Contents of Volume 1

JULY, 1941. NUMBER 7

CARL V. WELLER. The Inheritance of Retinoblastoma and Its Relationship to Practical Eugenics .......................... 517
W. M. CARPENTER MACCARTY, Sr. Early Cancer of the Stomach .......................................................... 536
SIGISMUND PELLER. Malignant Melanoma Cutis ........................................................................ 538
MORRIS K. BARNETT. The Antigenic Nature of Purified Chicken Tumor Agent ......................... 543
OTTO SAPHER, MAX APPEL, and ALFRED A. STRAUSS. Growth of Brown-Pearce Carcinoma in the Anterior Chamber of the Eyes of Tumor-Immune Rabbits ........................................... 545
VALY MENKIN. Cellular Injury in Relation to Proliferative and Neoplastic Response ................. 548
AUSTIN M. BRUES and ELIZABETH B. JACKSON. The Resistance of Tumor Cells in Tissue Culture to the Growth-Inhibiting Action of Amines ................................................................. 557
L. W. LAW. The Induction of Leukemia in Mice Following Percutaneous Application of 9,10-Dimethyl-1,2-Benzanthracene ........................................................................... 564
LEONELL C. STRONG. A Genetic Analysis of the Induction of Tumors by Methylcholanthrene. 572
ALEXANDER LIPSCHÜTZ, LUIS VARGAS, Jr., and JORGE PALMA. Sex Difference in the Conjunctive Tumoral Reaction of the Guinea Pig Toward Natural and Artificial Estrogens .......... 575
ABSTRACTS ........................................................................ 580-592
Reports of Experimental Research ................................................................. 580-586
Clinical and Pathological Reports ................................................................. 586-592
BOOK REVIEWS ...................................................................... 593-594

AUGUST, 1941. NUMBER 8

ROBERT H. WILSON, FLOYD DEEDS, and ALVIN I. COX. The Toxicity and Carcinogenic Activity of 2-Acetaminofluorene ................................................................. 595
JAMES B. MURPHY and ERNEST STURM. Further Investigation on the Transmission of Induced Tumors in Fowls ............................................................................. 595
ROBERT STEELE, F. C. KOCH, and PAUL E. STEINER. The Extraction of a Carcinogenic Fraction from Human Urine ............................................................................. 614
W. A. SELLE, PAUL BRINDLEY, and JOHN W. SPIES. The Production of Tumors by Transplantation of Normally Appearing Liver Cells from Animals Previously Injected with Methylcholanthrene ................................................................. 618
PHILIP P. COHEN and G. LEVERNE HEKHUIS. Transamination in Tumors, Fetal Tissues, and Regenerating Liver ............................................................................. 620
ERNEST STURM. Induced Resistance to a Transplantable Lymphatic Leukemia in Rats ............... 627
MILTON J. EISEN and WILLIAM H. WOGLOM. The Nonspecific Nature of Induced Resistance to Tumors ............................................................................. 629
W. U. GARDNER. Estrogenic Effects of Adrenal Tumors of Ovariectomized Mice ...................... 632
RUTH M. WATTS and FRED L. ADAIR. Occurrence of Estrogenic Hormone in Ovarian Cystic Tissue ..................................................................................... 638
LLOYD C. FOGG and SHIELDS WARREN. Some Cytologic Effects of Therapeutic Radiation .... 649
M. C. REINHARD, S. G. WARNER, and H. L. GOLTZ. Further Studies on the Effect of X-Rays on a Tumor of Known Genetic Constitution ................................................. 653
MYRON GORDON. Genetics of Melanomas in Fishes. V. The Reappearance of Ancestral Micromelanophores in Offspring of Parents Lacking These Cells ....................... 656
C. G. GRAND, MYRON GORDON, and GLADYS CAMERON. Neoplasm Studies VIII. Cell Types in Tissue Culture of Fish Melanotic Tumors Compared with Mammalian Melanomas ............................................................................. 660
E. L. KENNAWAY. A Further Note on the Current Literature of Research ................................. 667
ABSTRACTS ........................................................................ 668-684
Reports of Experimental Research ................................................................. 668-675
Clinical and Pathological Reports ................................................................. 675-684

SEPTEMBER, 1941. NUMBER 9

J. T. BRADBURY, W. E. HACHMANN, and M. G. LEWIS. The Production of Cancer by Some New Chemical Compounds ............................................................................. 685
L. W. LAW and MARJORIE LEWIS. Comparative Carcinogenicity of Some Cholanthrene Derivatives ............................................................................. 695
Contents of Volume 1

J. A. Miller, D. L. Miner, H. P. Rusch, and C. A. Baumann. Diet and Hepatic Tumor Formation ...................................................... 699

Randall K. Cole. Genetic Resistance to a Transmissible Sarcoma in the Fowl ............................................................. 714

M. S. Evelth and Norman C. Wetzel. Rapid Growth of a Bronchiogenic Carcinoma .............................................................. 721

C. Carruthers and R. E. Stowell. Influence of Heptylaldehyde on Pregnancy in Rats .............................................................. 724

Proceedings of the American Association for Cancer Research, Inc.

Thirty-Fourth Annual Meeting. Chicago, Ill., April 14-16, 1941 ................................................................. 729-765

Proceedings of Scientific Sessions ................................................................. 729-753

Proceedings of Business Sessions ................................................................. 754-757

By-Laws of the Association ........................................................................... 757-759

List of Members of the Association ................................................................. 760-765

Abstracts ........................................................................... 766-770

Reports of Experimental Research ................................................................. 766-768

Clinical and Pathological Reports ................................................................. 768-770

OCTOBER, 1941. NUMBER 10

Arthur Lasnitzki and A. Keith Brewer. The Isotopic Constitution of Potassium in Animal Tumors and Muscle from Tumor-Bearing Animals ................................................................................................. 776

Arthur Kirchbaum and Leonell C. Strong. Transplantation of Leukemia Arising in Hybrid Mice ................................................................................................. 785

E. Elizabeth Jones. The Effect of Testosterone Propionate on Mammary Tumors in Mice of the C3H Strain ................................................................................................. 787

William S. Murray. Studies on the Effect of Foster Nursing and Its Relation to the Development of Mammary Carcinoma in the Mouse ................................................................................................. 790

John J. Birnner. Foster Nursing and Genetic Susceptibility for Tumors of the Breast in Mice ................................................................................................. 793

M. V. Danzi, Ethel Burack, and A. W. Wright. Abnormalities of Breeding Behavior in Rats of the Albany (A-S) Strain ................................................................................................. 795

R. Lewisohn, C. Leuchtenberger, R. Leuchtenberger, D. Laslo, and K. Bloch. Action of Yeast Extract on Transplanted and Spontaneous Malignant Tumors in Mice ................................................................................................. 799

Austin M. Brues, Beulah B. Marble, and Byron Riegel. Failure to Induce Sarcoma in Rats with Wheat Germ Oil Preparations ................................................................................................. 815

H. A. Davenport, John L. Savage, Morris J. Dirstine, and F. B. Queen. Induction of Tumors in Rats by Carcinogens in Various Lipids ................................................................................................. 821

Abstracts ........................................................................... 825-848

Reports of Experimental Research ................................................................. 825-832

Clinical and Pathological Reports ................................................................. 832-848

NOVEMBER, 1941. NUMBER 11

William Cramer and Robert E. Stowell. Carcinogenesis in the Mouse's Skin by the Infrequent Application at Long Intervals of Methylcholanthrene ................................................................................................. 849

L. Th. Larionow. On the Mechanism of Action of Carcinogenic Substances ................................................................................................. 860
