SPECIAL DELIVERY FOR CANCER RESEARCH.

ALZET® OSMOTIC PUMPS FOR CONVENIENT,
RESULTS-ORIENTED DRUG DELIVERY.

ALZET: FOR CONTINUOUS DOSAGE

Alzet Osmotic Pumps offer the choice of 1-4 weeks of delivery, night and day, for continuous presence of even the shortest half-life agent.

ALZET: FOR CONVENIENCE

Subcutaneous implantation can be completed in less than one minute. It is easily mastered. In fact, ALZA Corporation loans, free-of-charge, a videocassette showing subcutaneous and other implantation procedures.

ALZET: FOR RESULTS

Multiday infusions ensure that you measure the fully developed actions of your test agent in the steady-state. Single-dose studies are useful, but the actions of many agents are far from fully developed by a single dose. The versatility of the Alzet Osmotic Pumps has been demonstrated in over a thousand publications.

ALZET: FOR CANCER RESEARCH APPLICATIONS

Alzet Osmotic Pumps have been successfully used for the administration of many agents used in cancer research including bleomycin, cisplatin, citrovorum factor, methotrexate, acivicin, 5-fluorouracil, and peplomycin.

To place an order, call toll-free 800-227-9953. In California, Alaska, Hawaii and Canada, call collect (415) 494-5067. For more information, mail the coupon below.
