

## BOOKS FOR ASIAN STUDENTS

In four years of operation, The Asia Foundation's special project, Books for Asian Students, has sent one million selected books and 200,000 journals to more than 2,000 libraries, universities and colleges, schools and civic organizations in Asia. These materials were donated by over 700 university and college groups, publishers, libraries and individuals in the United States. The great need for books and journals continues, as evidenced by increasing requests.

Contributions of books and journals will be greatly appreciated. Books in every category on the university and college level in good condition published in 1946 or after, works by standard authors regardless of date, and scholarly, scientific or technical journals in runs of five years or more can be sent directly to:

**BOOKS FOR ASIAN STUDENTS**  
21 DRUMM ST., SAN FRANCISCO 11, CALIFORNIA

The Foundation will reimburse donors for transportation costs of substantial shipments. All contributions are tax deductible.

The Asia Foundation, a non-profit, non-political organization, founded by private American citizens, supports individuals and groups in Asia who are working for educational, cultural and community development. The Foundation maintains sixteen offices in Asia from Japan through Southeast Asia to Afghanistan.

**An inside look at Biochemicals . . .**

Biochemicals under the microscope are S.O.P.\* at NBCo. We are constantly striving to explore today's unknowns to aid thousands of

investigative and research chemists all over the world in their search for healthier living for all mankind.

We offer more than 2,600 Biochemicals of the finest purity at the lowest prices.

## INSTRUCTIONS FOR AUTHORS

**Manuscripts for *Cancer Research*** must represent new and original contributions not previously published and, if accepted, not to be published elsewhere. They must be typed, double-spaced (including references, footnotes, and tables), with ample margins, on bond paper. The original and one clear copy of the entire manuscript, including figures and charts, must be submitted. All pages should be numbered consecutively. Every paper must begin with a concise *summary* of the essential results of the investigation.

**Supplements on Cancer Chemotherapy Screening Data.** Authors who wish to submit data for publication in these supplements, which appear at least three times a year, are urged to consult the Instructions for the preparation of such material, found on the inside back cover of most of these supplements.

**Critical reviews** on subjects dealing with cancer and allied fields will be considered for publication. Such reviews should attempt to correlate the various approaches to a problem so as to indicate the trends and emphasize the aspects that require further clarification. Critical analyses of the pertinent issues and expressions of opinions are encouraged.

The **title** of the paper should be as short as is compatible with a clear indication of the subject matter. The title (with subtitle, if any) must not exceed 130 characters. Chemical formulas should not be included in the title. The title of the paper, author (or authors), location, and any acknowledgments should appear on a separate page.

**Footnotes** within the text should be numbered consecutively and should appear on a separate sheet.

**Tables** should be typed, double-spaced throughout, on separate sheets and should be numbered. Each must have a brief, descriptive title. Tables should be arranged for vertical position on the page. Every column must be supplied with an appropriate heading, and units of measure must be clearly indicated. The same data may be presented in either chart or tabular form, but not in both. Tables should be intelligible without reference to the text.

**Illustrations:** The preparation of photographs, charts, and graphs is particularly important, and authors are requested to follow carefully the directions given below.

Halftone illustrations (photomicrographs and photographs) are designated *figures* and are printed as plates at the end of each article. Figures in moderate numbers will be accepted if they are of good technical quality and essential for the clarity of the presentation. Figures should be trimmed to show only the essential features; all parts of each figure must be in sharp focus. Only clear, glossy photographs should be submitted. *Mount all photographs on*

*white cardboard* (8½×11 inches in size), with the edges abutting tightly. The engraver will then draw a thin line between adjoining figures. Place as many together as will make a plate not to exceed 6×8½ inches. Each figure should be numbered consecutively. Photographs of plates should accompany the second copy of the manuscript. Legends for plate figures should be typed separately, in consecutive order, on standard-sized paper with the heading "Legends for Figures."

Line-cut illustrations (graphs and charts) are designated *charts* and are printed in the text. These should be numbered in consecutive order. Charts should be planned so as to eliminate waste space; they must be ruled off close to the area of the curves, and descriptive matter must not extend beyond the curves. Charts must be so prepared that no letter or figure will be less than 2 mm. high after reduction. The majority of charts can be reduced to a one-column (3-inch) width, but larger ones are permissible when many data are included in one chart. Original line drawings on high-quality white drawing paper or board, blue tracing cloth, or coordinate paper *printed in blue* should be used. Only India ink should be used for drawing or lettering. Photographs of the charts should accompany the second copy of the manuscript. Legends for each chart should be typed separately in consecutive order on standard-sized paper with the heading "Legends for Charts."

The over-all size of mounted charts and plates must not exceed 8½×11 inches. When original drawings exceed this size, photographed reductions must be sent.

**References** must be typed *double-spaced* and should include, in order: author, title, journal abbreviation (*Quarterly Cumulative Index Medicus* form), volume number in Arabic numerals, inclusive pages, and year. Book references should give: author, title, pages, edition number, city, publisher, and year. All references should be checked with the original publications and must be *arranged in alphabetical order*. Each number in the references is to refer to only one paper. *Unpublished data and personal communications may not be included in "References" but must be listed as footnotes.* For examples of the correct style, refer to any current issue of *Cancer Research*.

**Changes in proof:** Any but minor changes from the manuscript which are made in proof will be billed to the author.

**Reprints** may be ordered before publication, according to a schedule of prices accompanying the galley proof of the article.

**Manuscripts and correspondence** related to contributions should be addressed to: Dr. Harold P. Rusch, Editor, *Cancer Research*, McArdle Memorial Laboratory, Madison 6, Wisconsin.

## INFORMATION FOR SUBSCRIBERS

All subscriptions and business inquiries should be addressed to the publishers, The University of

Chicago Press, 5750 Ellis Avenue, Chicago 37, Illinois.

# JOURNALS

*dealing with the interrelations of scientific disciplines...*

- **Medicine and biology**

## **PERSPECTIVES IN BIOLOGY AND MEDICINE**

Founded in 1957. Recognizes that the roots of medical theory reach into all biology. Present-day research largely analyzes ever smaller systems. Splinter sciences have developed. Their journals preoccupy themselves with data and exclude interpretation needed to formulate hypotheses for a multi-disciplined approach to the problems of biology and medicine. PERSPECTIVES offers original essays, editorial comment, letters to the editor, regular book reviews. Edited by D. J. Ingle and S. O. Waife.

*Some random titles:* "A Scientific Career," George Hevesy; "Gnotobiotics: A New Discipline in Biological and Medical Research," Thomas G. Ward and P. C. Trexler; "The Medical Uses of Literacy," Charles D. Aring; "On the Rate of Incidence of Malignant Tumors," H. S. Anker; "The Revolution in Pharmacology," D. W. Woodley.

*Quarterly. One year, \$7.00*

- **Physical foundations of biology**

## **THE BULLETIN OF MATHEMATICAL BIOPHYSICS**

Founded in 1939. Devoted to research on the physicomathematical foundations of biology. Also covers any other mathematical study in physics or borderline fields that points to a direct connection with biological problems. Edited by Nicolas Rashevsky.

*Some random titles:* "On the Linear Birth and Death Processes of Biology as Markoff Chains," Anthony F. Artholomay; "A Note on the Response Characteristics of the Extraocular Muscle System," Gerald Westheimer; "A Note on the Control of Spontaneous Activity in Nervous Systems," C. M. Williams and H. D. Landahl; "On the Estimation of Cerebral Blood Flow Obtained from Electrophysiological Observations," H. D. Landahl.

*Quarterly. One year, \$10.00*

- **Sciences dealing with cancer phenomena**

## **CANCER RESEARCH**

Founded in 1941. Official organ of the American Association for Cancer Research. Sponsored further by The Anna Fuller Fund; The Jane Coffin Childs Memorial Fund; The Elsa U. Pardee Foundation; The American Cancer Society; the National Cancer Institute, Public Health Service. Presents medical investigation in all aspects of cancer phenomena. Edited by Harold P. Rusch.

*Some random titles:* "Tissue Culture in Cancer Chemotherapy Screening," Erich Hirschberg; "Evaluation of Malignancy in Tumors Produced in X-radiated and Cortisone-treated Rats Injected with Human Cells in Continuous Culture," Melvin Friedman and Jorgen Fogh; "Host-induced Alterations in Strain Specificity of Sarcoma I in Mice: Reversibility of the Change," Norman Molomut.

*Monthly, except March. One year, \$15.00*

*Write for prices for foreign subscriptions and further information.*
