The University of Texas M. D. Anderson Hospital and Tumor Institute  
presents

36th Annual Symposium on Fundamental Cancer Research

***“Cancer Invasion and Metastasis”***

February 28–March 3, 1983

Shamrock Hilton Hotel, Houston, Texas

Chairmen: Garth L. Nicolson, Ph.D. and Luka Milas, M.D., Ph.D.

**PROGRAM:**

***Tumor Cell Properties and Metastasis***

R. H. Baldwin, Chairman  
M. Feldman  
R. S. Kerbel  
V. Schirmacher  
D. Stringfellow

***Tumor Invasion***

I. Zeidman, Chairman  
J. Folkman  
I. Hart  
P. A. Jones  
L. Liotta  
G. L. Nicolson  
D. Rifkin

***Tumor Heterogeneity***

I. J. Fidler, Chairman  
S. Baylin  
D. Dexter  
G. Heppner  
B. Longenecker  
P. Nowell  
G. Poste

***Host Factors and Metastasis***

K. Hellmann, Chairman  
P. Alexander  
N. Hanna  
P. Hilgard  
K. Honn  
U. Kim  
L. Milas

***Therapy of Metastasis***

B. Fisher, Chairman  
R. H. Baldwin  
S. Carter  
I. J. Fidler  
D. P. Griswold  
E. Hersh  
L. Peters

# **Cancer Epidemiology and Prevention**

**David Schottenfeld  
Joseph F. Fraumeni, Jr.**

---

---

In **Cancer Epidemiology and Prevention**, Drs. David Schottenfeld and Joseph F. Fraumeni, Jr. have provided a comprehensive, authoritative review of this area of cancer research. With contributions by approximately 100 internationally prominent scientists and clinicians, the volume contains the most current state of the knowledge in cancer epidemiology and prevention, including information on the worldwide patterns of cancer occurrence.

The text is divided into five sections: Basic Concepts, Magnitude of Cancer, Causes of Cancer, Cancer by Tissue of Origin, and Cancer Control. Included are chapters on epidemiologic methods, carcinogenic mechanisms, stomach cancer, ionizing radiation, viruses, and the role of nutrition in cancer. Incidence, mortality, survival, and economic statistics for cancer in the U.S. are also detailed, as well as the involvement of genetic-environmental interactions in the origins of human cancer.

The book concludes by addressing the evaluation and promotion of research developments and technology that may be applied in the general community to reduce cancer morbidity and mortality. Special chapters are devoted to historical developments in cancer control, public education and motivation of high-risk groups, and the role of allied health professionals and regulatory agencies. Thus, the appeal of this work ranges from oncologists and epidemiologists to public health students and professionals.
