Supplemental Figure 6

Bar graph showing the relative mRNA expression of PSA and TMPRSS2 with different treatments.

- **PSA**:
  - Spironolactone alone: High expression.
  - + 5µM abiraterone: Moderately reduced expression.
  - + 10µM bicalutamide: Further reduced expression.
  - + 10µM MDV3100: Even lower expression.

- **TMPRSS2**:
  - Spironolactone alone: High expression.
  - + 5µM abiraterone: Moderate reduction.
  - + 10µM bicalutamide: Further reduction.
  - + 10µM MDV3100: Lowest expression.
