

PROGRAM

I. Epidemiological Factors, Hormones, and Cancer

An Overview of Hormone-associated Cancers. <i>Anthony B. Miller</i>	3985
Role of Exogenous Female Hormones in Altering the Risk of Benign and Malignant Neoplasms in Humans. <i>David B. Thomas</i>	3991
A Critique of the Statistical Evidence Associating Estrogens with Endometrial Cancer. <i>Alvan R. Feinstein and Ralph I. Horwitz</i>	4001
Plasma Hormone Profiles of Young Women at Risk for Familial Breast Cancer. <i>Jack Fishman, David Fukushima, John O'Connor, Robert S. Rosenfeld, Henry T. Lynch, Jane F. Lynch, Hoda Guirgis, and Kathleen Maloney</i>	4006
Impeding Estrogens and the Etiology of Breast Cancer. <i>Herbert H. Wotiz, Sati C. Chattoraj, Michele Kudisch, and R. Enzio Müller</i>	4012
Menstrual Cycle Patterns and Breast Cancer Risk Factors. <i>Robert B. Wallace, Barry M. Sherman, Judy A. Bean, James P. Leeper, and Alan E. Treloar</i>	4021
Relationship between Urine and Plasma Estrogen Ratios. <i>Christopher Longcope and J. Howard Pratt</i>	4025
Androgen-Estrogen Production Rates in Postmenopausal Women with Breast Cancer. <i>Marvin A. Kirschner, Frederick B. Cohen, and Catherine Ryan</i>	4029
Adrenal Dehydroepiandrosterone and Human Mammary Cancer. <i>John B. Adams, Lesley Archibald, and Christine Clarke</i>	4036

II. Hormones and Regulation of Normal and Malignant Mammary Epithelium

A Proposed Coupling of Chromatin Replication, Hormone Action, and Cell Differentiation. <i>Gerald C. Mueller, Kazuto Kajiwara, Uh Hee Kim, and Joyce Graham</i>	4041
Role of Hormones in Mammary Neoplasia. <i>S. Nandi</i>	4046
Effect of Parity on Recovery of Inapparent Nodule-transformed Mammary Gland Cells <i>in Vivo</i> <i>K. B. DeOme, Marilyn J. Miyamoto, Rebecca C. Osborn, Raphael C. Guzman, and Kenneth Lum</i>	4050
Prolactin and the Development and Progression of Early Neoplastic Mammary Gland Lesions. <i>Clifford W. Welsch</i>	4054
A Difference between Mammary Epithelial Cells from Mature Virgin and Primiparous Mice. <i>B. K. Vonderhaar, G. H. Smith, R. J. Pauley, J. M. Rosen, and Y. J. Topper</i>	4059
Mesenchyme-mediated Effect of Testosterone on Embryonic Mammary Epithelium. <i>Heidelinde Dürnberger, Barbara Heuberger, Peter Schwartz, Gertraud Wasner, and Klaus Kratochwil</i>	4066
Antagonistic Action between Cyclic Adenosine 3':5'-Monophosphate and Estrogen in Rat Mammary Tumor Growth Control. <i>Yoon Sang Cho-Chung</i>	4071
Regulatory Interrelationships for Insulin and Estrogen Action in Mammary Tumors. <i>Russell Hilf, Paul J. Hissin, and Samir M. Shafie</i>	4076
Isolation and Purification of Rat Mammary Tumor Peroxidase. <i>Eugene R. DeSombre and C. Richard Lyttle</i>	4086
Unsaturated Fatty Acid Requirements for Growth and Survival of a Rat Mammary Tumor Cell Line. <i>William R. Kidwell, Marie E. Monaco, Max S. Wicha, and Gilbert S. Smith</i>	4091
Vasopressin Stimulation of Acetate Incorporation into Lipids in a Dimethylbenz(a)anthracene-induced Rat Mammary Tumor Cell Line. <i>M. E. Monaco, M. E. Lippman, R. Knazek, and W. R. Kidwell</i>	4101
Specificity of Arrest, Survival, and Growth of Selected Metastatic Variant Cell Lines. <i>Garth L. Nicolson, Kenneth W. Brunson, and Isaiah J. Fidler</i>	4105
Hormonal Induction of Mammary Tumor Viruses and Its Implications for Carcinogenesis. <i>Charles M. McGrath and Richard F. Jones</i>	4112
Combined Effects of Testosterone and Estradiol on Rat Ventral Prostate in Organ Culture. <i>Thérèse Feyel-Cabanes, Jean Secchi, Paul Robel, and Etienne-Emile Baulieu</i>	4126
Multiple Sensitivities of Mammary Tumor Cells in Culture. <i>Jean Yates and Roger J. B. King</i>	4135
Role of Prostaglandins in Production of Hypercalcemia by Tumors. <i>Armen H. Tashjian, Jr.</i>	4138

Stimulation by Carcinogens and Promoters of Prostaglandin Production by Dog Kidney (MDCK) Cells in Culture. <i>Lawrence Levine and Kazuo Ohuchi</i>	4142
Growth Factors Produced by Sarcoma Virus-transformed Cells. <i>George J. Todaro and Joseph E. De Larco</i>	4147
Determination of Cellular Shape by the Extracellular Matrix and Its Correlation with the Control of Cellular Growth. <i>D. Gospodarowicz, G. Greenburg, and C. R. Birdwell</i>	4155
Relationships of the Structure and Function of the Interferon Receptor to Hormone Receptors and Establishment of the Antiviral State. <i>Evelyn F. Grollman, George Lee, Sofia Ramos, Pedro S. Lazo, H. Ronald Kaback, Robert M. Friedman, and Leonard D. Kohn</i>	4172

III. Steroid Hormone Action and Cancer

Unique Steroid Congeners for Receptor Studies. <i>Tiiu Ojasoo and Jean-Pierre Raynaud</i>	4186
Structure of Chick Progesterone Receptors. <i>William T. Schrader and Bert W. O'Malley</i>	4199
Receptor and Centriole Pathways of Steroid Action in Normal and Neoplastic Cells. <i>Italo Nenci</i>	4204
Investigation of Hormone-Receptor Interactions by Means of Fluorescence Labeling. <i>Walter B. Dandliker, R. James Brawn, Mao-Lin Hsu, Peter N. Brawn, Jacques Levin, Cal Y. Meyers, and Vera M. Kolb</i>	4212
Estradiol Receptor Analysis in Human Breast Cancer Tissue by Isoelectric Focusing in Polyacrylamide Gel. <i>Jan-Åke Gustafsson, Sven A. Gustafsson, Bo Nordenskjöld, Sam Okret, Claes Silfverswärd, and Örjan Wrangé</i>	4225
Comparison between Different Forms of Estrogen Cytosol Receptor and the Nuclear Receptor Extracted by Micrococcal Nuclease. <i>Henri Rochefort and Jean André</i>	4229
Effects of Ethidium Bromide on the Extractability of Nuclear Receptor-Estrogen Complex. <i>R. Enzio Müller, Joyce E. Meader, and Herbert H. Wotiz</i>	4233
Metabolism of 17 β -Estradiol during Receptor-mediated Nuclear Migration in Breast Cancer Cells. <i>S. C. Brooks, E. R. Locke, and L. Horn</i>	4238
Restoration by Adrenalectomy of Weight and Binding Capacity of Glucocorticoid Receptors of the Thymus in AH 130 Tumor-bearing Rats. <i>Fumihide Isohashi, Kazue Tsukanaka, Masako Terada, Yoko Nakanishi, Sadanao Tani, and Yukiya Sakamoto</i>	4243

IV. Hormone Action and Specific Disease States

Specific Binding of Estrogens in Different Fetal Tissues of Guinea Pig during Fetal Development. <i>J. R. Pasqualini, C. Sumida, C. Gelly, B. L. Nguyen, and J. Tardy</i>	4246
Clinical Implications of Glucocorticoid Receptors in Human Leukemia. <i>Marc E. Lippman, Geraldine Konior Yarbro, and Brigid G. Leventhal</i>	4251
Discrepancies between <i>in Vivo</i> and <i>in Vitro</i> Effects of Glucocorticoids in Myelomonocytic Leukemic Cells with Steroid Receptors. <i>Stefano Iacobelli, Franco O. Ranelletti, Paola Longo, Riccardo Riccardi, and Renato Mastrangelo</i>	4257
Prognostic Value of Steroid Receptor Determination in Leukemia. <i>D. Duval and F. Homo</i>	4263
Glucocorticoid Receptors and Sensitivity of Isolated Human Leukemia and Lymphoma Cells. <i>Gerald R. Crabtree, Kendall A. Smith, and Allan Munck</i>	4268
Use of a Human Lymphoid Cell Line to Evaluate Interactions between Prednisolone and Other Chemotherapeutic Agents. <i>M. R. Norman, J. M. Harmon, and E. B. Thompson</i>	4273
Glucocorticoid Resistance in Murine Lymphoma and Thymoma Lines. <i>Suzanne Bourgeois, Ronald F. Newby, and Marianne Huet</i>	4279
Regulation of S49 Lymphoma Cell Growth by Cyclic Adenosine 3':5'-Monophosphate. <i>Philip Coffino and Joe W. Gray</i>	4285
Steroid Receptors in Human Breast Cancer. <i>William L. McGuire</i>	4289
Estrogen Receptor Assay in Primary Breast Cancer and Early Recurrence of the Disease. <i>P. V. Maynard, R. W. Blamey, C. W. Elston, J. L. Haybittle, and K. Griffiths</i>	4292
Prognostic Value of Estrogen Receptor Determinations in Patients with Breast Cancer. <i>M. A. Rich, P. Furmanski, S. C. Brooks, and the Breast Cancer Prognostic Study Surgery and Pathology Associates</i>	4296

An Association between Steroid Hormone Receptors and Response to Cytotoxic Chemotherapy in Patients with Metastatic Breast Cancer. <i>Joseph C. Allegra, Marc E. Lippman, E. B. Thompson, and Richard Simon</i>	4299
Some Comments on the Necessity of Receptor Determination in Human Breast Cancer. <i>Walter Jonat and Heinrich Maass</i>	4305
Molecular Heterogeneity of Cytosolic Forms of Estrogen Receptors from Human Breast Tumors. <i>Timothy E. Kute, Peter Heidemann, and James L. Wittliff</i>	4307
Relation between Steroid Receptor Content and the Response to Hormone Addition in Isolated Human Breast Cancer Cells in Short-Term Culture. <i>Nicole Israel and Simone Saez</i>	4314
α -Lactalbumin in Human and Subhuman Primate Normal Mammary Tissue and in Human Breast Cancer as a Marker for Prolactin Activity. <i>David L. Kleinberg and Jean Todd</i>	4318
Role of Pituitary Hormones in the Growth of Human Breast Cancer. <i>Olof H. Pearson, Andrea Manni, Mark Chambers, Jerald Brodkey, and James S. Marshall</i>	4323
Human Breast Carcinoma Cells in Continuous Culture: A Review. <i>Linda W. Engel and Nathaniel A. Young</i>	4327
Human Renal Cell Carcinoma as a Hormone-dependent Tumor. <i>Giuseppe Concolino, Antonietta Marocchi, Carlo Conti, Raffaele Tenaglia, Franco Di Silverio, and Ulrico Bracci</i>	4340
Correlation between Clinical Response to Hormone Therapy and Steroid Receptor Content in Prostatic Cancer. <i>Jan-Åke Gustafsson, Peter Ekman, Marek Snochowski, Anders Zetterberg, Åke Pousette, and Bertil Högberg</i> .	4345
Dihydrotestosterone Concentration in Prostate Cancer Tissue as a Predictor of Tumor Differentiation and Hormonal Dependency. <i>Jack Geller, Jerry Albert, Daniel de la Vega, Debra Loza, and Woods Stoeltzing</i>	4349
Animal Models of the Hormone-sensitive and -insensitive Prostatic Adenocarcinomas, Dunning R-3327-H, R-3327-HI, and R-3327-AT. <i>John T. Isaacs, Warren D. W. Heston, Robert M. Weissman, and Donald S. Coffey</i>	4353
Steroid Hormones and Endometrial Cancer. <i>Pentti K. Siiteri</i>	4360
Human Endometrial Cancer Cell Cultures for Hormonal Studies. <i>P. G. Satyaswaroop, Honorée Fleming, Robert S. Bressler, and Erlio Gurpide</i>	4367

Cancer Research
