BREAKING ADVANCES

1623 Highlights from Recent Cancer Literature

REVIEWS

1625 Contributions of the Host Microenvironment to Cancer-Induced Bone Disease
Sam W.Z. Olechnowicz and Claire M. Edwards

1632 Optimization of Natural Killer T Cell–Mediated Immunotherapy in Cancer Using Cell-Based and Nanovector Vaccines
C. Faveeuw and F. Trottein

1639 Noncanonical Functions of Telomerase: Implications in Telomerase-Targeted Cancer Therapies
Yinghui Li and Vinay Tergaonkar

PRIORITY REPORTS

1645 Universal Marker and Detection Tool for Human Sarcoma Circulating Tumor Cells
Précis: This study describes the first universal and specific marker to detect circulating sarcoma cells in the blood, with the capability to detect any type of sarcoma, offering a key prognostic tool to monitor cancer metastasis and relapse in sarcoma patients.

1651 PCAT-1, a Long Noncoding RNA, Regulates BRCA2 and Controls Homologous Recombination in Cancer
John R. Prensner, Wei Chen, Matthew K. Iyer, Qi Cao, Teng Ma, Sumin Han, Anirban Sahu, Rohit Malik, Kari Wilder-Romans, Nora Navone, Christopher J. Logothetis, John C. Araujo, Louis L. Pisters, Ashutosh K. Tewari, Karen E. Knudsen, Naoki Kitabayashi, Manoj A. Jhawar, and Boyi Gan
Précis: This study identifies a long noncoding RNA known to be oncogenic and involved in the homologous recombination repair pathway, suggesting a novel clinical correlation between this little-understood class of RNAs and genotoxic cancer therapies.

INTEGRATED SYSTEMS AND TECHNOLOGIES

1661 Cancer-Associated Mutations in Healthy Individuals: Assessing the Risk of Carcinogenesis
Ignacio A. Rodriguez-Brenes, Natalia L. Komarova, and Dominik Wodarz
Précis: Understanding how limits on cellular replication influence the fate of altered but nonneoplastic cells in healthy tissue may make it possible to estimate the risk posed by cancer-associated mutations found in healthy individuals.

MICROENVIRONMENT AND IMMUNOLOGY

1670 Identification of Immune Factors Regulating Antitumor Immunity Using Polymeric Vaccines with Multiple Adjuvants
Omar A. Ali, Catia Verbeke, Chris Johnson, R. Warren Sands, Sarah A. Lewin, Des White, Edward Doherty, Glenn Dranoff, and David J. Mooney
Précis: This paper utilizes a new method to identify immune components critical to the efficacy of antitumor immune responses to tumors.

MOLECULAR AND CELLULAR PATHOBIOLOGY

1682 FoxO Transcription Factors Promote AKT Ser473 Phosphorylation and Renal Tumor Growth in Response to Pharmacologic Inhibition of the PI3K–AKT Pathway
Aifu Lin, Hai-long Piao, Li Zhuang, Li Ma, and Boyi Gan
Précis: A transcription factor that functions in tumor suppression was unexpectedly found to instead promote renal tumor growth under conditions of PI3K–AKT inhibition, with implications on how to improve antitumor responses.

1694 Immune Escape and Survival Mechanisms in Circulating Tumor Cells of Colorectal Cancer
Gunnar Steinert, Sebastian Scholch, Thomas Niemietz, Naoki Iwata, Sebastian A. García, Blanca Behrens, Anita Voigt, Matthias Kloor, Axel Benner, Ulrich Bork, Nuh N. Rahbari, Markus W. Buchler, Nikolas H. Stoecklein, Jürgen Weitz, and Moritz Koch
Précis: These results show that circulating colon tumor cells exhibit an immuno-suppressive phenotype that enables them to evade immune eradication.
Table of Contents

1705 UTX and MLL4 Coordinately Regulate Transcriptional Programs for Cell Proliferation and Invasiveness in Breast Cancer Cells
Jae-Hwan Kim, Amrish Sharma, Shilpa S. Dhar, Sung-Hun Lee, Bingnan Gu, Chia-Hsin Chan, Hui-Kuan Lin, and Min Gyu Lee

Précis: These findings show how coordinated regulation of gene expression programs by two distinct epigenetic modifiers drives malignant properties in breast cancer cells.

1718 Neuroplastic Changes Occur Early in the Development of Pancreatic Ductal Adenocarcinoma
Rachelle E. Stopczynski, Daniel P. Normolle, Douglas J. Hartman, Haoqiang Ying, Jennifer J. DeBerry, Klaus Bielefeldt, Andrew D. Rhim, Ronald A. DePinho, Kathryn M. Albers, and Brian M. Davis

Précis: These studies show that changes in the peripheral nervous system occur early during tumor development and may play an important role in disease progression.

1728 HDAC2 Provides a Critical Support to Malignant Progression of Hepatocellular Carcinoma through Feedback Control of mTORC1 and AKT
Ji Heon Noh, Hyun Jin Bae, Jung Woo Eun, Qingyu Shen, Se Jin Park, Hyung Seok Kim, Boas Nam, Woo Chan Shin, Eun Kyung Lee, Kyungbun Lee, Ja-Jun Jang, Won Sang Park, Jung Young Lee, and Suk Woo Nam

Précis: This study of a histone deacetylase that is essential for mitogenic signaling in liver cancers may offer a new interventional target for more effective therapy.

1739 p16INK4A Impairs Homologous Recombination–Mediated DNA Repair in Human Papillomavirus–Positive Head and Neck Tumors
Rüveyda Dok, Peter Kalev, Evert Jan Van Limbergen, Layka Abbasi Ashaghi, Iria Vázquez, Esther Hauben, Anna Sabina, and Sandra Nuyts

Précis: These findings reveal an unexpected function of the tumor suppressor p16INK4A in promoting the homologous recombination pathway of DNA repair, suggesting that p16INK4A status in head and neck cancer patients may offer an independent marker to predict their response to radiotherapy.

1752 Genetic Validation of the Protein Arginine Methyltransferase PRMT5 as a Candidate Therapeutic Target in Glioblastoma

Précis: This study presents a novel candidate prognostic and therapeutic target in aggressive brain cancers, with implications for understanding the basis for poor patient survival.

1766 Activated ERBB2/HER2 Licenses Sensitivity to Apoptosis upon Endoplasmic Reticulum Stress through a PERK-Dependent Pathway
Rosa Martín-Pérez, Carmen Palacios, Rosario Yerbes, Ana Cano-González, Daniel Iglesias-Serret, Joan Gil, Mauricio J. Reginato, and Abelardo López-Rivas

Précis: These findings offer a rationale for the therapeutic exploration of treatments inducing ER stress against mutant ERBB2-expressing breast tumor cells.

1778 ATDC/TRIM29 Phosphorylation by ATM/MAPKAP Kinase 2 Mediates Radioresistance in Pancreatic Cancer Cells
Lidong Wang, Huibin Yang, Phillip L. Palmbos, Gina Nye, Taylor Ann Deitzler, Dawn Coleman, Jacob Leflein, Mary Davis, Min Zhang, Wenhua Tang, J. Kevin Hicks, Corey M. Helchowski, Jayendra Prasad, Theodore S. Lawrence, Liang Xu, Xiaomiun Yu, Christine E. Canman, Mats Ljungman, and Diane M. Simeone

Précis: These findings link a TRIM family protein that binds DNA and p53 to radioresistance in pancreatic cancer, suggesting its candidacy as a therapeutic target to improve the efficacy of DNA-damaging treatments used to treat this disease.
Alarmin IL-33 Acts as an Immunoadjuvant to Enhance Antigen-Specific Tumor Immunity
Daniel O. Villarreal, Megan C. Wise, Jewell N. Walters, Emma L. Reuschel, Min Joung Choi, Nyamekye Obeng-Adjei, Jian Yan, Matthew P. Morrow, and David B. Weiner

miR-30-5p Functions as a Tumor Suppressor and Novel Therapeutic Tool by Targeting the Oncogenic Wnt/β-Catenin/BCL9 Pathway
Jian-Jun Zhao, Jianhong Lin, Di Zhu, Xujun Wang, Daniel Brooks, Ming Chen, Zhang-Bo Chu, Kohichi Takada, Bryan Ciccarelli, Samir Admin, Jianguo Tao, Yu-Tzu Tai, Steven Teoon, Geraldine Pinkus, Winston Patrick Kuo, Teru Hideshima, Mary Bouxsein, Nikhil Munshi, Kenneth Anderson, and Ruben Carrasco

Chromosome 10, Frequently Lost in Human Melanoma, Encodes Multiple Tumor-Suppressive Functions
Lawrence N. Kwong and Lynda Chin

Id2 Mediates Oligodendrocyte Precursor Cell Maturation Arrest and Is Tumorigenic in a PDGF-Rich Microenvironment
Matthew C. Havrda, Brenton R. Paolella, Cong Ran, Karola S. Jering, Christina M. Wray, Jaclyn M. Sullivan, Audrey Nailor, Yasuyuki Hitoshi, and Mark A. Israel

Sox2 Is Required to Maintain Cancer Stem Cells in a Mouse Model of High-Grade Oligodendroglioma
Rebecca Favaro, Irene Appolloni, Serena Pellegratta, Alexandra Badiola Sangà, Pierfrancesco Pagella, Eleonora Gambini, Federica Pisati, Sergio Ottolenghi, Maria Forti, Gaetano Finocchiaro, Paolo Malatesta, and Silvia K. Nicolì

Expression of Variant Isoforms of the Tyrosine Kinase SYK Determines the Prognosis of Hepatocellular Carcinoma
Jian Hong, Yunfei Yuan, Jianping Wang, Yadi Liao, Ruhai Zou, Chuanlong Zhu, Binkui Li, Yi Liang, Pinzhu Huang, Zongwei Wang, Wenyu Lin, Yixin Zeng, Jia Le Dai, and Raymond T. Chung

MET Signaling in Colon Cancer Stem-like Cells Blunts the Therapeutic Response to EGFR Inhibitors
Paolo Luraghi, Gigliola Reato, Elia Cipriano, Francesco Sassi, Francesca Orzan, Viola Bigatto, Francesca De Bacco, Elena Menietti, May Han, William M. Rideout III, Timothy Perera, Andrea Bertotti, Livio Trusolino, Paolo M. Comoglio, and Carla Boccaccio

p300 Acetyltransferase Regulates Androgen Receptor Degradation and PTEN-Deficient Prostate Tumorigenesis
Jian Zhong, Liya Ding, Laura R. Bohrer, Yunqian Pan, Ping Liu, Jun Zhang, Thomas J. Sebo, R. Jeffrey Karnes, Donald J. Tindall, Jan van Deursen, and Haojie Huang
CORRECTION

1881 Correction: EPR Oxygen Images Predict Tumor Control by a 50% Tumor Control Radiation Dose

ABOUT THE COVER

Pancreas from a 12-week-old KPCT (p48-Cre; LSL-KrasG12D; p53<sup>129C7</sup>−/−, Rosa26-LSL-tdTOMATO) mouse with precancerous PanIN lesions but no tumor. dTomato-label (red) marks pancreas epithelial-derived cells, in this case normal-appearing acinar cells. PGP 9.5 antibody (green) was used to stain nerve fibers that exhibit hypertrophy and sprouting within pancreatic tissue, beginning at histologic precancer stages and increasing as the disease progresses. For details, see article by Stopczynski and colleagues on page 1718.
