MODIFICATION OF RADIOSENSITIVITY IN CANCER TREATMENT

Edited by TSUTOMO SUGAHARA

This book presents a comprehensive overview of radiosensitization in cancer therapy. The papers describe new methods of combined hyperthermia, chemical protectors, hypoxic cell sensitizers, repair inhibitors, and new results in improving local control of tumors.

The contributions draw upon the fields of chemistry, physics, pharmacology, radiobiology, and radiation oncology. **Modification of Radiosensitivity in Cancer Treatment** demonstrates to the cancer researcher how basic research can be applied to the practical problems of cancer treatment. Radiation oncologists will find material in this book of value for improving daily radiotherapy.

THE RETINOIDS

Volumes 1 and 2

Edited by MICHAEL B. SPORN,
ANITA B. ROBERTS, and DeWITT S. GOODMAN

VOLUME 1

CONTENTS: *M. B. Sporn, A. B. Roberts, and D. S. Goodman*, Introduction. *F. Frickel*, Chemistry and Physical Properties of Retinoids. *H. H. Kaegi*, Synthesis of Retinoids Labeled with Radioisotopes. *C. A. Frolik and J. A. Olson*, Extraction, Separation, and Chemical Analysis of Retinoids. *M. B. Sporn and A. B. Roberts*, Biological Methods of Analysis and Assay of Retinoids—Relationships between Structure and Activity. *B. A. Underwood*, Vitamin A in Animal and Human Nutrition. Each chapter includes references. Appendix. Index.

April/May 1984, 448 pp., \$46.00*/ISBN: 0-12-658101-0

VOLUME 2

CONTENTS: *D. S. Goodman and W. S. Blaner*, Biosynthesis, Absorption, and Hepatic Metabolism of Retinol. *D. S. Goodman*, Plasma Retinol-Binding Proteins. *F. Chytil and D. E. Ong*, Cellular Retinol-Binding Proteins. *C. D. B. Bridges*, Retinoids in Photosensitive Systems. *C. A. Frolik*, Metabolism of Retinoids. *A. B. Roberts and M. B. Sporn*, Cellular Biology and Biochemistry of the Retinoids. *J. J. Kamm, K. O. Ashenfelter, and C. W. Ehmann*, Preclinical and Clinical Toxicology of Selected Retinoids. *R. C. Moon and L. M. Itri*, Retinoids and Cancer. *G. Dennert*, Retinoids and the Immune System: Immunostimulation by Vitamin A. *G. L. Peck*, Synthetic Retinoids in Dermatology. Each chapter includes references. Appendix. Index.

April/May 1984, 464 pp., \$48.00*/ISBN: 0-12-658102-9

*Set price for Volumes 1 and 2: \$80.00 (\$94.00, if purchased separately). Set prices are not valid in Australia or New Zealand.

*Send payment with order and save postage and handling.
Prices are in U.S. dollars and are subject to change

MONOCLONAL ANTIBODIES IN CANCER

Edited by BARBARA D. BOSS, ROD LANGMAN,
IAN TROWBRIDGE, and RENATO DULBECCO

*Proceedings of the 4th Armand Hammer
Cancer Symposium.*

Monoclonal Antibodies in Cancer provides a critical and comprehensive review of the issues of monoclonal antibodies in cancer treatment and diagnosis. The topics discussed range from the present status of clinical traits of monoclonal antibodies in the treatment of leukemia and solid tumors, to the development of human monoclonal antibody therapy including experimental studies with cytotoxic antibody—toxin conjugates or "magic bullets."

With contributions by leading researchers in the field, this volume will inform clinicians and researchers about the latest developments in monoclonal antibody research in relationship to cancer.
1984, 328 pp., \$44.50/ISBN: 0-12-118880-9

NUTRITIONAL FACTORS IN THE INDUCTION AND MAINTENANCE OF MALIGNANCY

Edited by C. E. BUTTERWORTH, Jr.
and MARTHA L. HUTCHINSON

Reflecting the topic of nutrition and cancer at a recent symposium, this book presents the contributions of a group of leading, active scientists and clinical investigators. Assembled in this one volume are the research findings from diverse disciplines that have in common an important component of nutrition science as it relates to cancer. Seventeen chapters provide up-to-date reviews and current advances in biomedical fields. Many new hypotheses were generated and much new insight was added regarding existing knowledge. **Nutritional Factors in the Induction and Maintenance of Malignancy:** • relates nutrition science to recent advances in other biomedical fields; • delineates mechanisms by which deficiencies in certain dietary nutrients enhance susceptibility to cancer; • explores links between diet and the epidemiology of cancer; • provides insight into defects of nutrient metabolism, whether inherited or acquired, and their relation to carcinogenesis.

1983, 336 pp., \$36.00/ISBN: 0-12-147520-4

HUMAN CARCINOGENESIS

Edited by CURTIS C. HARRIS
and HERMAN N. AUTRUP

Based on the proceedings of the Conference on Carcinogenesis Studies Using Cultured Human Tissues and Cells, held at the Given Institute of Pathology, Aspen, Colorado, on September 16–21, 1982.

CONTENTS (Section Headings): Growth and Differentiation of Human Cells. Metabolism of Chemical Carcinogens, DNA Damage, and DNA Repair. Tumor Promotion. Cellular Lesions Caused by Chemical Carcinogens. Cellular Lesions Caused by Physical Carcinogens. Special Address. Viral Oncogenesis. Laboratory Epidemiology Studies.

1983, 1,008 pp., \$69.50/ISBN: 0-12-327660-8

As Memory Serves
Six Essays on a Personal
Involvement with the
National Cancer Institute,
1938 to 1978

Michael B. Shimkin, M.D.

In *As Memory Serves: Six Essays on a Personal Involvement with the National Cancer Institute, 1938 to 1978*, Dr. Michael B. Shimkin recounts some of the efforts, achievements, setbacks, and hopes spanning forty years of cancer research. In the first of these previously published articles, Dr. Shimkin presents an informal history of the National Cancer Institute through 1957. The second essay describes some meetings and collaborative endeavors between cancer researchers in the United States and the U.S.S.R., while the third one discusses the short-lived Laboratory of Experimental Oncology in San Francisco. Entitled "The Written Word and Cancer," the fourth paper examines the evolution of cancer-related publications. The final two articles detail the steady growth and most noteworthy projects of the National Cancer Institute in more recent decades, ending with some retrospective reflections on its public and personal significance. Each of the six essays contains a selective list of references, as well as photographs of many of the individuals and facilities mentioned therein. *As Memory Serves* is for sale by the Superintendent of Documents, U. S. Government Printing Office, Washington, D. C. 20402.
