2142 Announcements.

COVER LEGEND

Lev Alexandrovich Zilber (1894-1966), doctor of medical sciences and member of the U.S.S.R. Academy of Medical Sciences, was the founder of the Russian school of viral oncology. A graduate of Moscow State University in 1919, his earlier experimental work was on auto-serotherapy of typhus (1921), hereditary transformation of serotypes in Proteus vulgaris (1922-1923), and the replication of viruses in unnatural hosts, as vaccinia virus in yeast (1932-1934). He and his co-workers identified the tick-borne, summer-spring encephalitis of the Far East regions of the U.S.S.R. He began work on the virological aspects of cancer in 1944, heading the Department of Immunology and Virology of Tumors at the Gamaleya Institute of Epidemiology and Microbiology, Moscow. [N. F. Gamaleya (1859-1949), after whom the Institute is named, was a bacteriologist who, following a visit with Pasteur in 1896, introduced rabies vaccination in Russia.] Zilber and his associates described specific tumor antigens (Adv. Cancer Res., 5: 291, 1958) and the induction of tumors in mammals by Rous sarcoma virus (Progr. Exptl. Tumor Res., 7: 1, 1965). Reviews of his work are also available in English in Progr. Exptl. Tumor Res., 1: 1, 1960, and in his book with G. I. Abelev, Tumor Virology and Immunology, a 1968 translation of the 1962 Russian text. The Selected Works of L. A. Zilber, edited by N. N. Blokhin (Meditsina, Leningrad, 1971), lists 11 monographs and over 260 articles published by Zilber.

G. I. Abelev (b. 1928) doctor of biological sciences and professor of biochemistry, graduated from Moscow State University in 1950. He was an assistant of Dr. Zilber, whom he succeeded as departmental chairman at the Gamaleya Institute in 1966. Abelev and his colleagues devoted their attention to tumor-specific antigens and demonstrated striking immunological individuality in mouse hepatomas (cf. Progr. Exptl. Tumor Res., 7: 104, 1965). The most important contribution from Abelev's group was the 1963 discovery of embryo-specific α-globulin (α-fetoprotein, or AFP) in experimental hepatomas. This led to the development of an immunodiagnostic test for hepatocellular carcinoma and teratocarcinoma in man. The work is reviewed in Advan. Cancer Res., 14: 295, 1971. The figure is from this article and is a schematic representation of AFP synthesis in normal development and pathological states (solid line, serum AFP levels in arbitrary units; broken line, expected AFP level).

We are indebted to Dr. Lev L. Kisselev for the portraits of Zilber (left) and Abelev (right).
SYMPOSIUM

Sponsored by
U. S. Atomic Energy Commission

Eli Lilly
Litton Industries

THIRD CONFERENCE ON
EMBRYONIC AND FETAL ANTIGENS IN CANCER

Held at the
Hyatt Regency Hotel
Knoxville, Tennessee
November 4–7, 1973
PROGRAM

List of Participants ................................................................. 2026
Program Committee ............................................................... 2031

Introduction.
Norman G. Anderson and Joseph H. Coggin, Jr. ................................................................. 2032

Gene Regulation and Cancer
Dorthy Skinner, Chairman

Molecular Aspects of Gene Regulation in Animal Cells.
Eric H. Davidson and Roy J. Britten ................................................................. 2034
Phasing of Gene Products during Development.
Cole Manes ................................................................. 2044

Cross-reactive Antigens
Sir P. B. Medawar, Chairman

Introduction to Session on Cross-reactive Antigens.
Sir Peter Medawar ................................................................. 2053
Implications of the Fetal Antigen Theory for Fetal Transplantation.
J. E. Castro, R. Hunt, E. M. Lance, and P. B. Medawar ................................................................. 2055
Maternal-Fetal Histoincompatibility in Rats: An Escape from Adversity.
Joy Palm ................................................................. 2061
Searching for Human Tumor Antigens.
J. W. Holleman, J. P. Breillat, and J. H. Coggin, Jr. ................................................................. 2066

Cancer, Pregnancy, and Evolution
Peter Alexander, Chairman

Escape from Immune Destruction by the Host through Shedding of Surface Antigens: Is This a Characteristic
Shared by Malignant and Embryonic Cells?
Peter Alexander ................................................................. 2077
Allyn H. Rule and Carol Goleski-Reilly ................................................................. 2083

Ectopic Synthesis, Retrogenesis, and Host Responses
Untae Kim, Chairman

Ectopic Synthesis and Paraneoplastic Syndromes.
Thomas C. Hall ................................................................. 2088
Joseph H. Coggin, Jr., Kathleen R. Ambrose, Peggy J. Dierlam, and Norman G. Anderson ................................................................. 2092
The Graded Enzymic Immaturity of Transplanted Neoplasms.
W. Eugene Knox ................................................................. 2102
Tumor Angiogenesis Factor.
   Judah Folkman. .......................................................... 2109

Chemistry of Carcinoembryonic Antigen
   H. J. Hansen, Chairman

Intermolecular Heterogeneity of the Carcinoembryonic Antigen.
   Chaim Banjo, Joseph Shuster, and Phil Gold. .......................... 2114
Heterogeneity of Carcinoembryonic Antigen.
   J. W. Eveleigh. .............................................................. 2122
Interrelationship of Carcinoembryonic Antigen and Colon Carcinoma Antigen-III.
   Edward S. Newman, Susan E. Petras, Alex Georgiadis, and Hans J. Hansen. 2225

Carcinoembryonic Antigen
   P. Gold, Chairman

   Norman Zamcheck and Herbert Z. Kupchik. ............................. 2131
Esterase Activity of Carcinoembryonic Antigen.
   Devidayal Munjal and Norman Zamcheck. ............................... 2137

Papers Presented and Published as Abstracts in USAEC Report Conf-73-1141\(^1\), \(^2\)

Gene Regulation and Cancer
   Dorthy Skinner, Chairman

Cancer Viewed as a Disease of Cell Differentiation. Clement L. Markert.

Cross-reactive Antigens
   Sir P. B. Medawar, Chairman

Chemistry of Carcinoembryonic Antigen
   H. J. Hansen, Chairman

\(^1\) Requests for abstracts of the Third Conference on Embryonic and Fetal Antigens in Cancer should be addressed to: R. E. Canning, Molecular Anatomy (MAN) Program, P. O. Box P, Building K-703, Oak Ridge National Laboratory, Oak Ridge, Tenn. 37830.

\(^2\) The person whose name is italicized was the presenter of the paper.
Quantitative Absorption of Undesired (Blood Group) Antibodies from Antisera to CEA. *Arnold E. Reif* and *Cynthia M. Robinson.*

Demonstration of Blood Group Antigen A, B, Lewis, and Lewis on Different Preparations of CEA. *Jean-Pierre Mach, Alexander Holburn, Dorothy MacDonald, Stephan Carrel, and Claude Merenda.*

CEA Antigen “Fingerprints.” *Allyn H. Rule* and *C. Goleski-Reilly.*

---

**Carcinoembryonic Antigens: Clinical Studies**

*Jack Snyder, Chairman*

- Simultaneous Measurement of Serum CEA and aFP in Colorectal and Gastric Cancer. *M. Ravry, K. R. McIntire, C. G. Moertel, T. A. Waldmann,* and *V. L. W. Go.*
- Serial CEA Levels in the Clinical Assessment of Prognosis of Patients with Resected Colon Cancer. *Norman Zamcheck.*
- The CEA Assay in Bronchogenic Carcinoma. *J. P. Concannon, M. H. Dalbow,* and *John C. Frich, Jr.*
- CEA in Four Cancer-prone Families. *Hoda A. Guirgis* and *Henry T. Lynch.*
- Radioimmunoassay for CEA in Plasma. *Jorge Franco, Bernadine Kovaleski, Kit Vanags,* and *Monika Schreyer.*
- CEA Determinations and Rabbit Antibody Studies with Two Double-Antibody Assays. *Britta Wahren* and *Rolf Zimmermann.*
- A Method of Rapid Dialysis for Use with the Zirconyl Gel Assay for CEA. *H. Z. Kupchik, Marvin C. Feil,* and *Calvin C. Saravis.*
- Radiolabeled Anti-CEA Binding to Human Colon Cancer and Normal Colon Tissue in Vitro. *J. E. Coates, M. Koch, P. Beaver, T. A. McPherson,* and *A. A. Noujaim.*
- Diverse Antibody Response to Different Determinants on CEA. *Joseph T. Tomita, J. W. Safford,* and *A. A. Hirata.*
- Characterization of CEA in a Human Colon Carcinoma (GW-39) Serially Propagated in Hamsters and in Vitro. *Q. Pletsch* and *D. M. Goldenberg.*
- The Effect of Hormones on CEA Levels in Patients with Carcinoma of the Prostate. *I. M. Bush, N. Sadoughi, T. John, P. Guinan,* and *R. J. Ablin.*
- Affinity Chromatographic Studies of CEA. *A. T. Ichiki, Y. Quirin, R. Shelton,* and *R. D. Lange.*
- Plasma CEA in Patients with Hematologic Malignancies. *John C. Ruckdeschel* and *Peter H. Wiernik.*

---

**Retrogenesis, Tumor Antigens, and Gene Control**

*K. R. Ambrose, Chairman*

- Studies with α-Lactalbumin as a Breast-specific Marker in Human Mammary Cancer. *James L. Wittliff, Thomas C. Hall,* Donald S. Schalch, and *Kosuke Osakawa.*
- Approaches to Improving CEA-Radioimmunoassay Specificity: Use of Baboon and Rabbit Antisera to a “Neonatal” CEA Bound to Different Backbones. *Allyn H. Rule, Richard Condie, Mary Kirch,* and *Larry Nathanson.*
Retrogenesis
A. J. Girardi, Chairman

Immunological Response to Tumor-associated Fetal Antigens. F. A. Salinas and M. G. Hanna, Jr.
Immunological Similarities between Fetal Antigens and Methylcholanthrene-induced Tumor Cell Antigens. Samuel A. Wells, Jr., and John P. Grant.
Association and Dissociation of Rat Mammary Tumor Cell Surface Antigen: Possible Mechanisms of Metastasis and a Fundamental Difference between Human and Animal Tumors. Untae Kim.
A Comparison of Enzyme-active Membrane Antigens from Two Different DMAB-induced Hepatomas with Those of Adult and Fetal Rat Liver. M. Raftell, F. Blomberg, and P. Perlmann.
Expression of Fetal Genes by Mouse Hepatoma Cells in Culture: The Synthesis of αFP. Barry E. Ledford and John Papaconstantinou.
Differentiation between Embryonic and Tumor-specific Antigens on Chemically Induced Tumors. R. W. Baldwin and B. M. Vose.
Tumor Allograft Immunotherapy in Postgestational Choriocarcinoma. Roland A. Pattillo, Glen E. Rodey, and Lyle Heim.
Derepressive Interception in Cancer. Wayne E. Criss.

α-Fetoprotein
M. Al-Sarraf, Chairman

Fetal Proteins Used to Monitor Treatment of Testicular Teratomas. Britta Wahren and Folke Edsmyr.
Effect of Treatment on αFP Levels in Patients with Hepatocellular Carcinoma. A. Primack, K. R. McIntire, C. L. Vogel, and T. A. Waldmann.
Suppression of Hepatoma Growth Using Passively Administered Antiserum to αFP. G. J. Mizejewski.
αFP in Nonhuman Primates with Primary Liver Tumors. K. R. McIntire and R. H. Adamson.
Immunological Significance of α2-Macroglobulin Detected in Tumor Tissue and Cultured Tumor Cells. M. H. Dalbow and J. P. Concannon.
Rivanol Counterelectrophoresis Compared with Radioimmunoassay for the Detection of αFP. Jorge Franco, Bernadine Kovaleski, Kit Vanags, and Monika Schreyer.
