Contents of Volume 1

JANUARY, 1941. NUMBER 1

KANEMATSU SUGIURA and C. P. ROODS. Experimental Liver Cancer in Rats and Its Inhibition by Rice-Bran Extract, Yeast, and Yeast Extract .................................................. 3

J. FURTH and W. A. BARNES. Differences between Malignant Blood Cells from Induced and Spontaneous Leukemias of Mice .......................................................................... 17

F. S. CHEEVER and C. A. JANEWAY. Immunity Induced Against the Brown-Pearce Carcinoma ............................................................................................... 23

CORNELIA HOCH-LIGETI. The Effect of Prolonged X-Radiation on the Congo Red Index of Rabbits .............................................................................................................. 28

HERBERT G. CRABTREE. Retardation of the Rate of Tumor Induction by an Inhibitor of Cell Glycolysis .............................................................. 34

HERBERT G. CRABTREE. Stimulation of Tumor Induction by an Inhibitor of Cell Glycolysis .............................................................. 39

I. BERENBLUM. The Cocarcinogenic Action of Croton Resin ............................................................................................... 44

F. E. MOHS and M. F. GUYER. Pre-excisional Fixation of Tissues in the Treatment of Cancer in Rats ............................................................................... 49

MAURICE ROSS and RALPH I. DORFMAN. The Urinary Excretion of Estrogens and Androgens by Women with Carcinoma of the Breast .............................. 52

A. A. LEWIS and C. W. TURNER. The Effect of Estrogens and a Carcinogenic Chemical in Stimulating the Secretion of the Mammogenic Duct Growth Factor of the Anterior Pituitary ................................. 55

WILLIAM T. SALTER, IRA T. NATHANSON, and HILDEGARDE WILSON. Experimentally Induced Benignancy of Neoplasm. V. The Influence of Hormones on the Host's Resistance to Implanted Neoplasms ....................... 60

SHIELDS WARREN and OLIVE GATES. Spontaneous and Induced Tumors of the Guinea Pig ......................................................................................................................... 65

R. U. FULLER, EDNA BROWN, and C. A. MILLS. Environmental Temperatures and Spontaneous Tumors in Mice ............................................................... 71

PROCEEDINGS OF THE AMERICAN ASSOCIATION FOR CANCER RESEARCH. Thirty-Third Annual Meeting. Pittsburgh, Pa., March 19 and 20, 1940 ................................. 75-94

REPORTS OF EXPERIMENTAL RESEARCH ........................................................................ 75-85

ABSTRACTS ........................................................................ 85-94

CLINICAL AND PATHOLOGICAL REPORTS ........................................................................ 85-94

FEBRUARY, 1941. NUMBER 2

JOHN J. MORTON and G. BURROUGHS MIDER. Some Effects of Carcinogenic Agents on Mice Subject to Spontaneous Leukoses ............................................................................................... 95

W. A. BARNES and R. K. COLK. The Effect of Nursing on the Incidence of Spontaneous Leukemia and Tumors in Mice ............................................................................... 99

J. ENGELBRETH-HOLM and H. LEFFER. Acceleration of the Development of Leukemias and Mammary Carcinomas in Mice by 9,10-Dimethyl-1,2-Benzanthracene ......................................................................................................................... 109

J. ENGELBRETH-HOLM. Acceleration of the Development of Mammary Carcinomas in Mice by Methylcholanthrene ......................................................................................................................... 113

JOHN J. BITTNER. Changes in the Incidence of Mammary Carcinoma in Mice of the A Stock ................................................................................................. 115

JOHN J. BITTNER. The Variability of Incidence of Mammary Cancer in Mice of an Inbred Strain ................................................................................................. 123

HAROLD BURROWS. Decline in the Incidence of Mammary Cancer in Mice of an Inbred Strain ................................................................................................. 125

R. H. FULLER, EDNA BROWN, and C. A. MILLS. Environmental Temperatures and Spontaneous Tumors in Mice ................................................................................................. 136

ALBERT E. CASEY. Experiments with a Material from the Brown-Pearce Tumor ................................................................................................. 138

G. O. FAVORITE and F. S. CHEEVER. Observations on the Brown-Pearce Carcinoma in Roller Tube Tissue Cultures ................................................................................................. 144

FRANK GARAI. Heptyl Aldehyde-Sodium Bisulfite: Toxicity and Effect on Spontaneous Mammary Carcinoma in Mice ................................................................................................. 146

R. G. MATTHEWS. Glutamic Acid in Tumor Hydrolyzates ......................................................................................................................... 148
Contents of Volume I

H. DOUGLAS McEWEN and FRANCES L. HAVEN. The Effect of Carcinosarcoma 256 on the Water Content of the Liver ........................................................ 148

FREDERIC E. MOLS. The Transformation of Rat Mammary Adenofibroma to Fibroma by Androgens ............................................................... 151

NATHANIEL BERCOVITZ. Cancer in Hainan, China. A Supplementary Statistical Study of 451 Cases with Special Reference to Age, Anatomical Distribution, and Etiology .......................... 154

MAURICE ROSS and RALPH I. DORFMAN. An Abortifacient Substance in Human Urines .................. 158

E. L. KENNAWAY. Notes on the Current Literature of Cancer Research ........................................ 164

ABSTRACTS .................................................................... 166-179

REPORTS OF EXPERIMENTAL RESEARCH ............................... 175-179

MARCH, 1941. NUMBER 3

P. S. LAVIK and C. A. BAUMANN. Dietary Fat and Tumor Formation ............................................ 181

FRANCES F. BECK and JOHN C. KRANTZ, JR. Tumor Glycolysis. IV. The Effect of Feeding Thyroid Supplemented by Thiamin Chloride on the Growth and Glycolysis of Walker Sarcoma 315 in Rats ................................................. 188

FRANK L. APPERLY. The Relation of Solar Radiation to Cancer Mortality in North America ... 191

HERMAN T. BLUMENTHAL. The Effects of Spontaneous and Transplanted Rat and Mouse Tumors on the Red and White Cells in Circulating Blood and Bone Marrow .... 196

L. DOLJANSKI and M. PIKOVSKI. Cultures in Vitro of Blood Cells, Bone Marrow, and Myocardium from Leukotic Fowls ........................................ 205

FRITZ BISCHOFF and M. LOUBA LONG. The Influence of Terminal B Avitaminosis with Attending Low Body Temperature Upon the Growth Characteristics of Sarcoma 180 .... 217

ANNA GOLDFEDER. The Effects of Reduced Temperatures Upon Growth and Metabolic Changes of Sarcoma 180 Grown in Vivo .................. 220

ETHEL BURACK, J. M. WOLFE, WINSFRED LANSING, and A. W. WRIGHT. The Effect of Age Upon the Connective Tissue of the Uterus, Cervix, and Vagina of the Rat ...................... 227

ALEXANDER LIPSCHUTZ and LOUIS VARGAS, JR. Structure and Origin of Uterine and Extra-genital Fibroids Induced Experimentally in the Guinea Pig by Prolonged Administration of Estrogens ..................................................................... 236

ABSTRACTS ....................................................................... 250-258

REPORTS OF EXPERIMENTAL RESEARCH ............................... 250-256

CLINICAL AND PATHOLOGICAL REPORTS ................................. 256-258

APRIL, 1941. NUMBER 4

H. GIDEON WELLS, MAUD SYE, and HARRIET F. HOLMES. The Occurrence and Pathology of Spontaneous Carcinoma of the Lung in Mice ................................................. 259

CURTIS M. FLOYD. The Production of Tumors by Tobacco Tars .................................................... 262

JOHN A. SAXTON, JR. The Relation of Age to the Occurrence of Adenoma-Like Lesions in the Rat Hypophysis and to Their Growth After Transplantation ........................................................................ 277

J. S. BLAISDELL, W. U. GARDNER, and L. C. STRONG. Adrenal Glands of Mice from Strains with Different Susceptibilities to Mammary Carcinoma .............................................................. 283

JOHN J. BITTNER. The Influence of Estrogens on the Incidence of Tumors in Foster Nursed Mice .............................................................. 290

CHARLES HUDDINGS and CLARENCE V. HODGES. Studies on Prostatic Cancer. I. The Effect of Castration, of Estrogen and of Androgen Injection on Serum Phosphatases in Metastatic Carcinoma of the Prostate ................................................. 293

WILLIAM S. MURRAY and JOSEPH G. HOFFMAN. Physiological Age as a Basis for the Comparison of Strains of Mice Subject to Spontaneous Mammary Carcinoma ........................................... 298

RUSSEL O. BOWMAN and H. R. MOTTSHAW. Failure to Find Carcinogens in Urine from Patients with Cancer .............................................................................. 308

G. L. ROHDENBURG. The Effect of Lowered Atmospheric Pressure on Spontaneous Tumors in Mice .............................................................. 310

G. L. ROHDENBURG. The Glucose Tolerance Test in Its Relation to Cancer ........................................... 311

J. C. MOTTRAM. Abnormal Paramecia Produced by Blastogenic Agents and Their Bearing on the Cancer Problem ......................................................... 313
Contents of Volume 1

R. Lewishohn, C. Leuchtenberger, R. Leuchtenberger, and D. Laszlo. The Fate of Spontaneous Mammary Carcinomas in Mice After Simple Biopsy ........................................ 324

Abstracts ................................................................. 328-344
Reports of Experimental Research ............................. 328-337
Clinical and Pathological Reports ............................... 337-344

MAY, 1941. NUMBER 5

W. U. Gardner. The Effect of Estrogen on the Incidence of Mammary and Pituitary Tumors in Hybrid Mice ................................................................. 345
Edgar Allen and W. U. Gardner. Cancer of the Cervix of the Uterus in Hybrid Mice Following Long-Continued Administration of Estrogen ........................................ 359
Lorand M. Woodruff. Tumors Produced by Estradiol Benzoate in the Guinea Pig 367
Alexander Brunschwig and Richard A. Rasmussen. The Relation of Diet to Benign Neoplasia (Ulcer-Papillomas) of the Rat's Stomach ........................................ 371
James B. Murphy and Ernest Sturm. The Transmission of an Induced Lymphatic Leukemia and Lymphosarcoma in the Rat ................................................ 379
Carl Olson, Jr. A Transmissible Lymphoid Tumor of the Chicken .................................................. 384
Clifford C. Fransen, Joseph C. Aub, and Carol L. Simpson. The Experimental Production of Fibrosarcomas of Bone .................................................... 393
L. W. Law. The Cancer Producing Properties of Azo Compounds in Mice .......................... 397
W. C. Huerpe. Cutaneous Neoplastic Responses Elicited by Ultraviolet Rays in Hairless Rats and in Their Haired Litter Mates ........................................ 402
Earl R. Norris and Elizabeth Troescher. Synthesis of Sterol by Tumor-Bearing Rats ........ 410
Thomas J. Duffield and Marie Di Mario. Cancer Mortality in New York City: 1930 to 1938 ........................................................................ 413
Abstracts ........................................................................ 422-438
Reports of Experimental Research ............................. 422-432
Clinical and Pathological Reports ............................... 432-438

JUNE, 1941. NUMBER 6

Leo Loeb and V. Sunzteff. The Effects of Estrogen on the Mammary Gland of Mice Injected During Pregnancy, Lactation, and Regression .................................. 439
V. Sunzteff, M. Moskop Kirtz, H. T. Blumenthal, and Leo Loeb. The Incidence of Mammary Gland Carcinoma and Cancer Age in Mice Injected with Estrogen and in Noninjected Mice of Different Strains .......................... 446
Milton J. Eisen. Tumor Inhibition Associated with Secretory Changes Produced by Estrogen in a Transplanted Mammary Adenocarcinoma of the Rat ....................... 457
H. P. Risch and B. E. Kline. The Inhibition of Phospholipid Oxidation by Carcinogenic and Related Compounds ............................................................ 495
Leonell C. Strong. The Effect of Heptyl Aldehyde-Sodium Bisulfite on Spontaneous Tumors of the Mammary Gland in Mice ........................................... 473
James B. Murphy and Ernest Sturm. Further Investigation of Induced Tumors in Fowls ........ 477
Cornelia Hoch-Liebelt. Studies on the Changes in the Lymphoid Tissue of Mice Treated with Carcinogenic and Noncarcinogenic Hydrocarbons ......................... 484
Clifford C. Fransen, Joseph C. Aub, and Carol L. Simpson. Experimental Tumors in Lymph Nodes and in Endocrine and Salivary Glands ......................... 489
Elizabeth B. Jackson and Austin M. Bruce. Studies on a Transplantable Embryoma of the Mouse .............................................................. 494
H. Alapy. The Persistence of Growth Inhibition in Young Rats Induced by 1,2,5,6-Dibenzanthracene ........................................................................... 499
Alma Howard. Growth Rates of Nine Inbred Strains of Mice .................................................. 503
Abstracts ................................................................. 505-516
Reports of Experimental Research ............................. 505-510
Clinical and Pathological Reports ............................... 510-516
