AMERICAN ASSOCIATION FOR CANCER RESEARCH
GUIDELINES FOR APPLICATION FOR ACTIVE AND CORRESPONDING MEMBERSHIP

BENEFITS OF MEMBERSHIP

The American Association for Cancer Research (AARC), a scientific society of over 10,000 laboratory and clinical cancer researchers, was founded in 1907 to facilitate communication and dissemination of knowledge among scientists and others dedicated to the cancer problem; to foster research in cancer and related biomedical sciences; to encourage the presentation and discussion of new and important observations in the field; to foster public education, science education, and training; and to advance the understanding of cancer etiology, prevention, diagnosis, and treatment throughout the world.

Members of the AARC enjoy the following benefits:

1. the privilege of sponsoring a proffered paper (abstract) for consideration for presentation at the AARC annual meeting;
2. an advance copy of the Program and Proceedings of the American Association for Cancer Research pertaining to each annual meeting;
3. reduced registration rates at annual meetings;
4. priority notice of small, focussed meetings in the AARC’s exciting series of Special Conferences in Cancer Research;
5. reduced registration rates for Special Conferences;
6. opportunities for participation in AARC meetings in North America and abroad with other scientific societies around the world;
7. receipt of AARC Newsletters and other important announcements;
8. early notification of and reduced rates for participation in the AARC Employment Register;
9. an up-to-date Membership Directory of thousands of researchers in the cancer field;
10. the professional benefits of AARC’s public education activities concerning funding for cancer research and press coverage of the latest research findings;
11. participation in Summer Workshops that foster networking opportunities and science education for young investigators; and
12. many more ongoing benefits.

QUALIFICATIONS FOR MEMBERSHIP

Active membership in the AARC is open to investigators who live in the Americas. Individuals who have conducted two years of research resulting in peer-reviewed publications relevant to cancer, or who have made substantial contributions to cancer research in an administrative or educational capacity, are eligible. If a candidate has conducted research in an area of biomedical science related to cancer, he or she will qualify for membership. Evidence of patents relevant to cancer research may be submitted as qualifications for membership in lieu of peer-reviewed publications.

Corresponding membership is open to persons who are not residents of the Americas. The qualifications for corresponding membership are the same as those indicated above for active membership. Visiting scientists from outside the Americas who intend to return to their countries of origin by the anticipated time of election should apply for corresponding membership. All other visiting scientists should apply for active membership and transfer to corresponding status upon leaving the Americas.

Graduate and medical students, postdoctoral fellows, and physicians in training who do not yet meet the above qualifications for active or corresponding membership should apply for associate membership. Forms for associate membership are available from the AARC Office.

PROCEDURES FOR APPLICATION

There are three deadlines for the receipt of a membership application: January 1, May 1, and September 1 of each year. The Membership Committee will review all complete applications for active membership that have been received by these deadlines and will submit recommendations on each candidate to the Board of Directors which formally elects all members. The same procedure is followed by the Special Memberships Committee which receives applications for corresponding membership. Candidates will be notified according to the following schedule:

<table>
<thead>
<tr>
<th>Receipt of Application in AARC Office</th>
<th>Notification of Candidate</th>
</tr>
</thead>
<tbody>
<tr>
<td>January 1</td>
<td>March</td>
</tr>
<tr>
<td>May 1</td>
<td>July</td>
</tr>
<tr>
<td>September 1</td>
<td>November</td>
</tr>
</tbody>
</table>

A complete application consists of the following material:

1. 6 copies of the form on the opposite side of this page, with all requested information provided.
2. 5 copies of the candidate’s most current curriculum vitae and bibliography.
3. 5 copies of a letter of recommendation from a nominator who is an active, corresponding, emeritus, or honorary member of the AARC (at least one copy must be a signed, original letter). This letter should describe the candidate’s achievements in laboratory research, clinical investigations, or epidemiological research, and it should affirm that this research adheres to accepted ethical scientific standards. –OR– The nominator may supply the responses requested at the bottom of the application form in the section entitled “STATEMENT OF SUPPORT” (at least one copy of the form must be the signed original).
4. 5 copies of a letter of recommendation as described in Item 3 above from a seconder who is an active, corresponding, emeritus, or honorary member of the AARC (at least one copy must be a signed, original letter). –OR– The seconder may supply the responses requested at the bottom of the application form in the section entitled “STATEMENT OF SUPPORT” (at least one copy of the form must be the signed original).
5. 5 reprints of each of two publications on which the candidate appears as author. As noted above, evidence of patents developed by the candidate may be submitted in lieu of one or both of the publications. If submitting patents, supply patent number and year awarded.

All material should be collated into five complete sets with the original application form as a covering document and sent to the address given below. Questions regarding procedures for membership application may also be directed to the following address:

American Association for Cancer Research
Public Ledger Building, Suite 816
150 S. Independence Mall West
Philadelphia, PA 19106-3483
Phone: 215/440-9300
FAX: 215-440-9313

RESPONSIBILITIES OF MEMBERSHIP

Candidates should be aware of the following responsibilities of membership in the AARC. Active members must pay annual dues. In 1995 annual dues for active members are $160, $95 of which is designated for AARC journal subscriptions. Newly elected members of the AARC who have already purchased subscriptions to Cancer Research, Clinical Cancer Research, Cell Growth & Differentiation, or Cancer Epidemiology, Biomarkers & Prevention at the higher, member rates will receive reimbursement of the unused portion of those subscriptions once their first year’s membership dues are paid in full.

Corresponding members are required to pay dues ($80 in 1995) and may, if they wish, subscribe to Cancer Research, Clinical Cancer Research, Cell Growth & Differentiation, or Cancer Epidemiology, Biomarkers & Prevention at reduced member rates.

Applicants elected in March will be responsible for payment of that year’s dues; applicants elected in July and November will pay dues for the following year. Applicants elected in March and July will be eligible to sponsor an abstract for the next annual meeting. Every effort will be made to afford the same opportunity to applicants elected in November.

Margaret Foti
Executive Director
APPLICATION FOR ACTIVE OR CORRESPONDING MEMBERSHIP

CANDIDATE IS APPLYING FOR (Check one):  □ ACTIVE  □ CORRESPONDING  MEMBERSHIP

STATEMENT OF SUPPORT (in place of letters of recommendation)
Instead of submitting letters of recommendation, either the nominator or the seconder or both may complete the following section:

How long has the candidate worked in the field of cancer research? ______ years
Will the candidate make a long-term contribution to cancer research? Yes ___ No ___
Does the candidate’s research adhere to accepted ethical standards? Yes ___ No ___
I therefore recommend this candidate for membership in the American Association for Cancer Research.

Signature of nominator* ___________________________ Date ___________________________

Signature of seconder* ___________________________ Date ___________________________

See Guidelines for Application on the reverse side of this form for further instructions.

*Both nominator and seconder must be active, corresponding, emeritus, or honorary members of the AACR.

(This form may be reproduced.)
QUALIFICATIONS FOR MEMBERSHIP

Associate membership is open to graduate students, medical students, postdoctoral fellows, and physicians in training who are following a course of study or who are working in a research program relevant to cancer. Scientists in training who already have a substantial record of publications may wish to apply for active or corresponding membership which confers full benefits of membership.

BENEFITS OF MEMBERSHIP

The American Association for Cancer Research (AACR), a scientific society consisting of laboratory and clinical cancer researchers, was founded in 1907 to facilitate communication and dissemination of knowledge among scientists and others dedicated to the cancer problem; to foster research in cancer and related biomedical sciences; to encourage presentation and discussion of new and important observations in the field; to foster public education, science education, and training; and to advance the understanding of cancer etiology, prevention, diagnosis, and treatment throughout the world. Associate members of the AACR enjoy the following benefits:

1. the privilege of sponsoring a paper for presentation at the AACR annual meeting provided that (a) the associate member is the presenter of the paper and (b) an active, corresponding, emeritus, or honorary member in good standing of the AACR also signs the abstract of the paper in support of the work (in this instance, the member who cosigns the abstract does not lose his or her own sponsorship privilege);

2. an advance copy of the scientific Program and (if one has been purchased by the associate member) the Proceedings of the American Association for Cancer Research which contains abstracts of all papers being presented at each annual meeting;

3. the privilege of registering for the annual meeting at the low student rate (this rate is otherwise available only to predoctoral students);

4. preferred access to the AACR Employment Register;

5. optional subscriptions to the Association's high-quality journals Cancer Research, Cell Growth & Differentiation, Cancer Epidemiology, Biomarkers & Prevention, and Clinical Cancer Research at reduced member rates;

6. priority notification of events in the AACR's series of special conferences on timely subjects in the field;

7. reduced registration rates at special conferences;

8. the receipt of AACR newsletters, meeting announcements, and an up-to-date membership directory; and

9. the facilitation of informal scientific exchange with leading researchers in the cancer field.

PROCEDURES FOR APPLICATION

Persons wishing to apply for associate membership must use the official application form on the reverse side of these instructions. Each candidate for associate membership must be nominated by an active, corresponding, emeritus, or honorary member in good standing of the AACR. Three completed copies of the form should be submitted; at least one of these copies must carry the original signatures of both the candidate and the nominator. The application form may be submitted to the Association Office at any time.

After review of applications for associate membership, the Executive Director will notify candidates of their election or deferral within one month of the receipt of the application form. A check for one year's dues payment must accompany the application. Dues for 1994 are $30 for associate members residing in the Americas and $40 for residents of other countries. For 1995 these rates are $35 and $45, respectively. This fee will be refunded to any candidate deemed to be ineligible for associate membership.

Checks should be in U.S. currency, made payable to AACR, Inc., and drawn on a U.S. bank. Send the three copies of the application form and the appropriate dues payment to:

American Association for Cancer Research
Public Ledger Building, Suite 816
150 S. Independence Mall West
Philadelphia, PA 19106-3483
215/440-9300

RESPONSIBILITIES OF MEMBERSHIP

Associate members must pay annual dues in an amount to be determined by the AACR Board of Directors. Dues for 1994 have been set at $30 per year for residents of the Americas and $40 for residents of other countries. For 1995 these rates are $35 and $45, respectively. If an application is submitted by August 31, the accompanying dues payment will be credited to the current year. Candidates submitting applications between September 1 and December 31 may indicate whether they wish their dues payments credited to the current or forthcoming year. Candidates should be aware, however, that associate members may sponsor an abstract for the annual meeting only if their dues for the current year are paid. For example, an associate member submitting an abstract in October 1994 for the forthcoming annual meeting must have paid dues for 1994. Any newly elected associate members of the AACR who have already purchased subscriptions to Cancer Research, Cell Growth & Differentiation, Cancer Epidemiology, Biomarkers & Prevention, and Clinical Cancer Research at the higher, nonmember rate will receive a refund for the unused portion of that subscription upon receipt of their payment for a member's subscription.

Each Fall the AACR will send to current associate members an invoice for dues for the forthcoming year. Payment of this invoice must be accompanied by a statement signed by the associate member's current registrar, dean, or department head, verifying the member's current academic status. The Association's By-Laws state that dues are payable for each year in advance by January 1 of the year to which they should be applied. An individual may be an associate member for a maximum of five years. Each year in which an individual pays dues will count as one full year of associate membership. Thus, an associate member who pays dues for 1994 may retain associate membership until December 31, 1998. The Board of Directors may terminate the membership of an associate member whose dues are in arrears for two years.

(Please type or print name of AACR member* in good standing.)

SIGNATURES
I hereby apply for associate membership in the American Association for Cancer Research. I have read the instructions on the reverse side of this form, and I understand the privileges and responsibilities of this class of membership. I certify that the statements on this application are true.

Signature of Candidate: _____________________________ Date: __________

I recommend this candidate for associate membership in the American Association for Cancer Research. To the best of my knowledge, the candidate is qualified for this class of membership, and the statements on this application are true.

Signature of Nominator*: _____________________________ Date: __________

Submit three copies of this form. At least one copy must contain the original signatures of the candidate and the nominator. Enclose a check in U.S. funds, made payable to AACC, Inc., and drawn on a U.S. bank for one year's dues. For 1994 dues are $30 for associate members residing in the Americas and $40 for residents of other countries. For 1995, these rates will be $35 and $45, respectively.

Check one of the following boxes only if this form is being submitted between September 1 and December 31:
The enclosed dues payment should be applied to the ☐ current ☐ forthcoming calendar year.

(NOTE: If dues are applied to the forthcoming year, membership will take effect on January 1, but the candidate will not be eligible to sponsor an abstract for presentation at the annual meeting in March or April of that year.) See Guidelines for Application on the reverse side of this form for further instructions.

*Nominate must be active, corresponding, emeritus, or honorary member of the AACC.

Software packages that we are unable to translate:

 FrameMaker
 PageMaker

 Ready, Set, Go
 Scientific Writer

Disks produced on IBM or IBM-compatible computers are preferred, but those produced on some Apple or Wang computers can also be converted. Because of the file structures and internal coding, we cannot accept disks created on desktop publishing systems or those created on proprietary typesetting systems. We also cannot guarantee that all special characters can be translated. Tabular and mathematical material, such as equations, will not be captured from the disk but will be rekeyed.

To expedite work and for your own security, we do require that you submit a hard copy printout of the disk file. The tables and equations will be keyed from this hard copy. We also need to know the name of the file to be converted, the type of hardware (e.g., IBM PC) on which the files were created, the operating system (e.g., DOS 3.3), and the version of the software (e.g., WordPerfect 5.1) used to create the file.

PLEASE FILL OUT ALL INFORMATION ON REVERSE SIDE AND SUBMIT THIS FORM WITH YOUR DISK. DISKS WILL NOT BE PROCESSED WITHOUT THIS INFORMATION.
DISK SUBMISSION FORM

AACR journals are now using personal computers to copyedit manuscripts accepted for publication. When submitting a revised manuscript, authors are encouraged to submit an electronic disk of the paper along with the required four hard copy printouts. Disks will ultimately be returned to the authors.

See reverse for the word processing packages that can be accepted.

File preparation

Please be sure that the file you send is the most recent version of the manuscript and that it matches the most recently submitted printed copy. The file should contain all the parts of the manuscript in one file. Mathematical and tabular material, however, will be processed in the traditional manner and may be excluded from the disk file.

Note: AACR does not assume responsibility for errors in conversion of customized software, newly released software, or special characters.

Please label the outside of the disk with the journal name, the first author's name, a partial title of the manuscript, and the name of the computer file used to access the manuscript on disk. To process your disk efficiently, we need the following information. Please be sure to provide ALL the information.

Name used to access paper on disk: ____________________________________________
Name of computer used (e.g., IBM/PS2): ________________________________________
Operating system and version (e.g., DOS 3.3): ________________________________
Word processing program and version (e.g., WordPerfect 5.0): ___________________
    [See reverse for acceptable programs.]

Manuscript number: __________________________________________________________
First author: _________________________________________________________________
Corresponding author (if different from first author): ______________________________
Telephone/FAX numbers: _______________________________________________________

AMERICAN ASSOCIATION FOR CANCER RESEARCH

BENEFITS OF MEMBERSHIP

The American Association for Cancer Research (AACR) is a scientific society consisting of laboratory and clinical cancer researchers. It was founded in 1907 and its purposes are "to facilitate communication and dissemination of knowledge among scientists and others dedicated to the cancer problem; to foster research in cancer and related biomedical sciences; to encourage presentation and discussion of new and important observations in the field; to foster public education, science education, and training; and to advance the understanding of cancer etiology, prevention, diagnosis, and treatment throughout the world." Members of the AACR enjoy the following benefits:

1. the opportunity to subscribe to the journals Cancer Research, Cell Growth & Differentiation, Cancer Epidemiology, Biomarkers & Prevention, and Clinical Cancer Research at the reduced member rate.

   - Cancer Research publishes over 7,000 pages per year of timely, significant research. With over 40,000 citations to its articles per year, it rates as the most highly cited journal in the cancer field.

   - Cell Growth & Differentiation, a journal of the molecular biology of cancer, has established a tradition of rapid publication with an average review time of 2-3 weeks and an average of 10 weeks between acceptance and publication.

   - Cancer Epidemiology, Biomarkers & Prevention has already established itself as a leading journal with a wholly unique scope, providing a common forum for three scientific areas that are rapidly expanding our knowledge of cancer causation and prevention in humans.

   - Clinical Cancer Research, the AACR's newest journal, began publication in 1995. Focusing on innovative translational studies, it publishes original laboratory and clinical research on the molecular characterization, prevention, diagnosis, and therapy of human cancer.

2. the privilege of sponsoring a paper for possible presentation at the AACR Annual Meeting;

3. an advance copy of the Program and, if one has been purchased, Proceedings pertaining to each Annual Meeting;

4. reduced registration rates at Annual Meetings;

5. priority notice of and reduced registration rates for small, focused meetings in the AACR's Special Conferences in Cancer Research;

6. opportunities for participation in the AACR's meetings with other scientific societies around the world;

7. subscriptions to future AACR journals at reduced member rates;

8. the receipt of AACR newsletters and meeting announcements;

9. early notification of and reduced rates for participation in the Employment Register;

10. an up-to-date Membership Directory;

11. participation in Summer Workshops that foster networking opportunities and science education for young investigators;

12. the benefits of the AACR's public education activities concerning funding for cancer research and press coverage of the latest research findings; and

13. many more ongoing benefits.

- CAN 516 (3 cassettes, $34.50) Minisymposium Molecular Biology/Biochemistry 1: New Tumor Suppressor Genes
- CAN 517 (2 cassettes, $23.00) Plenary Session: Integrated View of the Cancer Cell
- CAN 518 (1 cassette, $11.50) Controversy Session 1: Breast Cancer Prevention: What Will We Advise Women With BRCA1?
- CAN 520 (3 cassettes, $34.50) Minisymposium Clinical Investigations 2: Tumor Vaccine and Cytolytic T-Cell Generation
- CAN 521 (3 cassettes, $34.50) Minisymposium Molecular Biology/Biochemistry 4: Retinoids and Their Receptors
- CAN 522 (3 cassettes, $34.50) Minisymposium Experimental Therapeutics 2: Molecular Studies of Follates
- CAN 523 (3 cassettes, $34.50) Minisymposium Biology 4: Advances in Invasion, Metastasis, and Tumorigenesis Research
- CAN 524 (2 cassettes, $23.00) Symposium 1: Growth Factors, Their Receptors, and Differentiation
- CAN 525 (2 cassettes, $23.00) Symposium 2: Oligonucleotide-mediated Modulation of Mammalian Gene Expression
- CAN 526 (2 cassettes, $23.00) Symposium 3: Biomarkers of Carcinogenesis
- CAN 527 (2 cassettes, $23.00) Symposium 4: DNA Repair Pathways: Recent Surprises
- CAN 528 (2 cassettes, $23.00) Symposium 5: Mechanistic Basis of Ethnic Differences in Cancer Risk
- CAN 529 (1 cassette, $11.50) Presidential Address: There’s More Than One Way to Skin a Cat or Regulation of the Polyclonal Hydrocarbon-inducible Cytochrome P450A1 Gene, Edward Bresnick; Presentation of the Third Gertrude Elion Cancer Research Award
- CAN 530 (2 cassettes, $23.00) Careers and Opportunities in Cancer Research: Models for Success: A Symposium Organized by the Committee on Minority Issues
- CAN 531 (1 cassette, $11.50) Meet the Expert Sunrise Session: Everything You Always Wanted to Know About Prostatic Cancer But Were Afraid to Ask, John T. Isaacs
- CAN 532 (1 cassette, $11.50) Meet the Expert Sunrise Session: Colon Cancer, Ronald N. Buck
- CAN 533 (1 cassette, $11.50) Meet the Expert Sunrise Session: Peripheral Blood Progenitor Cell Transplantation, Elizabeth J. Shpall
- CAN 534 (1 cassette, $11.50) Meet the Expert Sunrise Session: Multivariate Determinants of Radiotherapy: Predictive Assays in Radiation Oncology, Richard P. Hill
- CAN 535 (1 cassette, $11.50) Meet the Expert Sunrise Session: Glutathione and Associated Enzymes in Anticancer Drug Response, Kenneth D. Tew
- CAN 536 (3 cassettes, $34.50) Symposium 6: Genetic Susceptibility to Cancer
- CAN 537 (2 cassettes, $23.00) Symposium 7: Combinatorial Libraries for Cancer Research and Drug Discovery
- CAN 538 (2 cassettes, $23.00) Symposium 8: Telomeres and Telomeras
- CAN 539 (2 cassettes, $23.00) Symposium 9: Immunotherapy: Tumor Vaccines
- CAN 540 (2 cassettes, $23.00) Symposium 10: Dysregulation Defining Malignancy
- CAN 541 (3 cassettes, $34.50) Minisymposium Radiobiology/Radiation Oncology 2: Radiation-induced Gene Expression
- CAN 542 (3 cassettes, $34.50) Minisymposium Clinical Investigations 4: New Drugs: Phase I Studies
- CAN 543 (3 cassettes, $34.50) Minisymposium Experimental Therapeutics 12: Transcriptional/Translational Control of Drug Resistance Genes
- CAN 544 (3 cassettes, $34.50) Minisymposium Biology & Signal Transduction II
- CAN 545 (1 cassette, $11.50) Controversy Session 2: Does the Current Body of Dioxidin Assess the Risk to the Health of the North American Population?
- CAN 546 (1 cassette, $11.50) Fourth American Cancer Society Award Lecture: Inherited Susceptibility to Cancer: From Epidemiology to Interventional Research, Frederick P. Li
- CAN 547 (1 cassette, $11.50) Public Education Session: Consumer Involvement in the Breast Cancer Research Process: Frances M. Visco
- CAN 548 (1 cassette, $11.50) Controversy Session 3: What Are the Benefits and Limits of Prostate-specific Antigen as a Screening Tool?
- CAN 549 (3 cassettes, $34.50) Minisymposium Carcinogenesis 11: Carcinogenesis in Humans
- CAN 550 (3 cassettes, $34.50) Minisymposium Molecular Biology/Biochemistry 10: Signal Transduction and Tumorigenesis
- CAN 551 (3 cassettes, $34.50) Minisymposium Experimental Therapeutics 18: Targeting Topoisomeras I
- CAN 552 (3 cassettes, $34.50) Minisymposium Organ Site/Translational Session 4: Oncogenes, Tumor Suppressor Genes, and Growth Factors in Breast Cancer
- CAN 553 (3 cassettes, $34.50) Minisymposium Biology 11: Apoptosis III
- CAN 554 (2 cassettes, $23.00) Symposium 11: New Strategies and Targets for Therapy of Cancer
- CAN 555 (2 cassettes, $23.00) Symposium 12: The Biology of Radiation Oncology
- CAN 557 (2 cassettes, $23.00) Symposium 12: Genes, Development, and Cancer
- CAN 558 (2 cassettes, $23.00) Symposium 14: Dietary Intervention in Hormonal Carcinogenesis
- CAN 559 (2 cassettes, $23.00) AACR Annual Business Meeting
- CAN 561 (1 cassette, $11.50) Meet the Expert Sunrise Session: Human Gene Therapy in Urological Oncology, Jonathan W. Simons
- CAN 562 (1 cassette, $11.50) Meet the Expert Sunrise Session: Chemical and Viral Etiologies of Liver Cancer: Application of Mechanistic Knowledge to Preventive Interventions, John D. Groopman
- CAN 563 (1 cassette, $11.50) Meet the Expert Sunrise Session: Biochemical Determinants of Carcinogenesis: The AH Receptor and Human Responses to Dioxins, Allan B. Okey
- CAN 564 (1 cassette, $11.50) Meet the Expert Sunrise Session: Organ-specific Carcinogenesis (Location, Location, Location) Cheryl Lyn Walker
- CAN 565 (1 cassette, $11.50) NIH Grants Session: Succeeding in a Changing Environment
- CAN 566 (2 cassettes, $23.00) Symposium 15: Translational Research in Breast Cancer
- CAN 567 (2 cassettes, $23.00) Symposium 16: DNA Methylation
- CAN 568 (2 cassettes, $23.00) Symposium 17: Genetic Approaches to Invasion and Metastasis
- CAN 569 (2 cassettes, $23.00) Symposium 18: The Role of Stromal-epithelial Interactions in Growth and Neoplasia
- CAN 570 (3 cassettes, $34.50) Minisymposium Immunology/Biological Therapy 7: New Developments in Tumor Immunobiology
- CAN 571 (3 cassettes, $34.50) Minisymposium Epidemiology 3: Carcinogen Metabolism and Biomarkers
- CAN 572 (3 cassettes, $34.50) Minisymposium Clinical Investigations 7: Experimental and Clinical Gene Therapy
- CAN 573 (3 cassettes, $34.50) Minisymposium Biology 15: Cell Cycle II
- CAN 574 (3 cassettes, $34.50) Minisymposium Experimental Therapeutics 24: Targeting ras
- CAN 575 (1 cassette, $11.50) Controversy Session 4: Is Mammography Before Age 50 Beneficial?
- CAN 577 (1 cassette, $11.50) Late-Breaking Research Session
- CAN 578 (3 cassettes, $34.50) Minisymposium Organ Site/Translational Session 6: Gastrointestinal Cancer: Susceptibility, Diagnosis, and Prognosis
THE FOLLOWING PROGRAMS ARE AVAILABLE ON VIDEO CASSETTE

EACH VIDEO PROGRAM CONSISTS OF ONE VIDEO, $39.00 UNLESS OTHERWISE NOTED

- CAN 517V (2 cases, $58.00) Plenary Session: Integrated View of the Cancer Cell
- CAN 529V Presidential Address: There’s More Than One Way to Skin a Cat or Regulation of the Polycyclic Hydrocarbon-inducible Cytochrome P450A1 Gene, Edward Bresnick; Presentation of the Third Gertrude Elion Cancer Research Award
- CAN 546V Fourth American Cancer Society Award Lecture: Inherited Susceptibility to Cancer: From Epidemiology to Interventional Research, Frederick P. Li
- CAN 587V Fourteenth Cornelius P. Rhoads Memorial Award Lecture: Mapping Genes and Genomes: Genetic Dissection of Complex Traits, Eric S. Lander
- CAN 5103V Fourteenth Bruce F. Cain Memorial Award Lecture: Initiatives with Platinum- and Quinoline-based Antitumor Molecules, Kenneth R. Harrap

Novel Strategies Against Resistant Cancers

November 17-21, 1995
Sanibel Harbour Resort and Spa
Ft. Myers, Florida

Keynote Address
Donald S. Coffey / Baltimore, MD

Recently Described Targets

Telomeres and Telomerase
Bradford E. Windle / San Antonio, TX
Jerry W. Shay / Dallas, TX

Farnesyl Transferase
Allen I. Oliff / West Point, PA
Alexander W. Wood / Nutley, NJ

Blood Vessels and Microenvironment
Angiogenesis
Adrian L. Harris / Oxford, England
S. Gail Eckhardt / San Antonio, TX

Strategies with Previously Described Targets

Topoisomerase I Inhibitor
Yves G. Pommier / Bethesda, MD
Mace L. Rothenberg / San Antonio, TX

Thymidylate Synthase
Yousef M. Rustum / Buffalo, NY
Neil J. Clendeninn / San Diego, CA
James L. Abbruzzese / Houston, TX

It's A Matter of Timing
William J.M. Hrushesky / Albany, NY

Biology and Clinical Trials in Resistance

Multidrug Resistance Proteins
Piet Borst / Amsterdam, The Netherlands
Susan P.C. Cole / Kingston, Ontario, Canada
Kenneth D. Tew / Philadelphia, PA

Reversing Drug Resistance
William S. Dalton / Tucson, AZ
Branimir I. Sikic / Stanford, CA

Gene Manipulating Strategies
Glenn Dranoff / Cambridge, MA
Eva Y. Lee / San Antonio, TX

Summary
Victor Ling / Vancouver, British Columbia, Canada
Daniel D. Von Hoff / San Antonio, TX

Additional Speakers to be Announced
Applicants are encouraged to submit abstracts for poster presentation.
Selected proffered papers will also be scheduled for oral presentations.

Application deadline: September 29, 1995

Information and Application Forms
American Association for Cancer Research
Public Ledger Building, Suite 816
150 South Independence Mall West
Philadelphia, PA 19106-3483
215-440-9300 215-440-9313 (FAX)
1996 ANNUAL MEETING
TITLES OF MAJOR SESSIONS
(Confirmed Chairpersons in Parentheses)

AMERICAN ASSOCIATION FOR CANCER RESEARCH

Special Plenary Session
Twenty-fifth Anniversary of the National Cancer Act: Progress and Promise (Joseph R. Bertino)

Symposia
Apoptosis: Manipulating Programmed Cell Death in Cancer (David E. Fisher)
Matrix Metalloproteases and Inhibitors (Lynn M. Matrisian)
Cell Cycle: Targets for Therapy (Stephen H. Friend)
Endogenous DNA Damage: Detection and Biological Significance (John M. Essigmann)
Cell Signalling
Recent Developments in Gene Therapy (Drew M. Pardoll)
Cancer Chemoprevention in Humans (Thomas W. Kensler)
Genetic Predisposition to Cancer (Mark H. Skolnick)
Cell Responses to DNA Damaging Agents (Nathan A. Berger)
Drug Resistance: Transcriptional and Translational Mechanisms (Kathleen W. Scotto)
Monoclonal Antibodies: Clinical Mechanisms and Effectiveness
Targeting Growth Factor Receptors for Therapy (John Mendelsohn)
Melanoma as a Clinical Model (Alan N. Houghton)
Thymidylate Synthetase and Its Inhibitors
Nutrition and Cancer (Walter C. Willett)
Ampy Transcription Factors and Malignancy (Lorraine J. Gudas)
Steroid Hormones: Breast and Prostate Cancer (Myles A. Brown)
Viral Mechanisms of Carcinogenesis (Harald zur Hausen)
Tumor Suppressor Genes (Bert Vogelstein)
Ovarian Cancer: From the Laboratory to the Clinic (Robert F. Ozols)
Drug Metabolizing Enzymes in Cancer Prevention and Therapy (Cecil B. Pickett)
Cell Adhesion Molecules and the Cytoskeleton
Tumor Angiogenesis (Judah Folkman and Mark A. Goldberg)
Neuroblastoma: Recent Advances in Diagnosis and Treatment (Garrett M. Brodeur)
Telomeres, Cell Senescence, and Cancer (Calvin B. Harley)

Pre-Meeting Methods Workshops
Quantitative Biology and Pharmacodynamics (Robert C. Jackson)
Animal Models: Transgenic and Knockout Mice in Cancer Investigations

Educational Sessions (To Be Announced)

Controversy Sessions
Does Regional Chemotherapy Work?
Are Antioxidants Useful in Cancer Prevention?
Do Preclinical Models Have Any Predictive Value? (Bruce A. Chabner)
Is p53/Rb Important for Therapeutic Outcome? (William F. Benedict)
Should Genetic Testing Be Done on Patients to Assess Cancer Risk?

Meet-The-Expert Sunrise Sessions
Quantitative PCR As a Tool to Detect Minimal Residual Disease in Lymphoma and Leukemia
Inhibition of Tobacco-induced Carcinogenesis (Stephen S. Hecht)
Cell Cycle (Peggy J. Farnham)
Drugs Which Interact with Microtubules: An Update (Eric K. Rowinsky)
Culturing Human Cells (Martha R. Stamper)
Mammary Carcinogenesis (Daniel median)
Radiation Sensitization (Theodore S. Lawrence)
NMR As a Prognosticator (Jerry D. Glickson)
Antiestrogens (V. Craig Jordan)
DNA Topoisomerases and Their Inhibitors (Yves G. Olopade)
Estrogens and Breast Cancer (Lovell A. Jones)
Tumor Physiology (Rakesh K. Jain)
Protein Kinase C in Cell Transformation (Susan Jaken)
Environmental Carcinogens: Their Impact in Cancer (John A. McLachlan)
Lung Cancer: A Primer
Chromosomal Deletions and Cancer: Recent Advances in Mapping Techniques (Funmi Olopade)
Tumor Vaccines (Jeffrey Schiom)
Challenges in Bone Marrow Transplantation (William S. Dalton)
Immunologic Features of AIDS Pathogenesis (Jay A. Levy)
Natural Killer Cells (Ronald B. Herberman)
Interferons and Cancer (Ernest C. Borden)
Transcription Factors As Therapeutic Targets (Richard A. Heyman)
Chemokines and Leukocyte-specific Chemotactic and Activating Factors (Barrett J. Rollins)
Bel and Cell Death (Stanley J. Korsmeyer)
Prodrugs (Peter D. Senter)
Reconstruction of Complex Tissues in Culture Diet and Tumorigenesis (Diane F. Birt)

April 20-24, 1996
Washington, D.C.
Convention Center

The Latest Developments in All Areas of Cancer Research
Program Chairperson: Lorraine J. Gudas

Major Presentations by the Foremost Scientists in the Field

Minisymposia, Poster Discussion Sessions, and Poster Sessions of Proffered Papers

Abstract Deadline: December 1, 1995
