Supplementary Figures:

S1. Expression of IL-20R1, IL-20R2 and IL-22R receptors in A549, DU-145 and HO-1 cells. Lysates were collected from the indicated cell lines and Western blotting was performed as described in Fig. 3B. Lysates were probed with antibodies specific for the indicated receptor and Actin was used as a loading control.

S2. siRNA-mediated silencing of IL-20R2 or IL-22R receptor pairs in DU-145 and HO-1 cells. IL-20R2 and IL-22R expression after transfection with 3 different siRNAs targeting these receptor mRNAs in DU-145 and HO-1 cells, respectively. Actin was used as a loading control. NT siRNA represents an siRNA that does not target the receptor, i.e., non-targeting.
