Supplementary figures

Fig. S1
A) 

B) 

Legend
1. Ovarian Surface Epithelium (5)
2. Ovarian Clear Cell Adenocarcinoma (7)
3. Ovarian Endometrioid Adenocarcinoma (9)
4. Ovarian Mucinous Adenocarcinoma (9)
5. Ovarian Serous Adenocarcinoma (20)
Fig. S3

![Graph showing the effect of L-arginase (U/mL) on arginine (µmol/mL).]
Fig. S4

A) HEC-1-A in the absence of arginine

B) Glucose uptake (umol/million cells)

C) Pyruvate consumption (umol/million cells)

Day -1 Day 0 Day 3 Day 4
Indirect coculture
Collecting coculture medium and diluting with fresh medium
(1:3) and initiate experiment for metabolite analysis
Collecting supernatant for extracellular metabolites
analysis and cell counts for normalization
