Suppl. Fig. 1. ARN-509 equilibrium binding to AR in a MDA-MB-459 cell extract.
Representative competition binding curve showing inhibition of 3H-R1881 equilibrium
binding to AR by R1881, bicalutamide, MDV3100 and ARN-509 in an MDA-MB-453 cell
extract after overnight incubation. The inset shows the median inhibitory concentration
(IC50) values from this experiment (error bars represent the SEM of duplicate
measurements).
