORS

**Molecular Biomarkers for Aflatoxins and Their Application to Human Cancer Prevention**
John D. Groopman, Gerald N. Wogan, Bill D. Roebuck, and Thomas W. Kensler ...................... 1907s

**Biomarkers for Human Uptake and Metabolic Activation of Tobacco-specific Nitrosamines**
Stephen S. Hecht, Steven C. Carmella, Peter G. Foiles, and Sharon E. Murphy ......................... 1912s

**DNA Markers of Oxidative Processes in Vivo: Relevance to Carcinogenesis and Anticarcinogenesis**
Michael G. Simic ........................................................................................................... 1918s

**Radioadaptation to the Mutagenic Effect of Ionizing Radiation in Human Lymphoblasts: Molecular Analysis of HPRT Mutants**
O. Rigaud and E. Moustacchi ....................................................................................... 1924s

**Inflammation, Chromosomal Instability, and Cancer: The Schistosomiasis Model**
Miriam P. Rosin, Wagida A. Anwar, and Amanda J. Ward ................................................... 1929s

## MOLECULAR DIAGNOSTICS

**Mutagenesis of the H-ras Protooncogene and the p53 Tumor Suppressor Gene**
Peter Cerutti, Perwez Hussain, Charareh Pourzand, and Fernando Aguilar .............................. 1934s

**Cancer Screening Based on Genetic Alterations in Human Tumors**
Li Mao and David Sidransky ........................................................................................... 1939s

**Phenotypic and Genotypic Events in Gastric Carcinogenesis**
Pelayo Correa and Yih-horng Shiao ................................................................................... 1941s

**Test Reliability Is Critically Important to Molecular Epidemiology: An Example from Studies of Human Papillomavirus Infection and Cervical Neoplasia**
Mark H. Schiffman and Arthur Schatzkin .......................................................................... 1944s

## NUTRITION, EXERCISE, AND CANCER

**Experimental Evidence for Inhibition of N-Nitroso Compound Formation as a Factor in the Negative Correlation between Vitamin C Consumption and the Incidence of Certain Cancers**
Sidney S. Mirvish ........................................................................................................... 1948s

**Is There a Significant Role for Lipid Peroxidation in the Causation of Malignancy and for Antioxidants in Cancer Prevention?**
Anthony T. Diplock, Catherine A. Rice-Evans, and Roy H. Burdon ........................................ 1952s
### MOLECULAR MECHANISMS OF CHEMOPREVENTION
