1998 Laureates Honorary Papers

Introduction of H. Rodney Withers

Lorraine J. Gudas

Radiation Biology and Treatment Options in Radiation Oncology

H. Rodney Withers

Introduction of Suzanne Cory

Nicholas D. Hastie

Insights from Bcl-2 and Myc: Malignancy Involves Abrogation of Apoptosis as well as Sustained Proliferation

Suzanne Cory, David L. Vaux, Andreas Strasser, Alan W. Harris, and Jerry M. Adams

Introduction of Stanley J. Korsmeyer

Nicholas D. Hastie

BCL-2 Gene Family and the Regulation of Programmed Cell Death

Stanley J. Korsmeyer

Introduction of H. Robert Horvitz

Stephen P. Goff

Genetic Control of Programmed Cell Death in the Nematode Caenorhabditis elegans

H. Robert Horvitz

DEVELOPMENTAL BIOLOGY AND CANCER

PAX Genes

Pax Genes and Their Role in Organogenesis

Ahmed Mansouri, Guy Goudreau, and Peter Gruss

The Role of Chimeric Paired Box Transcription Factors in the Pathogenesis of Pediatric Rhabdomyosarcoma

Frederic G. Barr

The Partial Homeodomain of the Transcription Factor Pax-5 (BSAP) Is an Interaction Motif for the Retinoblastoma and TATA-binding Proteins

Dirk Eberhard and Meinrad Busslinger

Embryonal Tumors

Id Gene Expression as a Key Mediator of Tumor Cell Biology

Mark A. Israel, Maria-Clemencia Hernandez, Monica Florio, Pedro J. Andres-Barquín, Akio Mantani, John H. Carter, and Carol M. Julin

Developmental Basis of Retinal-specific Induction of Cancer by RB Mutation

Brenda L. Gallie, Christine Campbell, Hollie Devlin, Allison Duckett, and Jeremy A. Squire

The Phenotypes Associated with ret Mutations in the Multiple Endocrine Neoplasia Type 2 Syndrome

Bruce A. J. Ponder

Embryonal Tumors and Breast Cancer

Imprinting of a Genomic Domain of 11p15 and Loss of Imprinting in Cancer: An Introduction

Andrew P. Feinberg

Multiple Roles for the Wilms’ Tumor Suppressor, WT1

Rachel Davies, Adrian Moore, Andreas Schell, Eva Bratt, Kiyoshi Miyahawa, Michael Ladomery, Colin Miles, Aswin Menke, Veronica van Heyningen, and Nicholas Hastie

BRCA1, BRCA2, and Rad51 Operate in a Common DNA Damage Response Pathway

Jun-Jie Chen, Daniel Silver, Sharon Cantor, David M. Livingston, and Ralph Scully

Tissue Structure, Nuclear Organization, and Gene Expression in Normal and Malignant Breast

Mina J. Bissell, Valerie M. Weaver, Sophie A. Lelièvre, Fei Wang, Ole W. Petersen, and Karen L. Schmeichel

Mammary Gland Development, Reproductive History, and Breast Cancer Risk

Lewis A. Chodosh, Celina M. D’Cruz, Heather Perry Gardner, Seung I. Ha, Sandra T. Marquis, Jayvant V. Rajan, Douglas B. Stairs, James Y. Wang, and Man Wang

Leukemia and Developmental Genes

Identification and Characterization of Collaborating Oncogenes in Compound Mutant Mice

Anton Berns, Harald Mikkers, Paul Krimpenfort, John Allen, Blanca Scheijen, and Jos Jonkers
Role of TCL1 and ALL1 in Human Leukemias and Development
Carlo M. Croce ................................................................. 1778s

Intersections between Blood Cell Development and Leukemia Genes
Stuart H. Orkin, Catherine Porcher, Yuko Fujiwara, Jane Visvader, and Li-Chun Wang .................................................. 1784s

Leukemia and Developmental Genes: Functional Genes

Core-Binding Factor: A Central Player in Hematopoiesis and Leukemia
Nancy A Speck, Terry Stacy, Qing Wang, Trista North, Ting-Lei Gu, Janelle Miller, Michael Binder, and Miguel Marín-Padilla ................................................................. 1789s

The Effect of Chromosomal Translocations in Acute Leukemias: The LMO2 Paradigm in Transcription and Development
Terence H. Rabbitts, Katharina Bucher, Grace Chung, Gerald Grutz, Alan Warren, and Yoshi Yamada .............................................. 1794s

Conference Participants ................................................................................................................................. 1799s
Organizational Structure: General Motors Cancer Research Foundation ............................................................. 1800s
Membership of the Awards Assembly .................................................................................................................. 1801s
Membership of the Selection Committees ......................................................................................................... 1803s
Membership of the Advisory Council .................................................................................................................. 1804s
Author Index ...................................................................................................................................................... 1809s

On the Cover

H. Robert Horvitz, Ph.D. (top), winner of the Alfred P. Sloan, Jr. Prize, was cited for his outstanding research contributions leading to the initial understanding of the programmed cell death pathway in cellular biology.

H. Rodney Withers, M.D., D.Sc. (bottom left), recipient of the Charles F. Kettering Prize, is Professor and Chair, Department of Radiation Oncology, University of California, Los Angeles. Dr. Withers was recognized for developing the concept and practice of the "hyperfractionation" technique of radiation therapy.

Suzanne Cory, Ph.D. (bottom center) and Stanley J. Korsmeyer, M.D. (bottom right), co-recipients of the Charles S. Mott Prize, were cited for their discovery that the Bcl-2 oncogene exerts its oncogenic effects through suppression of programmed cell death, or apoptosis, rather than increased cell division. This represents a fundamentally different view of malignant transformation which has had tremendous conceptual and practical implications on cancer biology and therapy.
