NOW: Expanded to accommodate the increasing amount of vital information in the field—

# CANCER GENETICS AND CYTOGENETICS

The enormous amount of research data currently being generated in the fields of cancer genetics and cytogenetics has made it necessary to expand this internationally acclaimed journal to a monthly format.

**Cancer Genetics and Cytogenetics** brings you outstanding original articles on human, animal, molecular, population, and biomedical genetics and cytogenetics as they relate to the broad fields of cancer. In addition, editorial board members submit review articles of general interest in their respective fields, making **Cancer Genetics and Cytogenetics** the single source for a large multidisciplinary audience.

Now more than ever, this is the easy and convenient way to keep abreast of the latest developments in this fast-growing field, *without* having to sift through dozens of different journals.
