Contents to Volume 6

JUNE, 1946. NUMBER 6

E. C. Miller, and C. A. Baumann. The Carcinogenicity of p-Monomethylaminoazobenzene in Various Diets and the Activity of this Dye Relative to p-Dimethylaminoazobenzene

C. Carruthers, and V. Santzef. Calcium, Copper, and Zinc in the Epidermal Carcinogenesis of Mouse and Man

Edward L. Howes. Carcinogens and the Regulation Patterns After Injury

P. R. Peacock. The Etiology of Fowl Tumors

Abstracts:

Reports of Research ........................................... 329-336
Clinical and Pathological Reports .................................. 332-336

JULY, 1946. NUMBER 7

John J. Bittner, and Cecil James Watson. The Possible Association Between Porphyrins and Cancer in Mice

W. Lane Williams. The Effects of Suramin (Germanium), Azo Dyes, and Vasodilators on Mice with Transplanted Lymphomas

Arthur Kirschbaum, W. Lane Williams, and John J. Bittner. Induction of Mammary Cancer with Methylcholanthrene. I. Histogenesis of the Induced Neoplasm

Committee on Growth. Availability of Grants and Fellowships in Cancer Research

G. Roskin. Toxin Therapy of Experimental Cancer. The Influence of Protozoan Infections upon Transplanted Cancer

Edith Sulman, and Felix Sulman. The Carcinogenicity of Wood Soot from the Chimney of a Smoked Sausage Factory

Abstracts ........................................................................ 378-384
Reports of Research ................................................... 378-382
Clinical and Pathological Reports ....................................... 383-384

AUGUST, 1946. NUMBER 8

Rembert Korteweg, and Frederic Thomas. Hypophysectomy in Mice with Special Reference to Mammary Cancer

Harry S. N. Greene. The Heterologous Transplantation of Mouse Tumors Induced in Vitro

Radio Isotopes from the Manhattan Project

Fritz Bischoff, and J. Jerome Rupp. The Production of a Carcinogenic Agent in the Degradation of Cholesterol to Progesterone

Lyde Vibert Beck, and Mary Fisher. Physiological Studies on Tumor Inhibiting Agents

II. Effect on Rectal Temperatures in Normal Rabbits of the Serratia marcescens Tumor Necrotizing Polysaccharide of Shear

Milton J. Eisen. Induction of Sarcoma of the Liver in the Rat with Methylcholanthrene and Benzyrene

Robert E. Stowell. Nucleic Acids in Human Tumors

Herbert L. Lombard, Morton L. Levin, and Shields Warren. Multiple Malignant Growths

Abstracts ........................................................................ 441-447
Reports of Research ................................................... 441-444
Clinical and Pathological Reports ....................................... 444-447
Book Reviews .................................................................... 448

SEPTEMBER, 1946. NUMBER 9

Shields Warren. The Pathologic Effects of an Instantaneous Dose of Radiation

Charles E. Dunlap and Shields Warren. The Carcinogenic Activity of Some New Derivatives of Aromatic Hydrocarbons. II. Compounds Related to 1,2-Benzanthracene

L. C. Strong and Frank H. J. Fire. The Effect of Diets Containing an Abundance of Milk, Liver, Riboflavin, and Xanthine on Methylcholanthrene Carcinogenesis
Contents to Volume 6

P. A. Gorer. The Pathology of Malignant Histiocytoma (Reticuloendothelioma) of the Liver in Mice .......................................................... 470

Proceedings of the American Association for Cancer Research, Inc.
37th Annual Meeting, Atlantic City, N. J., March 11 and 12, 1946 ............ 483-519
Proceedings of Scientific Sessions ............................................................. 483-504
Proceedings of Business Sessions ............................................................ 505-508
By-Laws of the Association ................................................................ 509-511
List of Members of the Association ...................................................... 512-519

Abstracts .............................................................................................. 520-528
Reports of Research ............................................................................... 520-522
Clinical and Pathological Reports ....................................................... 522-528

OCTOBER, 1946. NUMBER 10

F. Duran-Reynals. Transplantability and Presence of Virus in Spontaneous Sarcomas and Fibromas of Chickens in Relation to the Age of the Tumor-Bearing Animal ....................... 529
F. Duran-Reynals, and Edward W. Shrigley. A Study of Five Transplantable Chicken Sarcomas Induced by Viruses .............................................. 535
F. Duran-Reynals. On the Transplantability of Lymphoid Tumors, Embryonal Nephromas and Carcinomas of Chickens ........................................ 545
H. G. Crabtree. Some Effects of Aromatic Hydrocarbons on Sulfur Metabolism and Tumor Induction in Mice ........................................... 553
Alexander Brunschwig, John Arnold, and John Edgcomb. Stimulation and Retardation of Neoplastic Growth by Sulfhydryl Compounds ..................... 560
Cornelia Hoch-Ligeti. Effect of Fresh Milk on the Production of Hepatic Tumors in Rats by Dimethylaminoazobenzene ............................... 563
V. Suntzeff, and Christopher Carruthers. The Water Content in the Epidermis of Mice Undergoing Carcinogenesis by Methylcholanthrene ............. 574
Earl T. Engle. Tubular Adenomas and Testis-Like Tubules of the Ovaries of Aged Rats ...... 578

Abstracts .............................................................................................. 583-592
Reports of Research ............................................................................... 583-588
Clinical and Pathological Reports ....................................................... 588-592

NOVEMBER, 1946. NUMBER 11

Erland C. Gjessing, and Alfred Chanutin. The Effect of Nitrogen Mustards on the Viscosity of Thymonucleate .............................................. 593
Alfred Chanutin, and Erland C. Gjessing. The Effect of Nitrogen Mustards upon the Ultraviolet Absorption Spectrum of Thymonucleate, Uracil and Purines ................................................................. 599
Dale Rex Coman. Induction of Neoplasia in Vitro with a Virus. Experiments with Rabbit Skin Grown in Tissue Culture and Treated with Shope Papilloma Virus .................. 602
Harold Burrows, and Cornelia Hoch-Ligeti. Effect of Progesterone on the Development of Mammary Cancer in C3H Mice ....................................... 608
A. Cantarow, K. E. Paschkis, J. Stasney, and M. S. Rothenberg. The Influence of Sex Hormones upon the Hepatic Lesions Produced by 2-Acetaminofluorene ........... 610
Jacob Heiman, and Doris Meisel. Tumors of the Salivary and Parathyroid Glands in Rats Fed with 2-Acetaminofluorene ........................................ 617
E. V. Cowdry, J. H. Van Dyke, and B. B. Geren. Localization of Stratum of Maximum Mitotic Frequency in Epidermal Methylcholanthrene Carcinogenesis in Mice .......... 620
Lawrence S. Mann, and William Welker. Further Studies of Specific Precipitin Antiseraums for the Protein of Cancer Tissue. III. Relation of the Proteins of Different Malignant Tissues to Each Other ........................................ 625
Edward D. Crabb. A Transplantable 9,10-Dimethyl-1,2-Benzanthracene Sarcoma in the Syrian Hamster ....................................................... 627

Abstracts .............................................................................................. 637-654
Reports of Research ............................................................................... 637-642
Clinical and Pathological Reports ....................................................... 642-654
Book Reviews ....................................................................................... 655-656
