Contents of Volume 1

JULY, 1941. NUMBER 7

CARL V. WELLER. The Inheritance of Retinoblastoma and Its Relationship to Practical Eugenics

WM. CARPENTER MACCARTY, Sr. Early Cancer of the Stomach

SIGISMUND PELLER. Malignant Melanoma Cutis

MORRIS K. BARRETT. The Antigenic Nature of Purified Chicken Tumor Agent

OTTO SAPHER, MAX APPEL, and ALFRED A. STRAUSS. Growth of Brown-Pearce Carcinoma in the Anterior Chamber of the Eyes of Tumor-Immune Rabbits

VALY MENKIN. Cellular Injury in Relation to Proliferative and Neoplastic Response

AUSTIN M. BRUES and ELIZABETH B. JACKSON. The Resistance of Tumor Cells in Tissue Culture to the Growth-Inhibiting Action of Amines

L. W. LAW. The Induction of Leukemia in Mice Following Percutaneous Application of 9,10-Dimethyl-1,2-Benzanthracene

LEONELL C. STRONG. A Genetic Analysis of the Induction of Tumors by Methylcholanthrene

ALEXANDER LIPSCHUTZ, LUIS VARGAS, JR., and JORGE PALMA. Sex Difference in the Conjunctive Tumoral Reaction of the Guinea Pig Toward Natural and Artificial Estrogens

ABSTRACTS

REPORTS OF EXPERIMENTAL RESEARCH ............................................. 580-586

CLINICAL AND PATHOLOGICAL REPORTS ............................................. 586-592

BOOK REVIEWS

AUGUST, 1941. NUMBER 8

ROBERT H. WILSON, FLOYD DEEDS, and ALVIN I. COX. The Toxicity and Carcinogenic Activity of 2-Acetaminafuorene

JAMES B. MURPHY and ERNEST STURM. Further Investigation on the Transmission of Induced Tumors in Fowls

ROBERT STEELE, F. C. KOCH, and PAUL E. STEINER. The Extraction of a Carcinogenic Fraction from Human Urine

W. A. SELLE, PAUL BRINDLEY, and JOHN W. SPIES. The Production of Tumors by Transplantation of Normally Appearing Liver Cells from Animals Previously Injected with Methylcholanthrene

PHILIP P. COHEN and G. LEVERNE HEKHUIS. Transamination in Tumors, Fetal Tissues, and Regenerating Liver

ERNEST STURM. Induced Resistance to a Transplantable Lymphatic Leukemia in Rats

MILTON J. EISEN and WILLIAM H. WOGLOM. The Nonspecific Nature of Induced Resistance to Tumors

W. U. GARDNER. Estrogenic Effects of Adrenal Tumors of Ovariectomized Mice

RUTH M. WATTS and FRED L. ADAIR. Occurrence of Estrogenic Hormone in Ovarian Cysts

LLOYD C. FOGG and SHIELDS WARREN. Some Cytologic Effects of Therapeutic Radiation

M. C. REINHARD, S. G. WARNER, and H. L. GOLTZ. Further Studies on the Effect of X-Rays on a Tumor of Known Genetic Constitution

MYRON GORDON. Genetics of Melanomas in Fishes. V. The Reappearance of Ancestral Micro- melanophores in Offspring of Parents Lacking These Cells

C. C. GRAND, MYRON GORDON, and GLADYS CAMERON. Neoplasms Studies VIII. Cell Types in Tissue Culture of Fish Melanotic Tumors Compared with Mammalian Melanomas

E. L. KENNAWAY. A Further Note on the Current Literature of Research

SEPTEMBER, 1941. NUMBER 9

J. T. BRADBURY, W. E. BACHMANN, and M. G. LEWISohn. The Production of Cancer by Some New Chemical Compounds

L. W. LAW and MARJORIE LEWISohn. Comparative Carcinogenicity of Some Cholanthrene Derivatives
Contents of Volume 1

J. A. MILLER, D. L. MINER, H. P. RUSCH, and C. A. BAUMANN. Diet and Hepatic Tumor Formation .......................................................................................................................... 699

Baldwin Lucké, Arthur K. Parpart, and R. A. Ricca. Failure of Choleic Acids of Carcinogenic Hydrocarbons to Alter Permeability of Marine Eggs and of Mammalian Erythrocytes .................................................................................................................. 709

Randall K. Cole. Genetic Resistance to a Transmissible Sarcoma in the Fowl ................................................................................................................................. 714

M. S. Eveleth and Norman G. Wetzel. Rapid Growth of a Bronchiogenic Carcinoma ......................................................................................................................... 721

Caruthers and R. E. Stowell. Influence of Heptylaldehyde on Pregnancy in Rats ......................................................................................................................... 724

Proceedings of the American Association for Cancer Research, Inc.

Thirty-Fourth Annual Meeting. Chicago, Ill., April 14-16, 1941 ................................................................................................................................. 729-765
Proceedings of Scientific Sessions ................................................................................................................................. 729-753
Proceedings of Business Sessions ................................................................................................................................. 754-757
By-Laws of the Association ................................................................................................................................. 757-759
List of Members of the Association ................................................................................................................................. 760-765

Abstracts ........................................................................................................................................................................ 766-770
Reports of Experimental Research ................................................................................................................................. 766-768
Clinical and Pathological Reports ................................................................................................................................. 768-770

OCTOBER, 1941. NUMBER 10

Arthur Lasnitzki and A. Keith Brewer. The Isotopic Constitution of Potassium in Animal Tumors and Muscle from Tumor-Bearing Animals ................................................................................................................................. 776

Arthur Kirschbaum and Leonell C. Strong. Transplantation of Leukemia Arising in Hybrid Mice ................................................................................................................................. 785

E. Elizabeth Jones. The Effect of Testosterone Propionate on Mammary Tumors in Mice of the C3H Strain ................................................................................................................................. 787

William S. Murray. Studies on the Effect of Foster Nursing and Its Relation to the Development of Mammary Carcinoma in the Mouse ................................................................................................................................. 790

John J. Bittner. Foster Nursing and Genetic Susceptibility for Tumors of the Breast in Mice ................................................................................................................................. 793

M. V. Danzi, Ethel Burack, and A. W. Wright. Abnormalities of Breeding Behavior in Rats of the Albany (A-S) Strain .................................................................................................................................................. 795

R. Lewisohn, C. Leuchtenberger, R. Leuchtenberger, D. Laslo, and K. Bloch. Action of Yeast Extract on Transplanted and Spontaneous Malignant Tumors in Mice ................................................................................................................................. 799

I. Berenblum. The Mechanism of Carcinogenesis. A Study of the Significance of Cocarcinogenic Action and Related Phenomena ................................................................................................................................. 807

Austin M. Brues, Breula B. Marble, and Byron Riegel. Failure to Induce Sarcoma in Rats with Wheat Germ Oil Preparations ................................................................................................................................. 815

H. F. Deutsch, D. L. Miner, and H. P. Rusch. The Effect of Carcinogenic Hydrocarbons and Related Compounds on the Autoxidation of Oils ................................................................................................................................. 818

H. A. Davenport, John L. Savage, Morris J. Distine, and F. B. Queen. Induction of Tumors in Rats by Carcinogens in Various Lipids ................................................................................................................................. 821

Abstracts ........................................................................................................................................................................ 825-828
Reports of Experimental Research ................................................................................................................................. 825-832
Clinical and Pathological Reports ................................................................................................................................. 832-848

NOVEMBER, 1941. NUMBER 11

William Cramer and Robert E. Stowell. Carcinogenesis in the Mouse's Skin by the Infrequent Application at Long Intervals of Methylcholanthrene ................................................................................................................................. 849

L. Th. Larionow. On the Mechanism of Action of Carcinogenic Substances ................................................................................................................................. 860
