**YOU CAN
FIGHT CANCER
BEFORE YOU
GET IT.

OR AFTER
YOU GET IT.**

It's a lot easier to fight cancer before you get it.

Scientists estimate that up to 60% of all cancer could be prevented.

By simply making a few changes in your lifestyle.

By not getting too much sun. By not smoking cigarettes. By not overeating. And by following a diet high in fiber and low in fat.

By simply doing these few things, you could drastically reduce your risk of getting cancer.

Sure, you could still get cancer.

But why not give yourself the odds against it?

**AMERICAN
CANCER
SOCIETY®**

IN
Cancer Research

THE #1 CITED JOURNAL IN ITS FIELD

Subscribe to *Cancer Research*—the leading citation source of original studies in cancer research and cancer-related biomedical science. Issued monthly, *Cancer Research* publishes over 7,000 pages per year that keep you abreast of the most significant and timely findings in your field through the following regular features:

- **The most up-to-date articles** in basic research and clinical and epidemiological investigations by authors from more than 30 countries and the United States
- **Perspectives in *Cancer Research***, in which leading investigators explore contemporary and at times controversial topics
- **Supplemental issues** developed from symposia on relevant subjects—*Symposium on HTLV*, the 1985 supplement, presented reports from an international conference on the HTLV family of viruses including several articles on the HTLV-related disease AIDS
- ***Proceedings of the American Association for Cancer Research***, a special annual issue that offers stimulating new research ideas in abstract form

MILLIONS OF PEOPLE HAVE BEEN CURED OF A DISEASE MOST PEOPLE THINK IS INCURABLE.

We've made significant progress against most forms of cancer.

But, as far as many people are concerned, cancer is still a fatal disease.

There are nearly three million people who would disagree. People who have had cancer and are now cured.

For certain forms of cancer, the progress we've made is nothing short of miraculous.

With early detection and prompt treatment, the survival rate for Hodgkin's disease can be as high as 74%. Childhood leukemia: as high as 65%. Colon and rectal cancer: as high as 75%. Breast cancer: as high as 90%.

Today, one in every two people who get cancer will survive.

As far as we've come, we still have quite a way to go. And for that, we'd like your help.

There's only one place where cancer is a hopeless disease:

In your mind.

Help us keep winning.
